Eric Stretch

Dear Eric Stretch:

Re: Class 1 Notification P2022_0022 - ID01967 - Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2022_0022 is valid as of April 22, 2022.

Your Class 1 Notification and proposed work program (April 22, 2022 - April 22, 2023) is allowed to proceed with the following terms and conditions:

- The notification area overlaps with a moose late-winter range wildlife key area. Typically, placer exploration activities are carried out outside of winter months, however, activities have been proposed to occur year round. As such, the operator should plan activities to avoid use of the area in late-winter (Jan 1st – April 30th).
- Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as they are no longer required for mining purposes or prior to the end of the work program date identified in this Class 1, whichever occurs first.
- The operator shall give wildlife the right of way to protect wildlife and prevent collision.
- The notification area overlaps with a raptor nesting wildlife key area and mapped

nest sites. The operator should contact the Dawson Regional Biologist at 867-993-6461 for further information on the location of the nest and appropriate setback distances.

- The operator shall avoid land clearing within 1 km of known or observed raptor nests between May 1 and August 15.
- The operator shall not fly unmanned aerial vehicles (drones) within 500 m of a known or observed nest during the nesting period.
- The location of active raptor nests identified by the operator shall be reported to Environment Yukon, Conservation Data Centre (867-667-3684 or yukoncdc@yukon.ca).
- The map provided identifies areas with elevated potential for heritage resources. The operator shall avoid ground disturbing activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@yukon.ca) for more information on the areas of heritage potential to discuss potential mitigation options prior to conducting any ground disturbing activities.
- The notification area is in a fossil bearing drainage. As per the Schedule 1 Operating Conditions, all palaeontological resources uncovered during operations must be reported to the Yukon Government.

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims or leases that have lapsed or pending claims or leases until they are granted by a Mining Recorder. Please ensure the lease in your Class 1 Notification is in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims or leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on April 22, 2023 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-993-6747, fax at 867-993-6747, or email at dawson.mining@yukon.ca.

Sincerely,
Saleem Dar

Chief of Placer Land Use
