File No: LQ00476

Alexco Resource Corp.
1255-555 Burrard Street
Vancouver, BC
V7X 1M9

Dear Sir/Madam:

Re: Class 4 Quartz Mining Land Use Approval

Your application for a Class 4 approval has been approved and is subject to the attached conditions.

Security will be furnished in the amount of 1,755.00 for this operating season. Security is based off a detailed work plan Alexco Resources Corp. submitted for the initial operating season. The work plan consists on of 14 drill pads (20m x 15m) each, totaling 4, 200m² of clearings.

In each year to follow, the security requirement will be reviewed and adjusted according to additional activities proposed for the season and reclamation completed in the previous season. To facilitate this assessment, please ensure that pre-season and post-season reports are provided. Not providing reports may result in additional security being required.

Security will be furnished in accordance with Section 2.44 of the Class 4 Mining Land Use Approval LQ00476 (the Approval), which states:

2.44 Security will be paid by the Operator within thirty (30) days of issuance of approval LQ00476, unless otherwise notified in writing by the Chief.

The effective date of this approval will be June 17, 2018. All work, including restoration, must be completed by June 16, 2028, and inspected before full security and/or completion certificates can be applied for.

Mineral Resources will require the following plans:

- 1) Access Management and Reclamation Plan
- 2) Waste Rock Storage Plan
- 3) Reclamation and Closure Plan

The attached 'Operational Guidelines' list additional requirements that enable your program to satisfy the conditions of the decision document issued June 29, 2017 and February 6, 2018 as a result of recommendations from the Yukon Environmental and Socio-economic Assessment Board.

Please feel free to contact our office at (867) 996-2256 should you have any questions.

Regards,

ENV Environmental Affairs, Environmental Protection Branch

**MINING LANDS
MINERAL RESOURCES BRANCH
GOVERNMENT OF YUKON**

Pursuant to the *Quartz Mining Act* and *Quartz Mining Land Use Regulation*, the Chief, Mining Land Use hereby grants a Class 4 approval to:

Alexco Resource Corp.
1255-555 Burrard Street
Vancouver, BC
V7X 1M9

APPROVAL NUMBER: LQ00476
PROPERTY NAME: Keno Hill
UNDERTAKING: Quartz
CLASS: Class 4 Approval
EFFECTIVE DATE: June 17, 2018
EXPIRY DATE: June 16, 2028

This approval shall be subject to the restrictions and conditions contained herein and to the restrictions and conditions contained in the *Quartz Mining Act* and the *Quartz Mining Land Use Regulation* made there under as proposed in Mining Land Use Application LQ00476.

Dated this June 17, 2018

A handwritten signature in black ink, appearing to read "Robert Savard", written over a horizontal line.

Robert Savard
A/Chief, Mining Land Use

**MINING LAND USE
APPROVAL
Class 4**

SCOPE OF APPROVAL:			
Claim Status Report (Appendix A)	LQ00476		
Operating Season	January 1st to December 31st	Keno Hill	
PROJECT ACTIVITIES (ON-CLAIM):			
USE OF VEHICLES/EQUIPMENT			
Use of vehicles on existing roads or trails			<input type="radio"/> No <input checked="" type="radio"/> Yes
Gross vehicle weight	On-roads: >40t	On-trails: >20t	
Off-road use of vehicles in summer			<input checked="" type="radio"/> No <input type="radio"/> Yes
Off-road use of vehicles in winter			<input checked="" type="radio"/> No <input type="radio"/> Yes
NEW & EXISTING ACCESS			
Upgrading of existing access	<input type="radio"/> No <input checked="" type="radio"/> Yes	Length: 32 km	Width: 4 m
New roads	<input type="radio"/> No <input checked="" type="radio"/> Yes	Length: 15 km	Width: 4 m

FUEL STORAGE		
FUEL TYPE	STORAGE TYPE	CAPACITY
Diesel	Tank/Container	49,500 L
Gas	Tank/Container	6,600 L

FACILITIES & STRUCTURES	
Temporary Lined Potential Acid Metal Leaching Storage Site Settling/Storage Pond: 16 m x 32 m x 2 m = 1 021 m ³ Birmingham Site Structures: fuel storage, miners dry, sea containers, portal, lay downs	
Number of persons in camp at any one time: 0	Number of person days: 0
Construction of underground structures <ul style="list-style-type: none"> • Construction of a surface portal • Advancement of a 600 m long underground decline, 3.7 m x 3.7 m • Construction of safety bars, remuck bays and underground drill stations • Dewatering of underground workings and discharge up to 300 m³ per day • Underground exploration drilling, 5 000 m 	<input type="radio"/> No <input checked="" type="radio"/> Yes
Amount per year:	Amount per program: 6 000 tons P-AML Waste Rock 25 000 tons N-AML Waste Rock

All other applicable legislation, regulations, laws, by-laws and ordinances must be complied with. Additional authorizations or approvals may be required. Any doubt as to whether an additional authorization or approval is required should be verified by a duly authorized official at the appropriate government body or bodies.

MINING LAND USE
APPROVAL
Class 4
LQ00476
Keno Hill
Alexco Resource Corp.

DEFINITIONS

“**Act**” means the *Quartz Mining Act*, S.Y. 2003, c.14;

“**Access road**” means a road that provides access to a public highway or to a private road;

“**Adverse effects**” of an exploration program means its adverse environmental or socio-economic effects and any adverse effects it may have on the existing or asserted aboriginal or treaty rights of any First Nation;

“**Chief**” means the Chief of Mining Land Use designated pursuant to the Act;

“**Clearing**” means an area that is cleared of trees, brush or vegetative mat for the purpose of establishing a campsite or carrying out mining exploration, but does not include an area cleared for the purpose of establishing a corridor or trail;

“**Corridor**” means a path from which trees and brush have been cut to accommodate a water line, fuel line or power line;

“**Effective date**” means the date this Approval comes into force as evidenced by the date of the signature of the Chief;

“**Exploration program**” means any activity or group of activities undertaken for the sole or principal purpose of assessing land for its suitability for the production of minerals;

“**Foundation**” means the part of a structure that penetrates the ground and supports the structure;

“**Isolated road**” means a road that does not provide access to a public highway directly or through a private road;

“**Inspector**” means an inspector designated pursuant to the Act;

“**Line**” means a line cut for the purpose of carrying out a geophysical, geological, or engineering survey;

“**Low ground pressure vehicle**” means a vehicle that applies 35 kPa of pressure or less to the ground surface;

“**Operator**” means a person who is engaging in an exploration program, or in development or production;

“**Person-day**” in respect of the use of a campsite, means the use of the campsite by one person during a period of 24 hours;

“**Response**” means a notice given by the Chief that indicates whether or not an exploration program may be carried out or that extends the time for the Chief’s review of a Notification or operating plan;

“**Road**” means a pathway for vehicular traffic the construction of which requires the movement of rock or earth;

“**Site**” means the area bounded by the sum of the mineral claims described above under ‘Scope of Approval’;

“**Summer**” means the period of a year that is not winter;

“**Trail**” means an access to a site within a claim or lease that is constructed with little or no movement of rock or earth; and

“**Trenching**” means excavation carried out on a mineral claim for the purpose of obtaining geological information;

“**Upgrading**”, in relation to a road, means re-establishing a road that has not been useable for more than five years by vehicles of a type the road was originally designed to serve, modifying a road to provide usability for vehicles that are of a different type than those for which the road was originally designed to serve and any other upgrading or modifying of a road, other than for maintenance or erosion control;

“**Vegetative mat**” means the organic surface of soil, characterized by the accumulation of organic matter, or partly decomposed organic matter, derived mainly from leaves, twigs, and woody materials, and includes the root mass of living vegetation;

“**Winter**” means the period of the year during which (a) the ground is frozen sufficiently to support a vehicle, other than a low ground pressure vehicle, without rutting or gouging of the surface; and (b) there is a sufficient amount of snow on the ground to produce a packed base of 10 cm.

PART ONE – GENERAL REQUIREMENTS

Duration of Approval

- 1.0 This approval is valid upon signature of the Chief until the expiry date. In the event that claims lapse, or that agreements to operate on claims are dissolved, the approval becomes null and void for that portion of the operating plan, where there is no right to the minerals.

Compliance with Operating Conditions

- 1.1 All mineral exploration activities must comply with the Operating Conditions contained in Schedule 1 of the *Quartz Mining Land Use Regulation* and within the approval. Where there is a discrepancy between the Regulation and approval, the terms of this approval shall prevail. These Operating Conditions are enforceable.

Reporting Requirements

Contact Information

- 1.2 Submissions and reports to the Chief should be made to both the following addresses:

Chief, Mining Land Use
Box 2703, K-9
Whitehorse, Yukon
Y1A 2C6

Mining Lands Officer
Box 10, K-MA
Mayo, YT Y0B 1G0
mayo.mining@gov.yk.ca

- 1.3 The contact for the Operator will be:

Brad Thrall, President
Suite 1225, Two Bentall Centre
555 Burrard Street, Box 216
Vancouver, BC
Canada V7X 1M9
Tel: (604) 633-4888
Fax: (604) 633-4887

Kai Woloshyn, Senior Environmental Manager
#3 Calcite Business Centre – 151 Industrial Rd.
Whitehorse, YK
Canada Y1A 2V3
Tel: (867) 668-6463
Fax: (867) 633-4882

Pre-season and Post-season Reporting

- 1.4 A report shall be submitted at the beginning of each mining season outlining the exploration activities planned for the season including the proposed locations.
- 1.5 A report shall be submitted at the end of each mining season indicating exploration activities completed during that season. This report shall include but is not limited to:
- detailed mapping of all areas worked;
 - location of new construction;
 - new areas of disturbance;
 - map data, in the form of SHP files or GIS compatible, of all new roads and trails;
 - map data, in the form of SHP files or GIS compatible, of all reclaimed roads and trails;
 - areas of permafrost encountered;

- total disturbed area;
 - pre-activity survey results, if applicable;
 - reclamation activities; and
 - documentation produced by environmental monitors.
- 1.6 The operator shall contact the Mayo Mining Inspections Office (Compliance, Monitoring and Inspections) at (867) 996-2568 at least 14 days prior to commencing the field season.
- 1.7 The operator shall contact the Mayo Mining Inspections Office (Compliance, Monitoring and Inspections) at (867) 996-2568 at least 14 days prior to leaving the site at the end of the operation.

Spill Reporting

- 1.8 All spills must be reported immediately to the 24-Hour Yukon Spill Reporting Line (867) 667-7244 and to the Mayo Mining Inspections Office (Compliance, Monitoring and Inspections) at (867) 996-2568.
- 1.9 An operator who takes an emergency remedial measure shall, as soon as possible but not later than 10 days after taking it, send a written report to the Chief describing the duration, nature and extent of the emergency and the measures taken to respond to it.

Heritage Reporting

- 1.10 All paleontological resources uncovered during operations shall be reported to the Yukon Paleontology Program, Government of Yukon in Whitehorse at (867) 667-8089 or (867) 667-5386 and the Chief.
- 1.11 All archaeological resources uncovered during operations shall be reported to the Yukon Archaeology Program, Government of Yukon in Whitehorse at (867) 667-3771 or (867) 667-5386 and the Chief.
- 1.12 The report(s) developed for Section(s) 2.10 and 2.11, shall be submitted to Government of Yukon Heritage Resources Unit, Cultural Services Branch.

Wildlife Reporting

- 1.13 All incidents with wildlife shall be reported to the District Conservation Officer in Mayo (Northern Tutchone Region) at (867) 996-2247.

PART TWO – PROJECT SPECIFIC OPERATING CONDITIONS

Schedule 1 Operating Conditions (Appendix B)

The operator is bound by the Schedule 1 Operating Conditions per the *Quartz Mining Land Use Regulation*. In addition to the Schedule 1 Operating Conditions, the operator must also comply with the following terms and conditions:

Erosion Control and Permafrost

- 2.0 The operator shall insulate the ground surface beneath all temporary structures and temporary facilities used in the project where permafrost is present to:
- a) prevent any vegetation from being removed; and
 - b) prevent the ground from settling or eroding.

Trenching

- 2.1 Open trenches shall be sloped at one end to avoid entrapment of wildlife.
- 2.2 The operator must ensure that all employees and contractors working at the trench sites are aware of the operating conditions for trenching.

Solid Waste

- 2.3 The operator shall keep all garbage, including kitchen waste, in a container that prevents access by bears and other wildlife, until properly disposed of in accordance with the *Solid Waste Regulations*.
- 2.4 When burning kitchen waste on site it must be burned regularly to reduce odours that might attract wildlife and be burned to ash by forced air or fuel fired incineration.

Petroleum Fuel and Hazardous Substances

- 2.5 The operator shall clearly identify the owner, the contents and the date on fuel drums to establish and manage ownership and responsibility.
- 2.6 All fuel cache(s) must be protected with an earthen berm and flagged to prevent spills resulting from accidental contact with heavy equipment. Flags should be visible above the snow pack.
- 2.7 The location of any spills shall be clearly marked with stakes or flags.

Drilling

- 2.8 The operator must ensure that all employees and contractors working at the drill sites are aware of the operating conditions for drilling.

Reclamation

- 2.9 Reclamation and/or decommissioning of roads and trails shall be progressive in nature and shall be documented annually in the post season report. Reclamation and/or decommissioning of roads and trails shall occur as soon as roads and trails are no longer needed for exploration activities unless the need is documented in the post and pre-season reports. The status of roads and trails (i.e. active or inactive) and on-going/completed reclamation activities shall be reported to the Chief, Mining Land Use annually via post-season reports.

Heritage

- 2.10 A Heritage Resources Overview Assessment shall be completed in advance of ground disturbing activities. Areas with elevated potential for the presence of archaeological or historic sites shall be avoided until such time as a heritage resources impact assessment can be completed.
- 2.11 A Heritage Resources Impact Assessment shall be completed in advance of ground disturbing activities in the areas with elevated potential for the presence of archaeological or historic sites.

Road/Trail Construction and Upgrading

- 2.12 An Access Management and Reclamation Plan shall be submitted to the Chief for review and approval prior to the construction of new access or alteration of existing access. The Chief may require any additional information that they consider necessary. The approved plan will be incorporated as a condition of approval LQ00476.
- 2.13 No acid generating or metal leaching material shall be used for road construction.
- 2.14 New roads shall be constructed in such a way that minimizes permafrost degradation.

Access Restriction

- 2.15 All roads in the project area that are not public roads must be secured so as to restrict access by the public.
- 2.16 Access monitoring shall be conducted with respect to secure areas.
- 2.17 Traffic shall be appropriately controlled on the mine access road.
- 2.18 The operator shall erect signage to alert visitors to mining activity, and restrict access between the Signpost Road and the Haul Road and to the Onek Pit.
- 2.19 Ensure all adits and other historic mine workings within the project area are secured from public access or, at a minimum, well signed to inform the public and site employees of any risk.

Construction of a Portal and Underground Excavation

- 2.20 A professional engineer licensed to practice in Yukon must review, sign and stamp the design and plans for the Bermingham underground structures and new works.
- 2.21 The proponent shall submit Bermingham underground structures and new work plans to the Chief for review and approval at least fifteen (15) days prior to commencement of new works. The Chief may require any additional information deemed necessary.
- 2.22 The plans referred to in Section(s) 2.20 and 2.21 has been reviewed and approved and is now incorporated as a condition of Approval LQ00476.

- 2.23 As-built drawings signed and stamped by a professional engineer licensed to practice in the Yukon will be supplied in the post season report as of January 31 in the year immediately following construction of the portal or additional work to the portal.
- 2.24 The operator shall notify Compliance Monitoring and Inspections within 7 days of commencement of portal development.
- 2.25 A heavy screen will be placed at the entrance of the portal at seasonal decommissioning to prevent animals and people from entering the adit.
- 2.26 If water build up occurs, within the underground workings, it will be drained to the settling pond outside the portal entrance.
- 2.27 Final decommissioning will be as outlined in the Reclamation and Closure Plan.

Temporary Waste Rock Area

- 2.28 Temporary Storage of waste rock will be limited to 30 days before removal to the waste rock dump.
- 2.29 Waste rock containing sulfides must be disposed of at the Waste Rock Storage facility at Onek and Bermingham sites as per the approved Waste Rock Storage Plan.
- 2.30 Prior to any development or use of the Bermingham historic waste rock dump, the proponent will conduct a geotechnical assessment by an Engineer to assess the physical stability of the dump for the proposed use and submit the assessment to the Chief, Mining Land Use for review and approval.

Waste Rock Storage Plan

- 2.31 Plans for the Waste Rock Storage facility specific to the Bermingham Project shall be submitted to the Chief. The Chief may require any additional information he/she considers necessary. The operator may not proceed with this work until such approval is granted. The approved plan will be incorporated as a condition of Approval LQ00476.
- 2.32 The Waste Rock Storage Plan will include but not be limited to the following:
- a) Details of types and amounts of materials to be used;
 - b) specifications for liners;
 - c) details of the containment methods for drainage off the waste rock;
 - d) treatment methods for any drainage dangerous to the environment;
 - e) methodology used for placement; and
 - f) plans must be reviewed, signed and stamped by a professional engineer licensed to practice in Yukon.
 - g) plans to address potential AML waste rock
- 2.33 As-built drawings signed and stamped by a professional engineer licensed to practice in the Yukon will be supplied in the post-season report as of January 31 in the year immediately following construction of the waste rock storage area.

2.34 All potential AML waste rock will be disposed of in accordance with an approved Waste Rock Storage Plan.

Settling Ponds and Sumps

2.35 Settling ponds must have a freeboard of no less than 0.4 m to prevent risk of destructive overtopping.

2.36 Settling ponds must have a high level discharge (i.e. spillway) to prevent destructive overtopping in the event of high water volumes.

2.37 Ensure that the settling pond at Bermingham are lined to prevent release of contact water through ground.

2.38 Settling ponds must be fenced or designed so as to deny access by wildlife and people.

2.39 The operator will submit as-built drawings of the settling ponds and sumps facilities reviewed, signed and stamped by a professional engineer licensed to practice in the Yukon submitted in post report as of January 31 in the year immediately following construction.

Sludge Storage

2.40 Sludge from settling ponds at Bellekeno 625 and sediment collected in Bellekeno East settling ponds shall be removed and transported to Valley Tailings Area at the existing sludge storage area or other previously approved area.

Keno Hill Silver District Exploration Reclamation and Closure Plan

2.41 A Reclamation and Closure Plan for the exploration in Keno Hill Silver District shall be submitted to the Chief within six months of issuance of the approval. The Chief may require any additional information deemed necessary. The approved plan will be incorporated as a condition of Approval LQ00476.

Security

2.42 Security will be determined by the Chief based on the amount of new access and clearings proposed (15km roads) and (20 clearing per claim, 400m² each where the vegetative mat is removed), and upgrading of existing access (30kms).

2.43 The Operator has furnished security in the amount of \$194 192.00 for the Bermingham site, and must furnish and maintain further security based on a progressive approach for activities proposed annually for each operating season. Activities requiring security are listed in Section 2.42 as required under Section 139 of the Quartz Mining Act.

2.44 Security will be paid by the Operator within thirty (30) days of issuance of approval LQ00476, unless otherwise notified in writing by the Chief.

2.45 Adjustments to the initial security, provided in Section 2.43, may be required at any time by the Chief.

- 2.46 A review of the security required to be posted under this Approval will be made by the Chief within sixty (60) days of submission of each of the following reports:
- a) Receipt of Road Management Plan (Section 2.12)
 - 2) Receipt of the Waste Rock Storage Plan (Section 2.31)
 - 3) Receipt of the Reclamation and Closure Plan (Section 2.41)
- 2.47 Any change to the security requirements as a result of sections 2.45 shall become a term of this Approval and the operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post additional security.
- 2.48 Security will be returned as per Section 139 of the *Quartz Mining Act* and section 18 of the *Quartz Mining Land Use Regulation*.

PART THREE – RECLAMATION AND/OR DECOMMISSIONING

- 3.0 Reclamation and/or decommissioning shall be progressive in nature where possible and will occur prior to the expiry of the exploration program or prior to the expiry of this approval, whichever comes first, according to standards outlined in the operating conditions, unless otherwise specified by the Chief.
- 3.1 Debris, equipment, fuel barrels, scrap metal and other waste at the work site shall be completely disposed of, so as not to attract wildlife, by removal to an authorized disposal site at the cessation of the exploration program.
- 3.2 Structures must be removed and the site restored at the end of the exploration program or prior to the expiry of this approval, whichever comes first, to a level of utility comparable to its previous level of utility.
- 3.3 If an amendment to this approval or new approval is granted, for the claims within the scope of this approval (Appendix A), all outstanding reclamation continues to be the responsibility of the operator.

PART FOUR – OTHER MATTERS

- 4.0 Security may be required at any time by the Chief.
- 4.1 Notice of Schedule III must be provided to the Yukon Water Board ten (10) days prior to use of water.
- 4.2 Attached (Appendix C) are the commitments that form part of this operating plan.

APPENDIX B

Quartz Mining Land Use Regulation

Schedule 1 **Operating Conditions**

Removal of the Vegetative Mat

1. If the vegetative mat must be removed to carry out exploration activities, it must be removed so as to protect the seed and root stock contained within the mat and be stored separately from other overburden or bedrock removed for use in re-establishing the vegetative mat when the exploration program ceases.

Re-establishment of the Vegetative Mat

2. (1) All vegetated areas disturbed by exploration activities, including fuel and waste storage areas, clearings, corridors, temporary trails, camps and supporting infrastructure, and trenches and drill sites, must be left in a condition conducive to re-vegetation by native plant species or other species adaptable to the local environment to encourage re-vegetation comparable to similar, naturally occurring, environments in the area.

(2) Conditions conducive to re-vegetation include provision of adequate soil layer with moisture retaining ability, no soil contamination by hydrocarbons or other hazardous substances, provision of adequate seed or root stock, and contoured or otherwise stable slopes.

3. If adequate seed or root stock is not naturally available, re-seeding or transplanting of vegetation is required. Only non-invasive species may be used for re-seeding or transplanting. Consult with the Mining Inspector prior to seeding.

Erosion Control and Permafrost

4. All areas disturbed during an exploration program must be re-sloped, contoured or otherwise stabilized to prevent long-term soil erosion, slumping and subsidence.
5. All exploration activities must be carried out to avoid or minimize damage to and loss of permafrost.

Trenching

6. Trenching carried out by hand or using hand-held tools must be methodical. All trenches must be stabilized and marked to minimize risk to the public.
7. Trenches constructed with mechanized equipment must be back filled by first depositing any removed overburden and bedrock and then replacing the vegetative mat that was removed to construct the trench.

Historic Objects and Burial Grounds

8. Exploration activities must not be carried out within 30m of a known archeological site unless the Chief indicates, in writing, that such activities may be carried out.
9. Any sites containing archeological objects, paleontological objects or human remains or burial sites discovered in the course of carrying out an exploration program must be immediately marked and protected from further disturbance and, as soon as practicable, the discovery reported to the Chief. No further activities may be carried out within 30m of the site until the Chief indicates, in writing, that activities may be resumed.

Solid Waste

10. All solid waste, including debris, equipment, barrels, drums, and scrap metal, must be safely stored on the site of the exploration program while the program is carried out and must be disposed of in accordance with the *Solid Waste Regulation* when the program ceases.
11. Camps must be kept clean and tidy.

Petroleum Fuel and Hazardous Substances

12. If petroleum fuel storage capacity exceeds 4000 L, a secondary containment structure must be constructed. The containment structure must be made of a material impervious to petroleum products and:
 - a) if there is a single storage tank, be of sufficient size to accommodate at least 110% of the capacity of the storage tank; or
 - b) if there is more than one storage tank, be of sufficient size to accommodate 110% of the capacity of the largest storage tank or 10% of the total capacity of all the tanks, whichever is larger.
13. All petroleum products, including waste petroleum products, and any other hazardous substances must be stored in a secure fashion no less than 30m from the ordinary high water mark of any water body.
14. All petroleum products, including waste petroleum products, and any other hazardous substance, must be transferred and handled without spillage.
15. All petroleum products and any other hazardous substances must be removed from the site of the exploration program when the program ceases.
16. All waste petroleum products and any other special waste, as defined in the *Special Waste Regulations*, generated in the course of carrying out the exploration program must be disposed of in accordance with the *Special Waste Regulations* when the program ceases.

Spills and Spill Contingency Plans

17. A spill contingency plan for petroleum products and other hazardous waste must be prepared and posted in the camp and at all fuel handling locations used in carrying out the exploration program.

18. All spill clean-up equipment and material must be maintained in a state of readiness sufficient at all times to contain and clean-up any hazardous material spills.
19. If a spill occurs, the spill contingency plan must be immediately implemented and notice given to the 24-hour Yukon Spill Report Line. As soon as practicable, an inspector must be contacted. Whatever remedial action is required to clean-up the spill and reclaim the affected land and water must be taken.

Use of Vehicles

20. Vehicles must be maintained and operated to prevent spills of fuel, lubricants, coolants and oil.

Timber and Brush

21. Cut brush must not be piled so that it blocks movement of wildlife or people.
22. Leaning trees created by cutting of lines, corridors, temporary trails, and clearings must be felled.
23. When it is economically viable to do so, timber suitable for sale must be salvaged and stockpiled.
24. All risk of fire hazard must be avoided.

Drilling

25. All reasonable efforts must be made when drilling to minimize the impact on wildlife and the public.
26. Vegetation other than that within a drill sump, must not be covered with drill cuttings.
27. Core must be stored in a stable fashion.
28. Drill mud must be re-circulated when possible.
29. All drill fluids must be contained in a sump.
30. Drill holes that pose a hazard or that lead to ground water must be plugged to prevent flow of water to the surface.
31. The location of drill holes must be marked on the ground by flagging or other suitable means at the location of the drill hole.
32. Drilling waste, including fluid, cuttings and mud must not be left within 30m of a water body.

Roads, Trails, and Off-road Trail Use

33. All vehicles must be operated to avoid rutting and gouging of roads and trails.
34. Off road and trail routes must be reconnoitered and must be used in a way that minimizes ground disturbance, including damage to permafrost and sensitive wildlife habitat.
35. If rutting, gouging, ponding or permafrost degradation occurs off road or trail, vehicle use must be suspended or relocated to ground that is capable of bearing the weight of the vehicle without causing such damage.
36. Use of skids on permafrost or wet ground is only permitted outside of winter where it is not reasonable to use any other means of transporting equipment.
37. Routes for temporary trails must be reconnoitered and flagged.
38. In addition to any remedial action required in relation to item 2 of this schedule, temporary trails must be blocked to prevent further vehicular access.

Release of Sediment

39. All reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law.

Use of Explosives

40. Explosives must be set off in a manner to minimize impact on wildlife and the public to ensure that forest fires, unplanned landslides, or artificial damming of water bodies does not occur.

Waste Rock

41. Waste rock piles must be located at least 30m from any water body and be physically stable.
42. Waste rock containing sulfides must be returned underground.
43. Access to underground openings must be blocked to prevent access by wildlife and people.

APPENDIX C

Proponent Commitments

Wildlife

- Where possible, previously existing roads, trails and disturbed areas will be used. (YOR 2017-0183-019-1)
- To the extent possible, disturbance of the vegetative mat will be avoided. (YOR 2017-0183-019-1)
- The width and length of trails and roads will be minimized to the extent possible. (YOR 2017-0183-019-1)
- All roads either developed new or reconstructed/upgraded from existing roads will be subject to standard road decommissioning and reclamation measures. (YOR 2017-0183-019-1)
- All employees will adhere to the policy of no feeding, harassment, or hunting of wildlife by employees and contractors. (YOR 2017-0183-019-1)
- The proponent will follow the Yukon Mineral and Coal Exploration Best Management Practices and Regulatory Guide (Yukon Chamber of Mines, 2010) guidance on seasonal and final decommissioning of trails and roads. (YOR 2017-0183-018-1)
- If vegetation clearing is proposed between May 1 and July 31 (migratory bird nesting season) qualified and experienced personnel will perform nest surveys. (YOR 2017-0183-019-1)
- If active nests are discovered, the Proponent shall postpone activities in the nesting area until nesting period is complete. (YOR 2017-0183-019-1)
- If suitable collared pika habitat is identified, the Proponent shall contact Environment Yukon for advice on pre-activity surveys and will report the results of the surveys to the Yukon Conservation Data Centre. (YOR 2017-0183-019-1)
- If collared pika are observed near proposed exploration areas, the Proponent will contact the Regional Biologist for advice on mitigation. (YOR 2017-0183-019-1)

Environmental Quality

- Fuel will be stored on bermed, concrete pads. (YOR 2017-0183-018-1)
- Refueling of vehicles and other equipment takes place at least 30 m from watercourses. (YOR 2017-0183-018-1)
- Spill kits will be kept at each fueling station at all times (YOR 2017-0183-018-1) ar y 8, 2018 37
- The Proponent has prepared a Spill Contingency Plan which outlines the steps to be taken in the event of a spill. (YOR 2017-0183-006-1)
- The Proponent will apply best management practices and mitigation techniques throughout the exploration program including progressive reclamation. (YOR 2017-0183-018-1)
- Where possible, previously existing roads, trails and disturbed areas will be used. (YOR 2017-0183-019-1)
- To the extent possible, clearing and disturbance of the vegetative mat will be avoided. (YOR 2017-0183-019-1)
- Where possible, activities will avoid water bodies by a minimum of 30 m. (YOR 2017-0183-019-1)
- The Proponent will follow the Yukon Mineral and Coal exploration Best Management Practices Regulatory Guide guidance on stabilization, erosion control and revegetation for areas

affected by exploration including: sumps will be filled in, compacted soils will be scarified, and topsoil/vegetative mat will be replaced to promote natural [revegetation]. Slope stability will be maintained by recontouring slopes back to original topography or a 1:2. (YOR 2017-0183-018-1)

Other Land Users

- The Proponent will follow the measures in the Noise Management Plan (YOR document 2017-0183-013-1)
- Noise levels within the community will be monitored. (YOR 2017-0183-019-1)
- Alexco will make use of existing bypass roads around Keno City and to avoid the use of engine breaks when in and around Keno City. (YOR 2017-0183-018-1)
- The Proponent has a Traffic Management Plan (YOR 2017-0183-015-1) which, among other things, outlines measures to reduce hazards for residents and tourists that might be in the area, including, but not limited to:
 - o Access to operational areas related to mining in the KHSD will be restricted to authorized site personnel through the usage of signs and gates where appropriate.
 - o Facilities that potentially present danger to persons or wildlife such as the electrical substation and settling ponds will be fenced or barricaded as appropriate to prevent access.
 - o Signage posted near all construction sites.
 - o Speed limits are set and enforced throughout the property.
 - o Public notices are posted at multiple locations in Keno City to communicate any new activities that may be occurring or schedules.
- The Proponent has prepared an Emergency Response Plan, which outlines steps to be taken in the event of a “serious incident” which includes health and safety emergencies. (YOR 2017-0183-010-1)

Heritage Resources

- A Heritage Resources Protection Plan has been assembled to address the potential discovery of previously unknown heritage resources during the course of the project and provide a protocol for reporting and protecting these resources. (YOR 2017-0183-012-1)
- In the event previously unknown heritage resources are discovered, operations will be suspended and the site will immediately be marked and protected from further disturbances and no objects will be removed. (YOR 2017-0183-019-1)
- Notification will be provided to Yukon Government Heritage Resources Branch and the NNDFN and they will be consulted for advice on mitigation. (YOR 2017-0183-019-1)
- No further activities will be carried out within 30 meters of the site until Yukon Government indicates in writing that activities may be resumed. (YOR 2017-0183-019-1)
- If fossil bones are discovered, these will be set aside and as soon as practicable, reported to the Yukon Paleontologist. If human remains are discovered, work will cease immediately and the RCMP notified. The Guidelines Respecting the Discovery of Human Remains and First Nation Burial Sites in the Yukon will be followed. (YOR 2017-0183-019-1)

Operational Guidelines

Exploration activities

The Yukon Chamber of Mines has developed an informative Best Management Practices document that should be reviewed in the context of project activities. The Operator should reference the following document when planning and conducting project activities:

- Yukon Mineral and Coal Exploration Best Management Practices and Regulatory Guide (http://yukonminers.org/wp-content/uploads/2017/06/BMP_RG_Aug29_FINAL_WebFile.pdf).

Bears and other wildlife

To increase worker safety, reduce potential conflicts and prevent unnecessary wildlife mortality, the Operator should implement pertinent components of:

- Guidelines for Industrial Activity in Bear Country for the Mineral Exploration, Placer Mining and Oil & Gas Industries (http://www.env.gov.yk.ca/publications-maps/documents/bestpractes_water.pdf).

Invasive species

To minimize the risk and consequences of spreading invasive plant species the Operator should:

- Become familiar with the Yukon invasive species and how to manage them by referring to the Yukon Invasive Species Council document, "Why Should I Care About Invasive Species" (http://yukoninvasives.com/pdf_docs/WhysouldIcare2011_sm.pdf)

Heritage Resources

To better understand how to manage potential impacts to heritage resources, the Operator should refer to the following document(s):

- Mineral Exploration Best Management Practices for Heritage Resources (http://www.tc.gov.yk.ca/pdf/Mineral_Exploration_BMP_for_Heritage_Resources.pdf)
- Best Management Practices for Burial Sites and Human Remains in Yukon (http://www.tc.gov.yk.ca/pdf/BurialSites_BMP_2014.pdf)

Work in/near water

Project activities have the potential to affect water quantity, quality and/or rate of flow. The Operator should provide for the protection of water by applying practices described in:

- Best Management Practices for Works Affecting Water in Yukon (http://www.env.gov.yk.ca/publications-maps/documents/bestpractes_water.pdf).

Aircraft use

Project activities are authorized in an area known to be inhabited by sheep and/or caribou. The Operator and/or aircraft pilots should plan flight paths and protocols based on the published guideline(s):

- Flying in Sheep Country: How to Minimize Disturbance from Aircraft (http://www.env.gov.yk.ca/publications-maps/documents/flying_in_sheep_country.pdf).
- Flying in Caribou Country: How to Minimize Disturbance from Aircraft (http://www.env.gov.yk.ca/publications-maps/documents/flying_caribou_country.pdf).
