Dear Lindsay Rawluk,

Re: Class 1 Notification P2023\_0468 - IM00513 Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2023\_0468 is valid as of January 18, 2024.

Your Class 1 Notification and proposed work program (January 18, 2024 - January 18, 2025) is allowed to proceed with the following terms and conditions:

1. The Proponent shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the Proponent shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return

of wetland benefits to those areas.

3. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for more information on the areas of heritage potential or to discuss potential mitigation options.
4. Please note, that a leave strip is required for all placer streams for the protection of riparian areas, and its dimensions are dependent on the stream's habitat suitability classification as defined in the Fish Habitat Management System for Yukon's Placer Mining. Please see the document attached for more information and appropriate setbacks. Please also note, Schedule 1 Operating Condition "all reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law." Any deposit of waste (i.e. dirty water) requires the activity to be licensed regardless of the quantity of water being disposed.
5. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.
6. You are reminded of Schedule 1 Operating Condition #17 which states: "A spill contingency plan for petroleum products and other hazardous substances must be prepared and posted in the camp and at all fuel handling locations used in carrying out the operation."
7. Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as the earthworks is no longer required for mining purposes, or prior to the end of the work program date identified in this Class 1, whichever occurs first.
8. If active bird nests are discovered, project activities shall be postponed in the nesting area until nesting is complete. Refer to avoidance measures link: <https://www.ceaa-acee.gc.ca/050/documents/p80054/121249E.pdf>
9. Linear disturbance shall be kept to a minimum. The operator shall reclaim all corridors/lines, by blocking access to corridors/lines, and replacing cut brush on top, as soon as they are no longer required for mining purposes, or by the expiry of this Notification whichever occurs first.
10. The operator shall allow unimpeded access through the project site to First Nation citizens undergoing traditional pursuits.
11. The operator shall share wildlife observation information (wildlife log) with the First Nation of Nacho Nyak Dun's Land and Resources Department (867)996-2265, prior to the expiry of this Notification.
12. The operator should avoid the area during spring calving season for moose, May 15 - June 15.
13. The operator shall suspend exploration activities if moose are observed from active work areas, until they move off on their own accord.
14. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of the First Nation of Nacho Nyak Dun (867-996-2265 ext.116) in addition to the Government of Yukon, Manager, Mining Lands and Heritage

Department.

15. The proponent shall communicate plans and timing of activities to the First Nation of Nacho Nyak Dun Lands and Resources Department (867-996-2265).
16. Off road use in the summer should be kept to a minimum, as much as possible.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on January 18, 2025 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-996-2256, fax at 867-996-2617, or email at [mayo.mining@yukon.ca](mailto:mayo.mining@yukon.ca).

Sincerely,  
Paul Inglis

A handwritten signature in blue ink that reads "Paul Inglis". The signature is fluid and cursive, with the first name "Paul" and last name "Inglis" clearly legible.

Manager, Mining Land Use
