Dear William Hood,

Re: Class 1 Notification P2023_0253 - KLAZ Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2023_0253 is valid as of September 06, 2023.

Your Class 1 Notification and proposed work program (May 15, 2024 - June 15, 2024) is allowed to proceed with the following terms and conditions:

1. Earthworks shall be sloped at one end to allow for wildlife escapement. The operator shall backfill each trench/shaft once a geological evaluation of the trench/shaft has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
2. The location of active raptor nests identified by the operator shall be reported to Environment Yukon, Conservation Data Centre (yukoncdc@yukon.ca).
3. The operator shall avoid land clearing within 1 km of any observed active raptor nests between May 1st and August 31th.
4. The operator shall not restrict access, availability and use of the area for traditional

harvest purposes.

5. The operator shall share wildlife observation information with the affected First Nations.
6. The operator shall ensure that equipment, including hand held tools, are washed before it is moved to site to prevent the introduction of exotic and invasive species.
7. The operator shall suspend exploration activities if caribou are observed within 1 km of active work areas, until they move off on their own accord.
8. You are reminded that a leave strip is required for all placer streams for the protection of riparian areas. This creek has a low habitat suitability classification, as defined in the Fish Habitat Management System for Yukon's Placer Mining, requiring a 5 meter leave strip. Please see the document attached for more information and appropriate setbacks. You are also reminded of the Schedule 1 Operating Condition #33 that states "all reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law." Any deposit of waste (i.e. dirty water) requires the activity to be licensed regardless of the quantity of water being disposed.
9. The operator shall communicate plans and timing of activities to the affected First Nations and other land and resource users (i.e. outfitters, trappers) as soon as practicable and prior to the commencement of project activities to identify potential land use conflicts and any other potential negative effects on other users. The operator shall make best efforts to resolve these issues.
10. Upon discovery of a heritage resource, the operator shall notify Little Salmon Carmacks First Nation Heritage Manager at (867) 863-5831 or toni.blanchard@lscfn.ca.
11. If project activities involve the use of aircrafts, flight paths and protocols should be based on the following published guidelines: Flying in Sheep Country: How to Minimize Disturbance from Aircraft <https://yukon.ca/sites/yukon.ca/files/env/env-flying-sheep-country.pdf> and Flying in Caribou Country: How to Minimize Disturbance from Aircraft <https://yukon.ca/sites/yukon.ca/files/env/env-flying-caribou-country.pdf>
12. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your

Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on September 05, 2024 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Paul Inglis

A handwritten signature in blue ink that reads "Paul Inglis". The signature is fluid and cursive, with the first name "Paul" and last name "Inglis" clearly legible.
