White Gold Corporation

Dear Terry Bracy:

Re: Class 1 Notification Q2022_0145 - Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2022_0145 is valid as of May 31, 2022.

Your Class 1 Notification and proposed work program (June 01, 2022 - October 15, 2022) is allowed to proceed with the following terms and conditions:

- The notification area overlaps with a moose late-winter range wildlife key area. Typically, placer exploration activities are carried out outside of winter months, however, activities have been proposed to occur year round. As such, the operator should plan activities to avoid use of the area in late-winter (Jan 1st – April 30th).
- The operator shall install an electric fence around the food preparation and storage area, grey water sump and incinerator.
- The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.

- The operator shall avoid land clearing within 1 km of any observed active raptor nests between May 1st and August 15th.
- The operator shall plan flight routes to avoid flying over any observed active raptor nests, or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.
- The operator shall not fly unmanned aerial vehicles (drones) within 500 m of an observed active raptor nest during the nesting period.
- The map provided identifies areas with elevated potential for heritage resources. The operator shall avoid ground disturbing activities within this/these area(s) unless prior approval has been granted by the Heritage Resources Unit. The operator may contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@yukon.ca) for more information on the areas of heritage potential to discuss potential mitigation options prior to conducting any ground disturbing activities.
- The claim(s) included in the notification also overlaps with wildlife key area for moose. To reduce impacts to moose, best management practices are encouraged and all wildlife should be given the right of way.
- Upon discovery of a heritage resource the proponent shall notify the Heritage Department of Tr'ondëk Hwëch'in First Nation (867.993.7100 ext. 173), in addition to the Government of Yukon, Chief of Mining Lands and Heritage Branch.
- Due to the scope of the project and number of claims, it was not possible to assess it in its entirety for heritage resources. Specific work areas were not noted in the application therefore heritage potential could not be identified for proposed 2022 activity areas (mapping from 2021 of assessed claims is provided). The operator is encouraged to contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@yukon.ca) if the proponent identifies additional work areas that involve ground disturbing activities (such as trenching, trail building, drilling), as heritage values would need to be assessed. At this time no additional ground disturbing/altering activity should take place within the project claims, until clearance has been given for heritage values (other than general rock/soil sampling, prospecting, and airborne survey).

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on May 30, 2023 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Tamera Johnson
