Dear John Fiorino:

Re: Class 1 Notification Q2022_0150 - Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2022_0150 is valid as of May 31, 2022.

Your Class 1 Notification and proposed work program (July 01, 2022 - September 15, 2022) is allowed to proceed with the following terms and conditions:

- You are reminded of the Schedule 1 Operating Condition that "All reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law."
- Any brushing for cutlines should be done in such a way as to not hinder wildlife movement through the stockpiling of brush material.
- The operator shall cease work when any caribou, moose, or sheep are observed on active claim blocks until caribou, moose, or sheep move off on their own accord.
- The proponent shall communicate plans and timing of activities to the First Nation of Na-Cho Nyäk Dun (867-996-2265 ext. 152).
- The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and

other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.

- If active bird nests are discovered, project activities shall be postponed in the nesting area until nesting is complete.
- The operator should share wildlife observation information with First Nation of Na-Cho Nyäk Dun (867-996-2265 ext. 152).
- Upon discovery of a heritage resource the proponent shall notify the Heritage Department of First Nation Na-Cho Nyäk Dun (867-996-2265 ext.116) in addition to the Government of Yukon, Chief of Mining Lands and Heritage Department.
- Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as they are no longer required for mining purposes.
- Drill holes shall be decommissioned and backfilled or plugged to avoid wildlife entrapment.
- Due to the scope of the project and number of claims, it was not possible to assess the property in its entirety. The operator shall contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@yukon.ca), if the proponent identifies discrete work areas that involve ground disturbing activities (such as trenching, trail building, drilling), as heritage values would be provided and/or need to be assessed. At this time no additional ground disturbing/altering activity shall take place within the project claims, until clearance has been given for heritage values (other than general rock/ soil sampling and LiDAR survey).

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on May 30, 2023 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at

867-996-2256, fax at 867-996-2617, or email at mayo.mining@yukon.ca.

Sincerely,
Tamera Johnson
