Coccinella Mining

Dear Jim Boyce:

Re: Class 1 Notification Q2022_0199 - Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2022_0199 is valid as of August 21, 2022.

Your Class 1 Notification and proposed work program (August 21, 2022 - August 20, 2023) is allowed to proceed with the following terms and conditions:

- Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as they are no longer required for mining purposes.
- The proponent shall communicate plans and timing of activities to the First Nation of Na-Cho Nyäk Dun Lands and Resources Department (867-996-2265 ext. 141).
- Upon discovery of a heritage resource the proponent shall notify the Heritage Department of First Nation Na-Cho Nyäk Dun (867-996-2265 ext.116) in addition to the Government of Yukon, Chief of Mining Lands and Heritage Department.
- You are reminded that you must comply with the Schedule 1 Operating Conditions, especially #33, which states: "All reasonable care must be taken in carrying out an operation near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law." You are also reminded that a leave

strip is required for all placer streams for the protection of riparian areas, and its dimensions are dependent on the stream's habitat suitability classification as defined in the Fish Habitat Management System for Yukon's Placer Mining.

- The operator should share wildlife observation information with the First Nation of Na-Cho Nyäk Dun Lands and Resources Department (867-996-2265 ext. 141).
- You are reminded that a leave strip is required for all placer streams for the protection of riparian areas, and its dimensions are dependent on the stream's habitat suitability classification as defined in the Fish Habitat Management System for Yukon Placer Mining. Please see the document attached for more information and appropriate setbacks.
- The map provided identifies areas with elevated potential for heritage resources. The operator shall avoid ground disturbing activities within this/these area(s) unless prior approval has been granted by the Heritage Resources Unit. The operator may contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@yukon.ca) for more information on the areas of heritage potential to discuss potential mitigation options prior to conducting any ground disturbing activities.
- Please note that due to the size of the notification area the heritage assessment was limited to proposed work areas. The operator shall contact Holly Smith at the Heritage Resources Unit (867-332-4057 or holly.smith@yukon.ca) for information on heritage values should your work locations change as additional heritage assessment may be required, or to discuss potential mitigation options prior to conducting any ground disturbing activities.
- The notification area is in a fossil bearing drainage. As per the Schedule 1 Operating Conditions, all palaeontological resources uncovered during operations must be reported to the Yukon government.
- There are documented historical features (Historical Transportation Lines/Ditches) within the notification area, as identified on the map provided. The operator shall not engage in ground-disturbing activities within 30 m of these sites unless prior approval has been granted by the Chief of Mining Land Use. The operator is encouraged to contact Lee Whalen at the Historic Sites Unit (lee.whalen@yukon.ca) for more information on the historic sites prior to conducting any potentially ground disturbing activities.

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be

accepted by the Mining Recorder.

Please note: the notification will expire on August 20, 2023 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-993-5343, fax at 867-993-6747, or email at dawson.mining@yukon.ca.

Sincerely,
Jennifer Walters

Chief of Mining Land Use
