File No: LQ00364a

Golden Predator Exploration LTD.
250-200 Burrard Street
Vancouver BC V6C 3L6
Canada

Dear Golden Predator Exploration LTD:

Re: Class 4 Quartz Mining Land Use Approval

Your application for a Class 4 approval has been approved and is subject to the attached conditions and security deposit. The effective date of this approval will be July 6, 2012. All work, including restoration, must be completed by July 5, 2022, and inspected before full security and/or completion certificates can be applied for.

The attached 'Operational Guidelines' offer additional mitigations that would enable you to maximize the environmental performance of your program, but are not approval conditions.

Please ensure that pre-season and post-season reports are provided before and after each exploration season. Pre- and post-season reports assist the Mineral Resources Branch in monitoring exploration activity and reclamation. Not providing reports may result in additional security being required.

Please feel free to contact our office at 867-993-5343 should you have any questions.

Regards,

Saleem Dar
Chief of Mining Land Use

cc: EMR Natural Resources Officer, Compliance Monitoring and Inspections
ENV Environmental Affairs, Environmental Protection Branch

MINING LANDS
MINERAL RESOURCES BRANCH
GOVERNMENT OF YUKON

Pursuant to the *Quartz Mining Act* and *Quartz Mining Land Use Regulation*, the Chief, Mining Land Use hereby changes the operator name to:

Golden Predator Exploration LTD
250-200 Burrard Street
Vancouver BC V6C 3L6
Canada

APPROVAL NUMBER: LQ00364a
PROPERTY NAME: Brewery Creek
UNDERTAKING: Quartz
CLASS: Class 4 Approval
EFFECTIVE DATE: July 6, 2012
EXPIRY DATE: July 5, 2022

This approval shall be subject to the restrictions and conditions contained herein and to the restrictions and conditions contained in the *Quartz Mining Act* and the *Quartz Mining Land Use Regulation* made there under as proposed in Mining Land Use Application(s) LQ00364 and LQ00364a..

Dated this July 28, 2021

A handwritten signature in blue ink, appearing to read "Saleem Dar".

Saleem Dar
Chief of Mining Land Use

**MINING LAND USE
APPROVAL
Class 4**

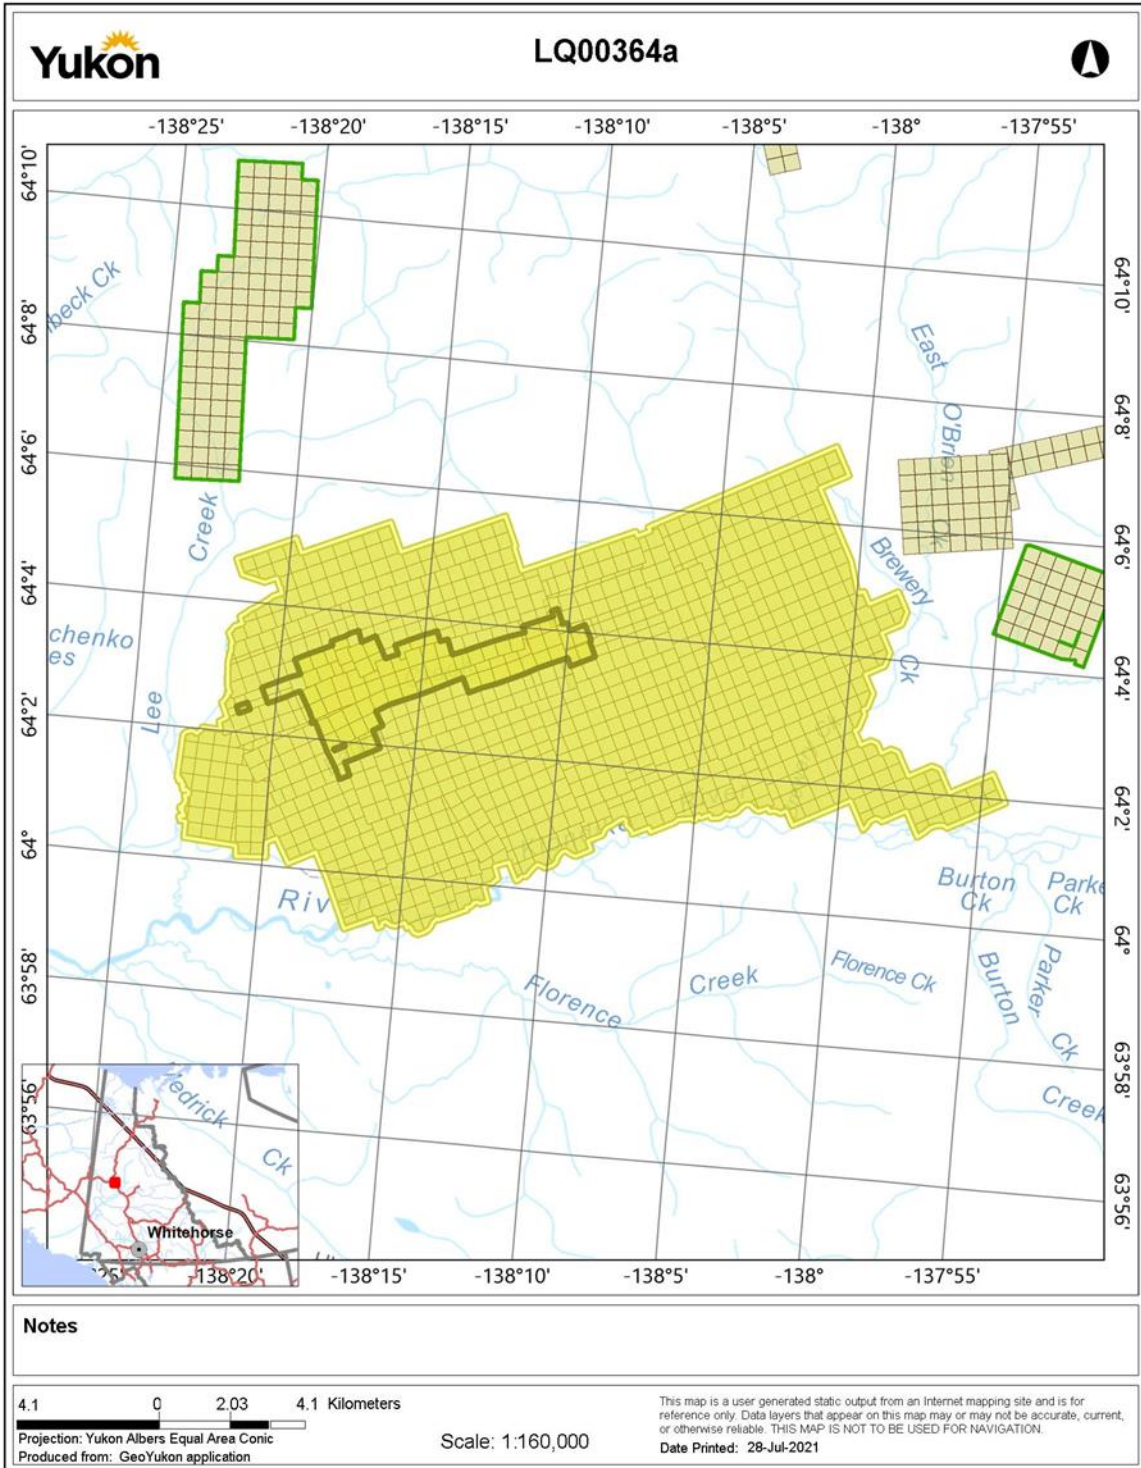

SCOPE OF APPROVAL:			
Claim Status Report (Appendix A)		LQ00364a	
Operating Season	January 1 to December 31	1071 claims	
PROJECT ACTIVITIES (ON-CLAIM):			
USE OF VEHICLES/EQUIPMENT			
Use of vehicles on existing roads or trails			<input type="radio"/> No <input checked="" type="radio"/> Yes
Gross vehicle weight	On-roads: More than 40 t	On-trails: Less than 20 t	
Off-road use of vehicles in summer			<input checked="" type="radio"/> No <input type="radio"/> Yes
Off-road use of vehicles in winter			<input checked="" type="radio"/> No <input type="radio"/> Yes
NEW & EXISTING ACCESS			
Upgrading of existing access	<input checked="" type="radio"/> No <input type="radio"/> Yes	Length: x km	Width: x m
New roads	<input type="radio"/> No <input checked="" type="radio"/> Yes	Length: 61 km	Width: 5 m
New trails	<input checked="" type="radio"/> No <input type="radio"/> Yes	Length: x km	Width: x m
New temporary trails	<input checked="" type="radio"/> No <input type="radio"/> Yes	Length: x km	Width: x m
Other new access:			
LINES & CORRIDORS			
Lines	<input type="radio"/> No <input checked="" type="radio"/> Yes	Length: 50 km	Width: 1.5 m
Corridors	<input type="radio"/> No <input checked="" type="radio"/> Yes	Length: 50 km	Width: 1.5 m
SITE PREPARATION			
Number of clearings per claim: 100 per year		Area: 900 m ² each	
Removal of the vegetative mat <input type="radio"/> No <input checked="" type="radio"/> Yes		Area: 800 m ² each (30m+ from waterbody)	
EXPLORATION TRENCHING & BULK SAMPLING			
Hand-dug			<input checked="" type="radio"/> No <input type="radio"/> Yes
Mechanized			<input type="radio"/> No <input checked="" type="radio"/> Yes
Number: 13	Length: 155 m	Width: 3 m	Depth: 2 m
			Total volume: 12,090 m ³
Bulk sampling		<input checked="" type="radio"/> No <input type="radio"/> Yes	Amount/year: 0 tonnes
Explosives		<input checked="" type="radio"/> No <input type="radio"/> Yes	Total amount: 0 kg
			Max. in 30 days: 0 kg
EXPLORATION DRILLING			
TYPE	NUMBER OF HOLES	DEPTH (m)	
Reverse Circulation	1500 max	375000 total	
Diamond	1500 max	375000 total	
Select Type			

**MINING LAND USE
APPROVAL
Class 4**

FUEL STORAGE		
FUEL TYPE	STORAGE TYPE & CAPACITY	TOTAL VOLUME
Diesel		60,000L
Gasoline		32,000L
Propane		24,000L
Jet A		32,000L
Jet B		32,000L
Oil		1,000L
FACILITIES & STRUCTURES		
Camp structures: 24 Atco Trailers (12' by 56'), Existing administrative/office building		
Number of persons in camp at any one time: 120	Number of person days: 43,800	
Construction of underground structures		<input checked="" type="radio"/> No <input type="radio"/> Yes
Amount per year: 0	Amount per program: 0	

All other applicable legislation, regulations, laws, by-laws and ordinances must be complied with. Additional authorizations or approvals may be required. Any doubt as to whether an additional authorization or approval is required should be verified by a duly authorized official at the appropriate government body or bodies.

MINING LAND USE APPROVAL Class 4

**MINING LAND USE
APPROVAL
Class 4**

DEFINITIONS

“**Act**” means the Quartz Mining Act, S.Y. 2003, c.14;

“**Access road**” means a road that provides access to a public highway or to a private road;

“**Adverse effects**” of an exploration program means its adverse environmental or socio-economic effects and any adverse effects it may have on the existing or asserted aboriginal or treaty rights of any First Nation;

“**Chief**” means the Chief of Mining Land Use designated pursuant to the Act;

“**Clearing**” means an area that is cleared of trees, brush or vegetative mat for the purpose of establishing a campsite or carrying out mining exploration, but does not include an area cleared for the purpose of establishing a corridor or trail;

“**Corridor**” means a path from which trees and brush have been cut to accommodate a water line, fuel line or power line;

“**Effective date**” means the date this Approval comes into force as evidence by the date of the signature of the Chief;

“**Exploration program**” means any activity or group of activities undertaken for the sole or principal purpose of assessing land for its suitability for the production of minerals;

“**Foundation**” means the part of a structure that penetrates the ground and supports the structure;

“**Isolated road**” means a road that does not provide access to a public highway directly or through a private road;

“**Inspector**” means an inspector designated pursuant to the Act;

“**Line**” means a line cut for the purpose of carrying out a geophysical, geological, or engineering survey;

“**Low ground pressure vehicle**” means a vehicle that applies 35 kPa of pressure or less to the ground surface;

“**Operator**” means a person who is engaging in an exploration program, or in development or production;

“**Person-day**” in respect of the use of a campsite, means the use of the campsite by one person during a period of 24 hours;

“**Response**” means a notice given by the Chief that indicates whether or not an exploration program may be carried out or that extends the time for the Chief’s review of a Notification or operating plan;

“**Road**” means a pathway for vehicular traffic the construction of which requires the movement of rock or earth;

“**Site**” means the area bounded by the sum of the mineral claims described above under ‘Scope of Approval’;

“**Summer**” means the period of a year that is not winter;

“**Trail**” means an access to a site within a claim or lease that is constructed with little or no movement of rock or earth; and

**MINING LAND USE
APPROVAL
Class 4**

“Trenching” means excavation carried out on a mineral claim for the purpose of obtaining geological information;

“Upgrading”, in relation to a road, means re-establishing a road that has not been useable for more than five years by vehicles of a type the road was originally designed to serve, modifying a road to provide usability for vehicles that are of a different type than those for which the road was originally designed to serve and any other upgrading or modifying of a road, other than for maintenance or erosion control;

“Vegetative mat” means the organic surface of soil, characterized by the accumulation of organic matter, or partly decomposed organic matter, derived mainly from leaves, twigs, and woody materials, and includes the root mass of living vegetation;

“Winter” means the period of the year during which (a) the ground is frozen sufficiently to support a vehicle, other than a low ground pressure vehicle, without rutting or gouging of the surface; and (b) there is a sufficient amount of snow on the ground to produce a packed base of 10 cm.

PART ONE – GENERAL REQUIREMENTS

Duration of Approval

- 1.0 This approval is valid upon signature of the Chief until the expiry date. In the event that claims lapse, or that agreements to operate on claims are dissolved, the approval becomes null and void for that portion of the operating plan, where there is no right to the minerals.
- 1.1 All outstanding reclamation continues to be the responsibility of the operator.

Compliance with Operating Conditions

- 1.2 All mineral exploration activities must comply with the Operating Conditions contained in Schedule 1 of the *Quartz Mining Land Use Regulation* and within the approval. Where there is a difference between the operating conditions and approval, the terms of this approval shall prevail. These Operating Conditions are enforceable.

Reporting Requirements

Contact Information

- 1.3 Submissions and reports to the Chief should be made to both the following addresses:

Chief, Mining Land Use
Box 2703, K-9
Whitehorse, Yukon
Y1A 2C6

Mining Lands Officer
Box 249
Dawson City, YT Y0B 1G0
dawson.mining@yukon.ca

- 1.4 The contact for the operator will be:

Golden Predator Exploration LTD.
250-200 Burrard Street
Vancouver BC V6C 3L6
Canada

Pre-season and Post-season Reporting

- 1.5 A pre-season report shall be submitted to the Chief of Mining Land Use and affected First Nations no later than March 31st outlining the exploration activities planned for the season including the proposed locations. This report shall include but is not limited to:
- a) detailed mapping of all areas worked;
 - b) location of new construction;
 - c) new areas of disturbance;
 - d) map data, in the form of SHP files or GIS compatible, of all new roads and trails;
 - e) map data, in the form of SHP files or GIS compatible, of all reclaimed roads and trails;

- f) areas of permafrost encountered;
 - g) total disturbed area;
 - h) pre-activity survey results, if applicable;
 - i) reclamation activities; and
 - j) documentation produced by environmental monitors.
- 1.6 A post-season report shall be submitted to the Chief of Mining Land Use and affected First Nations no later than December 31st indicating exploration activities completed during that season. This report shall include but is not limited to:
- a) detailed mapping of all areas worked;
 - b) location of new construction;
 - c) new areas of disturbance;
 - d) map data, in the form of SHP files or GIS compatible, of all new roads and trails;
 - e) map data, in the form of SHP files or GIS compatible, of all reclaimed roads and trails;
 - f) areas of permafrost encountered;
 - g) total disturbed area;
 - h) pre-activity survey results, if applicable;
 - i) reclamation activities; and
 - j) documentation produced by environmental monitors.
- 1.7 The operator shall contact the Klondike Mining Inspections Office (Compliance, Monitoring and Inspections) at (867) 993-7300 at least 14 days prior to commencing the field season.
- 1.8 The operator shall contact the Klondike Mining Inspections Office (Compliance, Monitoring and Inspections) at (867) 993-7300 at least 14 days prior to leaving the site at the end of the operation.

Spill Reporting

- 1.9 All spills must be reported immediately to the 24-Hour Yukon Spill Reporting Line (867) 667-7244 and to the Klondike Mining Inspections Office (Compliance, Monitoring and Inspections) at (867) 993-7300.
- 1.10 An operator who takes an emergency remedial measure shall, as soon as possible but not later than 10 days after taking it, send a written report to the Chief describing the duration, nature and extent of the emergency and the measures taken to respond to it.

Heritage Reporting

- 1.11 All paleontological resources uncovered during operations shall be reported to the Yukon Paleontology Program, Government of Yukon in Whitehorse at (867) 667-8089 or (867) 667-5386 and the Chief.

- 1.12 All archaeological resources uncovered during operations shall be reported to the Yukon Archaeology Program, Government of Yukon in Whitehorse at (867) 667-3771 or (867) 667-5386 and the Chief.
- 1.13 The proponent shall complete a heritage resource overview assessment of the proposed new road network prior to undertaking ground-altering activities.
- 1.14 The proponent shall complete a heritage resources inventory and assessment of Sleeman and Classic target areas before initiating road construction, drill pad construction (where mechanical leveling is required) and trenching.
- 1.15 The report(s) developed for Section 1.13 – 1.14, shall be submitted to Government of Yukon – Mining Lands, Mineral Resources Branch and the Heritage Resources Unit, Cultural Services Branch.

Wildlife Reporting

- 1.16 All incidents with wildlife shall be reported to the District Conservation Officer in Dawson (Northern Region) at (867) 993-5492.
- 1.17 The proponent shall maintain a detailed wildlife log for submission to the District Conservation Officer each year.

PART TWO – PROJECT SPECIFIC OPERATING CONDITIONS

Schedule 1 Operating Conditions (Appendix B)

The operator is bound by the Schedule 1 Operating Conditions per the *Quartz Mining Land Use Regulation*. In addition to the Schedule 1 Operating Conditions, the operator must also comply with the following terms and conditions:

Erosion Control and Permafrost

- 2.0 The operator shall insulate the ground surface beneath all temporary structures and temporary facilities used in the project where permafrost is present to:
 - a) prevent any vegetation from being removed; and
 - b) prevent the ground from settling or eroding.
- 2.1 In the event of slope failure or the indication that slope failure might occur, EMR – Client Services and Inspections, shall be notified immediately.
- 2.2 In areas where continuous or discontinuous permafrost is present, the Operator must conduct the exploration program as follows:
 - a) Whenever reasonable, permafrost should be avoided such that, to the extent practicable, the Operator must relocate proposed trenches if permafrost is encountered;
 - b) If permafrost is encountered and cannot reasonably be avoided, the vegetative mat should be maintained where possible and insulated with granular material or geotextiles;
 - c) Areas of disturbed permafrost should be re-vegetated as soon as practicable, particularly in areas where runoff could impact water bodies;
 - d) Sediment fences and other erosion methods should be used to control runoff and reduce sedimentation into nearby water courses. Sediment control techniques should be progressively applied when required.

Trenching

- 2.3 Open trenches shall be sloped at one end to avoid entrapment of wildlife.
- 2.4 The operator must ensure that all employees and contractors working at the trench sites are aware of the operating conditions for trenching.
- 2.5 Trenches and ditches should be oriented horizontally across the slope of the ground to facilitate reclamation and reduce risks of effluent discharges due to erosion of disturbed areas.
- 2.6 Sampling trenches shall occur either at a rate in which will not be left exposed for periods of more than a few days, be reduced in length and backfilled prior to excavating the next

trench, or staked flagging shall be installed identifying the presence of an un-natural obstacle.

Waste Management

- 2.7 The operator shall keep all garbage, including kitchen waste, in a container that prevents access by bears and other wildlife, until properly disposed of in accordance with the *Solid Waste Regulations*.
- 2.8 When burning kitchen waste on site it must be burned regularly to reduce odours that might attract wildlife and be burned to ash by forced air or fuel fired incineration.
- 2.9 The operator shall contact the local municipal solid waste facility prior to usage to ensure proper governance of waste.
- 2.10 The proponent shall ensure that only personnel trained in the manufacturer's operating specifications shall operate the forced air, fuel fired incinerator.
- 2.11 The proponent shall surround all storage, burial or burning areas of organic waste with an electric fence.
- 2.12 Prior to commencing any burning operations, a Burning Permit must be obtained from the Fire Management Office in Dawson at (867) 993-7300, as well as any other communications regarding wildfire management.

Petroleum Fuel and Hazardous Substances

- 2.13 The operator shall, with indelible marker or paint, clearly identify the owner, the contents and the date on fuel drums to establish and manage ownership and responsibility.
- 2.14 All fuel cache(s) must be protected with an earthen berm or suitable barrier and flagged to prevent spills resulting from accidental contact with heavy equipment. Flags should be visible above the snow pack.
- 2.15 The location of any spills shall be clearly marked until cleanup has taken place. Location markings shall not be removed until directed in writing by an Inspector.
- 2.16 Routine maintenance areas where heavy equipment is serviced or repaired should be inspected regularly for minor spills and stored waste hydrocarbons.
- 2.17 Any contaminated soils should be excavated and contained for eventual land farm treatment at an approved facility.

Development Activities

- 2.18 The following pre-production development activities have been authorized,

- a) Construction of an access road along the Eastern side of the existing heap leaching, as per operating plan submitted on June 21, 2012 by Mike Malowski;
- b) Upgrading of the existing access road on the Western side of the existing heap leach pad and,
- c) Removal of soil from the former ADR plant and assay laboratory sites.

Access Roads and Trails

- 2.19 Any obstructions caused by activities on trails used by trappers along the access routes shall be remediated by slashing any and all trees that may fall across these paths or trails and by removing any other obstructions that may be pushed across the trails.
- 2.20 Plans for road construction and operation shall be submitted to the regulator for review and approval prior to road construction. The Chief may require any additional information that he/she considers necessary. The approved plan will be incorporated as a condition of approvals LQ00364 and LQ00364a.
- 2.21 The plans for road construction will include methods for construction, operation procedures, maintenance, water management methods, security measures, and final decommissioning of all new roads.
- 2.22 The plans for road construction will include methods for construction, maintenance, security measures, and final decommissioning of all new trails.
- 2.23 The proponent shall advise the public that unauthorized use is prohibited on new roads and trails by providing signage that denies usage to the public.

Drilling

- 2.24 The operator must ensure that all employees and contractors working at the drill sites are aware of the operating conditions for drilling.
- 2.25 All drill sumps must be backfilled and any removed vegetative mat replaced in such a manner that drill cuttings and drill byproducts are contained underground and the site left in a stable condition suitable for natural revegetation or reclamation.

Wildlife

- 2.26 The proponent shall equip camps with bear deterrent devices and maintain such devices in good working order throughout the duration of camp operation.
- 2.27 Should conditions warrant, an electric fence shall be set up around the perimeter of camp, so as to reduce bear-worker confrontations. Warranted conditions shall be developed in consultation with the regional biologist and Conservation Officer and include consideration of site-specific bear activity information

- 2.28 All means by which water is withdrawn must be screened or otherwise guarded to prevent the passage of fish from these waters.
- 2.29 The screen must be kept in a good and efficient state of repair. It must not be removed except for renewal or repair. No water is to be withdrawn during any period when the screen is removed.

Reclamation

- 2.30 A Reclamation and Closure Plan shall be submitted to the Chief for review and approval within 60 days of issuance of this approval.
- 2.31 The Chief may require any additional information that he/she considers necessary. The approved plan will be incorporated as a condition of approvals LQ00364 and LQ00364a.
- 2.32 The proponent must undertake reclamation at the site in accordance to the Reclamation and Closure Plan.
- 2.33 The proponent shall implement progressive reclamation of trails, roads and other clearings that are no longer required for exploration/operational purposes.
- 2.34 Final reclamation will occur prior to the expiry of the operation, according to standards outlined in the operating conditions for re-establishment of vegetative mat and erosion control.

PART THREE – RECLAMATION AND/OR DECOMMISSIONING

- 3.0 Reclamation and/or decommissioning shall be progressive in nature where possible and will occur prior to the expiry of the exploration program or prior to the expiry of this approval, whichever comes first, according to standards outlined in the operating conditions, unless otherwise specified by the Chief.
- 3.1 Debris, equipment, fuel barrels, scrap metal and other waste at the work site shall be completely disposed of, so as not to attract wildlife, by removal to an authorized disposal site at the cessation of the exploration program or prior to the expiry of the approval, whichever comes first.
- 3.2 Structures must be removed and the site restored at the end of the exploration program or prior to the expiry of this approval, whichever comes first, to a level of utility comparable to its previous level of utility.
- 3.3 If an amendment to this approval or new approval is granted, for the claims within the scope of this approval (Appendix A), all outstanding reclamation continues to be the responsibility of the operator.

PART FOUR – OTHER MATTERS

- 4.0 Security may be required at any time by the Chief.
- 4.1 The security will be determined by the Chief upon review and approval of the Reclamation and Closure plan.
- 4.2 Security must be paid within thirty (30) days of receiving the written notice from the Chief.
- 4.3 Adjustments to the initial security may be required at any time by the Chief.
- 4.4 Security will be retained as per Section 139 of the Quartz Mining Act and section 18 of the Quartz Mining Land Use Regulation.
- 4.5 Notice of Schedule III must be provided to the Yukon Water Board ten (10) days prior to use of water.

APPENDIX B

Quartz Mining Land Use Regulation

Schedule 1 **Operating Conditions**

Removal of the Vegetative Mat

1. If the vegetative mat must be removed to carry out exploration activities, it must be removed so as to protect the seed and root stock contained within the mat and be stored separately from other overburden or bedrock removed for use in re-establishing the vegetative mat when the exploration program ceases.

Re-establishment of the Vegetative Mat

2. (1) All vegetated areas disturbed by exploration activities, including fuel and waste storage areas, clearings, corridors, temporary trails, camps and supporting infrastructure, and trenches and drill sites, must be left in a condition conducive to re-vegetation by native plant species or other species adaptable to the local environment to encourage re-vegetation comparable to similar, naturally occurring, environments in the area.

(2) Conditions conducive to re-vegetation include provision of adequate soil layer with moisture retaining ability, no soil contamination by hydrocarbons or other hazardous substances, provision of adequate seed or root stock, and contoured or otherwise stable slopes.

3. If adequate seed or root stock is not naturally available, re-seeding or transplanting of vegetation is required. Only non-invasive species may be used for re-seeding or transplanting. Consult with the Mining Inspector prior to seeding.

Erosion Control and Permafrost

4. All areas disturbed during an exploration program must be re-sloped, contoured or otherwise stabilized to prevent long-term soil erosion, slumping and subsidence.
5. All exploration activities must be carried out to avoid or minimize damage to and loss of permafrost.

Trenching

6. Trenching carried out by hand or using hand-held tools must be methodical. All trenches must be stabilized and marked to minimize risk to the public.
7. Trenches constructed with mechanized equipment must be back filled by first depositing any removed overburden and bedrock and then replacing the vegetative mat that was removed to construct the trench.

Historic Objects and Burial Grounds

8. Exploration activities must not be carried out within 30m of a known archeological site unless the Chief indicates, in writing, that such activities may be carried out.
9. Any sites containing archeological objects, paleontological objects or human remains or burial sites discovered in the course of carrying out an exploration program must be immediately marked and protected from further disturbance and, as soon as practicable, the discovery reported to the Chief. No further activities may be carried out within 30m of the site until the Chief indicates, in writing, that activities may be resumed.

Solid Waste

10. All solid waste, including debris, equipment, barrels, drums, and scrap metal, must be safely stored on the site of the exploration program while the program is carried out and must be disposed of in accordance with the *Solid Waste Regulation* when the program ceases.
11. Camps must be kept clean and tidy.

Petroleum Fuel and Hazardous Substances

12. If petroleum fuel storage capacity exceeds 4000 L, a secondary containment structure must be constructed. The containment structure must be made of a material impervious to petroleum products and:
 - a) if there is a single storage tank, be of sufficient size to accommodate at least 110% of the capacity of the storage tank; or
 - b) if there is more than one storage tank, be of sufficient size to accommodate 110% of the capacity of the largest storage tank or 10% of the total capacity of all the tanks, whichever is larger.
13. All petroleum products, including waste petroleum products, and any other hazardous substances must be stored in a secure fashion no less than 30m from the ordinary high water mark of any water body.
14. All petroleum products, including waste petroleum products, and any other hazardous substance, must be transferred and handled without spillage.
15. All petroleum products and any other hazardous substances must be removed from the site of the exploration program when the program ceases.
16. All waste petroleum products and any other special waste, as defined in the *Special Waste Regulations*, generated in the course of carrying out the exploration program must be disposed of in accordance with the *Special Waste Regulations* when the program ceases.

Spills and Spill Contingency Plans

17. A spill contingency plan for petroleum products and other hazardous waste must be prepared and posted in the camp and at all fuel handling locations used in carrying out the exploration program.
18. All spill clean-up equipment and material must be maintained in a state of readiness sufficient at all times to contain and clean-up any hazardous material spills.
19. If a spill occurs, the spill contingency plan must be immediately implemented and notice given to the 24-hour Yukon Spill Report Line. As soon as practicable, an inspector must be contacted. Whatever remedial action is required to clean-up the spill and reclaim the affected land and water must be taken.

Use of Vehicles

20. Vehicles must be maintained and operated to prevent spills of fuel, lubricants, coolants and oil.

Timber and Brush

21. Cut brush must not be piled so that it blocks movement of wildlife or people.
22. Leaning trees created by cutting of lines, corridors, temporary trails, and clearings must be felled.
23. When it is economically viable to do so, timber suitable for sale must be salvaged and stockpiled.
24. All risk of fire hazard must be avoided.

Drilling

25. All reasonable efforts must be made when drilling to minimize the impact on wildlife and the public.
26. Vegetation other than that within a drill sump, must not be covered with drill cuttings.
27. Core must be stored in a stable fashion.
28. Drill mud must be re-circulated when possible.
29. All drill fluids must be contained in a sump.
30. Drill holes that pose a hazard or that lead to ground water must be plugged to prevent flow of water to the surface.
31. The location of drill holes must be marked on the ground by flagging or other suitable

means at the location of the drill hole.

32. Drilling waste, including fluid, cuttings and mud must not be left within 30m of a water body.

Roads, Trails, and Off-road Trail Use

33. All vehicles must be operated to avoid rutting and gouging of roads and trails.
34. Off road and trail routes must be reconnoitered and must be used in a way that minimizes ground disturbance, including damage to permafrost and sensitive wildlife habitat.
35. If rutting, gouging, ponding or permafrost degradation occurs off road or trail, vehicle use must be suspended or relocated to ground that is capable of bearing the weight of the vehicle without causing such damage.
36. Use of skids on permafrost or wet ground is only permitted outside of winter where it is not reasonable to use any other means of transporting equipment.
37. Routes for temporary trails must be reconnoitered and flagged.
38. In addition to any remedial action required in relation to item 2 of this schedule, temporary trails must be blocked to prevent further vehicular access.

Release of Sediment

39. All reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law.

Use of Explosives

40. Explosives must be set off in a manner to minimize impact on wildlife and the public to ensure that forest fires, unplanned landslides, or artificial damming of water bodies does not occur.

Waste Rock

41. Waste rock piles must be located at least 30m from any water body and be physically stable.
42. Waste rock containing sulfides must be returned underground.
43. Access to underground openings must be blocked to prevent access by wildlife and people.

Operational Guidelines

Exploration activities

The Yukon Chamber of Mines has developed an informative Best Management Practices document that should be reviewed in the context of project activities. The operator should reference the following document when planning and conducting project activities:

- Yukon Mineral and Coal Exploration Best Management Practices and Regulatory Guide (<https://www.yukonminers.org/index.php/all-docs/guidebooks/3-yukon-mineral-and-coal-exploration-best-management-practices-and-regulatory-guide/file>).

Bears and other wildlife

To increase worker safety, reduce potential conflicts and prevent unnecessary wildlife mortality, the operator should implement pertinent components of:

- Guidelines for Industrial Activity in Bear Country for the Mineral Exploration, Placer Mining and Oil & Gas Industries (<https://yukon.ca/sites/yukon.ca/files/env/env-guidelines-industrial-activity-bear-country.pdf>).
- If an electric fence is an appropriate precaution, or a requirement, the operator should reference the following comprehensive and highly informative guide: Reducing Wildlife Conflict with Electric Fencing: A Beginner's Guide (https://yukon.ca/sites/yukon.ca/files/env/env-electric-fencing_en.pdf).

Invasive species

To minimize the risk and consequences of spreading invasive plant species the operator should:

- Become familiar with the Yukon invasive species and how to manage them by referring to the Yukon Invasive Species Council document, "Why Should I Care About Invasive Species" (<https://www.yukoninvasives.com/index.php/en/resources/brochures/31-why-should-i-care-about-invasive-species/file>).

Heritage Resources

To better understand how to manage potential impacts to heritage resources, the operator should refer to the following document(s):

- Mineral Exploration Best Management Practices for Heritage Resources (http://www.tc.gov.yk.ca/pdf/Mineral_Exploration_BMP_for_Heritage_Resources.pdf).
- Best Management Practices for Burial Sites and Human Remains in Yukon (http://www.tc.gov.yk.ca/pdf/BurialSites_BMP_2014.pdf).

Work in/near water

Project activities have the potential to affect water quantity, quality and/or rate of flow. The operator should provide for the protection of water by applying practices described in:

- Best Management Practices for Works Affecting Water in Yukon (<https://yukon.ca/sites/yukon.ca/files/env/env-preferred-practices-works-affecting-yukon-waters.pdf>).

Aircraft use

Project activities are authorized in an area known to be inhabited by sheep and/or caribou. The operator and/or aircraft pilots should plan flight paths and protocols based on the published guideline(s):

- Flying in Sheep Country: How to Minimize Disturbance from Aircraft (<https://yukon.ca/sites/yukon.ca/files/env/env-flying-sheep-country.pdf>).
- Flying in Caribou Country: How to Minimize Disturbance from Aircraft (<https://yukon.ca/sites/yukon.ca/files/env/env-flying-caribou-country.pdf>).
