Mining Lands

November 16, 2016

File No: **LQ00444**

ATAC Resources Ltd.
1016-510 West Hastings Street
Vancouver, BC
V6B 1L8

Dear Sir/Madam:

Re: Class 4 Quartz Mining Land Use Approval

Your application for a Class 4 approval has been approved:

- As submitted.
- Subject to the attached conditions.
- Subject to security deposit to be received following cost analysis.

The effective date of this approval will be November 16, 2016. All work, including restoration, must be completed by November 15, 2026, and inspected before full security and/or completion certificates can be applied for.

A security deposit is a condition of this Class 4 approval and will be determined following a cost assessment and analysis of Reclamation and Closure Plan.

The attached 'Operational Guidelines' offer additional mitigations that would enable you to maximize the environmental performance of your program.

Please feel free to contact our office at (867) 996-2256 should you have any questions.

Sincerely,

Derek Fraser
A/Chief, Mining Land Use

cc: EMR Natural Resources Officer, Compliance Monitoring and Inspections
ENV Environmental Affairs, Environmental Protection Branch

**MINING LANDS
MINERAL RESOURCES BRANCH
GOVERNMENT OF YUKON**

**ATAC Resources Ltd.
1016-510 West Hastings Street
Vancouver, BC
V6B 1L8**

Pursuant to the *Quartz Mining Act* and Quartz Mining Land Use Regulation, the Chief, Mining Land Use hereby grants a Class 4 Approval:

APPROVAL NUMBER: LQ00444

PROPERTY NAME: Rackla Gold Property

UNDERTAKING: Quartz

CLASS: Class 4 Approval

EFFECTIVE DATE: November 16, 2016

EXPIRY DATE: November 15, 2026

This approval shall be subject to the restrictions and conditions contained herein and to the restrictions and conditions contained in the *Quartz Mining Act* and the Quartz Mining Land Use Regulation made there under as proposed in Mining Land Use Application LQ00444.

Dated this 16th of November, 2016

Derek Fraser
A/Chief, Mining Land Use

**MINING LAND USE
APPROVAL
Class 4
LQ00444
ATAC Resources Ltd.**

SCOPE OF APPROVAL: See Attached Claim Status Report – Appendix C
See attached Exploration Activity Report – Appendix A

NTS: 106B04, 106C01-106C08, 106D01, Rackla Gold Property

Definitions

“**Act**” means the *Quartz Mining Act*, SY 2003, c.14; amended by SY 2008, c.19; SY 2013, c.18;

“**Operator**” means a person who is engaging in an exploration program;

“**Chief**” means the Chief of Mining Land Use designated pursuant to the Act;

“**Effective date**” means the date this Approval comes into force as evidenced by the date of the signature of the Chief;

“**Site**” means the area bounded by the sum of the mineral claims described above under ‘Scope of Approval’;

“**Inspector**” means an inspector designated pursuant to the Act;

“**Corridor**” means a path from which trees and brush have been cut to accommodate a water line, fuel line or power line;

“**Access road**” means a road that provides access to a public highway or to a private road

“**Isolated road**” means a road that does not provide access to a public highway directly or through a private road;

“**Road**” means a pathway for vehicular traffic the construction of which requires the movement of rock or earth;

“**Trail**” means an access to a site within a claim or lease that is constructed with little or no movement of rock or earth; and

“**Upgrading**” in relation to a road, means re-establishing a road that has not been useable for more than five years by vehicles of a type the road was originally designed to serve, modifying a road to provide usability for vehicles that are of a different type than those for which the road was originally designed to serve and any other upgrading or modifying of a road, other than for maintenance or erosion control.

PART ONE – GENERAL REQUIREMENTS

Duration of Approval

1. This Approval is valid upon signature of the Chief until the expiry date. In the event that claims lapse, or that agreements to operate on claims are dissolved, the Approval becomes null and void for that portion of the operating plan, where there is no right to the minerals.
2. All outstanding reclamation continues to be the responsibility of the operator.

Compliance with Operating Conditions

3. All mineral exploration activities must comply with the *Operating Conditions* (appended) contained in Schedule 1 of the Quartz Mining Land Use Regulation. These Operating Conditions are enforceable.

PART TWO: Reporting Requirements

Contact Information/Planning and Communication

4. Submissions and reports to the Chief should be made to both the following addresses:

Chief, Mining Land Use	Mining Lands Officer
Box 2703, K-09	Box 10, K-MA
Whitehorse, Yukon Y1A 2C6	Mayo, Yukon Y0B 1M0
	<u>Mayo.mining@gov.yk.ca</u>
5. The contact for the Operator will be:

ATAC Resources Ltd.
1016-510 West Hastings
Vancouver, BC V6B 1L8
6. All spills must be reported immediately to the 24-Hour Yukon Spill Reporting Line (867)667-7244 and to the Mining Inspections Division Mayo (867) 996-2568.
7. An operator who takes an emergency remedial measure shall, as soon as possible but not later than 10 days after taking it, send a written report to the Chief describing the duration, nature and extent of the emergency and the measures taken to respond to it.
8. A report shall be submitted at the beginning of each mining season outlining the exploration activities planned for the season including the proposed locations.
9. A report shall be submitted at the end of each mining season indicating exploration activities completed during that season. This report shall include but not be limited to:
 - detailed mapping of all areas worked;
 - location of new construction;
 - new areas of disturbance;
 - map data, in the form of SHP files or GIS compatible, of all new roads and trails;
 - map data, in the form of SHP files or GIS compatible, of all reclaimed roads and trails;
 - areas of permafrost encountered;
 - total disturbed area;
 - pre-activity survey results;
 - reclamation activities and,
 - documentation produced by environmental monitors.

10. The operator shall contact Mining Inspections at Mayo (867) 996-2568 at least 14 days prior to commencing the field season.
11. The operator shall contact Mining Inspections at Mayo (867) 996-2568 at least 14 days prior to leaving the site at the end of the exploration program.

Heritage

12. All palaeontological resources uncovered during operations shall be reported to the Yukon Palaeontology Program, Government of Yukon in Whitehorse at (867) 667-8089 or (867) 667-5386.
13. The report(s) developed for Part 3, Term 10, shall be submitted to Government of Yukon – Mining Lands, Mineral Resources Branch and the Heritage Resources Unit, Cultural Services Branch.
14. All archaeological resources uncovered during operations shall be reported to the Yukon Archaeology Program, Government of Yukon in Whitehorse at (867) 667-3771 or (867) 667-5386.

Wildlife

15. All incidents with wildlife shall be reported to the District Conservation Officer in Mayo (Northern Tutchone Region) at (867)996-2202, as well as any other communication regarding wildlife.
16. The operator shall maintain a detailed wildlife log for submission to the Chief, Mining Lands each year.

PART THREE – TERMS AND CONDITIONS

Other Resource Users

1. The operator shall communicate plans and timing of activities to other land and resource users that may be affected by the proposed project (e.g. trappers, outfitter, First Nations) as soon as practicable and prior to the commencement of project activities to identify and resolve potential land use conflicts and any potential negative effects on other users.
2. The operator shall, to the extent practicable, avoid activities in areas utilized by area outfitters during the active hunting season (August 1st to October 31st).

Removal of the Vegetative Mat

3. If the vegetative mat must be removed to carry out exploration activities, it must be removed so as to protect the seed and root stock contained within the mat and be stored separately from other overburden or bedrock removed for use in re-establishing the vegetative mat when the exploration program ceases.

Re-establishment of the Vegetative Mat

4. All vegetated areas disturbed by exploration activities, including fuel and waste storage areas, clearings, corridors, temporary trails, camps and supporting infrastructure, and trenches and drill sites, must be left in a condition conducive to re-vegetation by native plant species or other species adaptable to the local environment to encourage re-vegetation comparable to similar, naturally occurring, environments in the area.
5. Conditions conducive to re-vegetation include provision of adequate soil layer with moisture retaining ability, no soil contamination by hydrocarbons or other hazardous substances, provision of adequate seed or root stock, and contoured or otherwise stable slopes.
6. If adequate seed or root stock is not naturally available, re-seeding or transplanting of vegetation is required. Only non-invasive species may be used for re-seeding or transplanting. Consult with the Mining Inspector prior to seeding.

Erosion Control and Permafrost

7. All areas disturbed during an exploration program must be re-sloped, contoured or otherwise stabilized to prevent long-term soil erosion, slumping and subsidence.
8. All exploration activities must be carried out to avoid or minimize damage to and loss of permafrost.
9. The operator shall insulate the ground surface beneath all temporary structures and temporary facilities used in the project where permafrost is present to:
 - a) Prevent any vegetation from being removed, and
 - b) Prevent the ground from settling or eroding

Historic Objects and Burial Grounds

10. The operator shall complete a Heritage Resources Impact Assessment in advance of ground disturbing activities in areas that have elevated potential for the presence of archaeological or heritage resources.
11. Exploration activities must not be carried out within 30m of a known archeological site unless the Chief indicates, in writing, that such activities may be carried out.
12. Any sites containing archeological objects, palaeontological objects or human remains or burial sites discovered in the course of carrying out an exploration program must be immediately marked and protected from further disturbance and, as soon as practicable, the discovery reported to the Chief. No further activities may be carried out within 30m of the site until the Chief indicates, in writing, that activities may be resumed.
13. Exploration activities must not be carried out within 30m of a known archeological site unless the Chief indicates, in writing, that such activities may be carried out.

14. Any sites containing archeological objects, palaeontological objects or human remains or burial sites discovered in the course of carrying out an exploration program must be immediately marked and protected from further disturbance and, as soon as practicable, the discovery reported to the Chief. No further activities may be carried out within 30m of the site until the Chief indicates, in writing, that activities may be resumed.

Disposal of Wastes/Cleanliness

15. All solid waste, including debris, equipment, barrels, drums, and scrap metal, must be safely stored on the site of the exploration program while the program is carried out and must be disposed of in accordance with the Solid Waste Regulations when the program ceases.
16. Camps must be kept clean and tidy.
17. The operator shall keep all garbage, including kitchen waste, in a container that prevents access by bears and other wildlife, until properly disposed of in accordance with the Solid Waste Regulations.
18. When burning kitchen waste on site it must be burned regularly to reduce odours that might attract wildlife and be burned to ash by forced air or fuel fired incineration.

Fuel and Chemical Storage and Handling

19. If petroleum fuel storage capacity exceeds 4000L, a secondary containment structure must be constructed. The containment structure must be made of a material impervious to petroleum products and:
 - a) if there is a single storage tank, be of sufficient size to accommodate at least 110% of the capacity of the storage tank; or
 - b) if there is more than one storage tank, be of sufficient size to accommodate 110% of the capacity of the largest storage tank or 10% of the total capacity of all the tanks, whichever is larger.
20. All petroleum products, including waste petroleum products, and any other hazardous substances must be stored in a secure fashion no less than 30m from the ordinary high water mark of any water body.
21. Any fuel cache(s) must be protected with an earthen berm and flagged to prevent spills resulting from accidental contact with heavy equipment. Flags should be visible above the snow pack.
22. All petroleum products, including waste petroleum products, and any other hazardous substance, must be transferred and handled without spillage.
23. All waste petroleum products and any other special waste, as defined in the Special Waste Regulation, generated in the course of carrying out the explorations must be disposed of in accordance with the Special Waste Regulation when the program ceases.

24. The operator shall clearly identify the owner, the contents and the date on fuel drums to establish and manage ownership and responsibility.

Spills and Spill Contingency Plans

25. A spill contingency plan for petroleum products and other hazardous waste must be prepared and posted in the camp and at all fuel handling locations used in carrying out the exploration program.
26. All spill clean-up equipment and material must be maintained in a state of readiness sufficient at all times to contain and clean-up any hazardous material spills.
27. If a spill occurs, the spill contingency plan must be immediately implemented and notice given to the 24-hour Yukon Spill Report Line. As soon as practicable, an inspector must be contacted. Whatever remedial action is required to clean-up the spill and reclaim the affected land and water must be taken.
28. The location of any spills shall be clearly marked with stakes or flags.

Use of Vehicles

29. Vehicles must be maintained and operated to prevent spills of fuel, lubricants, coolants and oil.
30. The operator shall ensure equipment is free of foreign soil and plant material prior to moving it to the Project site.

Timber and Brush

31. Cut brush must not be piled so that it blocks movement of wildlife or people.
32. Leaning trees created by cutting of lines, corridors, temporary trails, and clearings must be felled.
33. When it is economically viable to do so, timber suitable for sale must be salvaged and stock piled.
34. All risk of fire hazard must be avoided.

Trenching

35. Trenching carried out by hand or using hand-held tools must be methodical.
36. All trenches must be stabilized and marked to minimize risk to the public.
37. Open trenches shall be sloped at one end to avoid entrapment of wildlife.

38. Trenches constructed with mechanized equipment must be back filled by first depositing any removed overburden and bedrock and then replacing the vegetative mat that was removed to construct the trench.

39. The operator must ensure that all employees and contractors working at the trench sites are aware of the operating conditions for trenching.

Drilling

40. All reasonable efforts must be made when drilling to minimize the impact on wildlife and the public.

41. Vegetation other than that within a drill sump, must not be covered with drill cuttings

42. Core must be stored in a stable fashion.

43. Drill mud must be re-circulated when possible.

44. All drill fluids must be contained in a sump.

45. All drill holes that pose a hazard or that lead to ground water must be plugged in a suitable manner.

46. The location of drill holes must be marked on the ground by flagging or other suitable means at the location of the drill hole.

47. Drilling waste, including fluid, cuttings and mud must not be left within 30m of a water body.

48. The operator must ensure that all employees and contractors working at the drill sites are aware of the operating conditions for drilling.

Waste Rock

49. Waste rock piles must be located at least 30m from any water body and be physically stable.

50. Waste rock containing sulfides must be returned underground.

51. Access to underground openings must be blocked to prevent access by wildlife and people.

Use of Explosives

52. Explosives must be set off in a manner to minimize impact on wildlife and the public to ensure that forest fires, unplanned landslides, or artificial damming of water bodies does not occur.

Roads, Trails, and Off-road Trail Use

53. All vehicles must be operated to avoid rutting and gouging of roads and trails.

54. Off road and trail routes must be reconnoitered and must be used in a way that minimizes ground disturbance, including damage to permafrost and sensitive wildlife habitat.
55. If rutting, gouging, ponding or permafrost degradation occurs off road or trail, vehicle use must be suspended or relocated to ground that is capable of bearing the weight of the vehicle without causing such damage.
56. Use of skids on permafrost or wet ground is only permitted outside of winter where it is not reasonable to use any other means of transporting equipment.
57. Routes for temporary trails must be reconnoitered and flagged.
58. In addition to any remedial action required in relation to re-establishment of the vegetative mat, temporary trails must be blocked to prevent further vehicular access.
59. Road development shall be considered the least preferred option for access and limited to the extent practicable.
60. The operator shall not be permitted to construct roads between the Anubis Cluster and Pyramid target zones.
61. The operator shall develop a Road Management Plan, which details road construction and reclamation. Plans for road and trail construction and operation shall be submitted to the regulator for review and approval prior to road and trail construction as a result of Part 3, term 77. The Chief may require any additional information that he/she considers necessary. The approved plan will be incorporated as a condition of approval LQ00444.
62. The Road Management Plan will include methods for construction, operation procedures, maintenance, water management methods, security measures, and final decommissioning of all new roads and trails.

Release of Sediment

63. All reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law.

Aerodrome

64. The Stewart airstrip shall be private and inaccessible to the public.

Wildlife

65. The operator shall submit an attractant management plan to the Chief for review and approval within 60 days from issuance of the approval.

66. The plan will detail wildlife deterrent measures, all related training, and measures to manage potential wildlife attractants, including, but not limited to:

- food;
- toiletries and first aid materials;
- kitchen waste;
- grey water;
- solvents and cleaning products;
- fuel, including fuel caches and small quantities of fuel at work sites;
- oil, lubricants and industrial wastes;
- Seasonal shutdowns and mitigations for few and/or no people on-site;
- incinerator residue; and
- sanitary waste.

67. The following mitigations shall be included in the attractant management plan:

- The camp shall be equipped with properly maintained wildlife deterrent devices consistent with the *Guidelines for Industrial Activity in Bear Country* ([http://www.env.gov.yk.ca/mapspublications/documents/Guidelines for Industrial Activity in Bear Country.pdf](http://www.env.gov.yk.ca/mapspublications/documents/Guidelines_for_Industrial_Activity_in_Bear_Country.pdf)).
- The operator shall ensure that project personnel receive bear aware training. For guidance of training refer to the *Guidelines for Industrial Activity in Bear Country*.

68. The Chief may require any additional information and/or adopt additional mitigation as required.

69. The operator shall not carry out project activities within 1 km of known mineral licks. The operator should contact the Regional Biologist for additional information on the precise location of the known mineral lick (867-996-2162).

Security

70. The security will be determined by the Chief upon review and approval of the Road, Trail and Airstrip Reclamation and Closure plan as referenced in Part 3, term 76.

71. Security must be paid within thirty (30) days of receiving the written notice from the Chief.

72. Adjustments to the initial security may be required at any time by the Chief.

73. Any changes to the security requirements as a result of Part 3, term 71 shall become a term of the approval and the operator must furnish security within thirty (30) days of receiving the written notice from the Chief.

74. Security will be retained as per Section 139 of the *Quartz Mining Act* and section 18 of the Quartz Mining Land Use Regulation.

Reclamation

75. Reclamation shall be progressive in nature where possible and completed before expiry of the approval.
76. The operator shall develop a Road, Trail and Airstrip Reclamation and Closure Plan which details reclamation of all project related activities and removal of all project related infrastructure, and shall be submitted to the regulator for review and approval by January 3, 2017. The Chief may require any additional information that they consider necessary. The approved plan will be incorporated as a condition of approval LQ00444.
77. The Chief may require any additional information that he/she considers necessary. The approved plan will be incorporated as a condition of approval LQ00444.
78. The operator shall undertake reclamation at the site in accordance with the approved Reclamation and Closure Plan.
79. Reclamation shall be progressive in nature and completed before expiry of Approval LQ00444.
80. The operator shall implement progressive reclamation of trails, roads and other clearings that are no longer required for exploration/operational purposes.
81. Details of the ongoing reclamation plans must be submitted in the annual report.

PART FOUR – FINAL DECOMMISSIONING

82. Final reclamation will occur prior to the expiry of the exploration program, according to standards outlined in the operating conditions for re-establishment of vegetative mat and erosion control.
83. All petroleum products and any other hazardous substance must be removed from the site of the exploration program when the program ceases.
84. All waste petroleum products and any other special waste, as defined in the Special Waste Regulations, generated in the course of carrying out the explorations program must be disposed of in accordance with the Special Waste Regulations when the program ceases.
85. Debris, equipment, fuel barrels, scrap metal and other waste at the work site shall be completely disposed of, so as not to attract wildlife, by removal to an authorized disposal site as often as is practicable throughout the mining season and completely at the cessation of the exploration program.
86. Structures must be removed and the site restored at the end of the exploration program to a level of utility comparable to its previous level of utility.

PART FIVE – OTHER MATTERS

- 87.** All other applicable legislation, regulations, laws, by-laws and ordinances must be complied with. Additional authorizations or approvals may be required. Any doubt as to whether an additional authorization or approval is required should be verified by a duly authorized official at the appropriate government body or bodies.
- 88.** Use of water is subject to the *Waters Act* and Waters Regulation.
- 89.** Attached (Appendix B) are the commitments that form part of this operating plan.

**ATAC Resources Ltd.
LQ00444**

OPERATIONAL GUIDELINES

- The operator should familiarize themselves with Yukon invasive species and how to manage them by referring to the Yukon Invasive Species Council (YISC) document "Why Should I Care About Invasive Species?"
- The operator should report the presence of any invasive plants that are listed on the Yukon Invasive Species Council website: <http://www.yukoninvasives.com/plants.html> to Government of Yukon by e-mail (invasives@gov.yk.ca).

Appendix A

MINING LAND USE EXPLORATION ACTIVITY REPORT

Nov. 16, 2016

LQ00444

Class IV

ATAC Resources Ltd.
1016 - 510 W. Hastings St.
Vancouver, BC V6B1L8

ELEMENT	CRITERIA	TERMS AND CONDITIONS
Fuel Storage in a stationary container		20 000L Diesel, 1000L Gasoline, 20 000L Jet A or B Fuel, 10 000L Propane
Upgrading of access roads per		Maintenance of existing roads
Establishing new access roads per program		40kms x 3m
Nb of clearings per claim, including existing clearings		Maximum 100 per claim
Nb of person days per camp		3 camps - 9000 person days
Nb of persons in a camp at any one time		50
Use of explosives		200kg per 30 days
Corridor Width		1m
Total length of corridors		75 000m
Total volume of trenching		300 trenches (30m x 1.5m x 2m)
Surface area of each clearing		Surface clearing - vegetative mat removed = 40m ² , Surface clearing - trees and brush = 60m ² , Heli pads= 100m ² , Stewart Air Strip may be extended 5000ft long and 150ft wide.
Use of vehicles on existing roads or trails		18kms May 1 to Oct. 31 annually

**ATAC Resources Ltd.
LQ00444**

Appendix B
Proponent Commitments

- Active nests searches will be performed ahead of vegetation clearing activities.
- Areas will be carefully inspected prior to disturbance to avoid any areas of heritage concern.
- Waste will be incinerated daily using a fuel fired incinerator.
- The camp, incinerator, sump and waste storage areas will be enclosed in an electrified fence.
- Fuel caches will be stored within a lined and bermed area.
- A fuel spill contingency plan is in place and will be followed.
