Archer, Cathro & Associates (1981) Limited

Dear Heather Burrerll:

Re: Class 1 Notification Q2022_0083 - Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2022_0083 is valid as of May 26, 2022.

Your Class 1 Notification and proposed work program (June 01, 2022 - September 30, 2022) is allowed to proceed with the following terms and conditions:

- The map provided identifies areas with elevated potential for heritage resources. The operator shall avoid ground disturbing activities within this/these area(s) unless prior approval has been granted by the Heritage Resources Unit. The operator may contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@gov.yk.ca) for more information on the areas of heritage potential to discuss potential mitigation options prior to conducting any ground disturbing activities.
- The operator shall contact the Regional Biologist for information on identifying mineral licks. If a mineral lick is identified within the project area, the operator shall maintain a 100m no-disturbance buffer around the location of the mineral lick.
- No Class 1 activities shall occur within sheep lambing wildlife key area, as identified

- on the map, between May 1st and June 15th.
- The operator shall conclude activities in caribou fall breeding wildlife key areas as identified on GeoYukon by September 15th each year.
 - The operator shall cease work when any caribou are observed on active claim blocks until caribou move off on their own accord.
 - The operator shall cease work when any sheep are observed on active claim blocks until the sheep move off on their own accord.
 - The operator shall backfill each [trench/shaft] once a geological evaluation of the [trench/shaft] has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
 - The operator shall install and maintain safety fencing around all [trenches/shafts] deeper than two meters and install covers over the openings of all [trenches/shafts] with logs, or similar material capable of preventing people or wildlife from inadvertently falling into the [trenches/shafts].

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on May 25, 2023 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Bobbie Milnes

Chief of Mining Land Use
