Dear Yue Zhang,

Re: Class 1 Notification P2023_0310 - IW00835 - Nansen Creek Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2023_0310 is valid as of September 08, 2023.

Your Class 1 Notification and proposed work program (September 08, 2023 - September 08, 2024) is allowed to proceed with the following terms and conditions:

1. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact heritage.review@yukon.ca for more information on the areas of heritage potential or to discuss potential mitigation options.
2. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or

burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.

3. The operator shall install an electric fence around the food preparation and storage area, grey water sump, and incinerator.
4. The operator shall cease activities in caribou fall breeding wildlife key areas, as identified on GeoYukon, between September 15th and October 15th.
5. The operator shall suspend exploration activities if caribou are observed within 1 km of active work areas, until they move off on their own accord.
6. The notification area overlaps with a moose late-winter range wildlife key area. Typically, placer exploration activities are carried out outside of winter months, however, activities have been proposed to occur year round. As such, the operator should plan activities to avoid use of the area in late-winter (Jan 1st – April 30th).
7. Any moose encountered on the claim block shall be given the right-of-way until they move off on their own accord.
8. The operator shall backfill each trench/shaft once a geological evaluation of the trench/shaft has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
9. The operator shall ensure trenches are sloped on at least one end at a grade shallow enough to allow ungulates to exit the trench.

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on September 08, 2024 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,

Paul Inglis
