Dear Andrew Carne,

Re: Class 1 Notification Q2022_0336 - Rosy Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2022_0336 is valid as of August 08, 2023.

Your Class 1 Notification and proposed work program (August 08, 2023 - September 26, 2023) is allowed to proceed with the following terms and conditions:

1. The map provided identifies areas with elevated potential for heritage resources. The operator shall avoid ground disturbing activities within this/these area(s) unless prior approval has been granted by the Heritage Resources Unit. The operator may contact Michael Grooms at the Heritage Resources Unit (867-334-6619 or michael.grooms@yukon.ca) for more information on the areas of heritage potential to discuss potential mitigation options prior to conducting any ground disturbing activities.
2. Please note that due to the size of the notification area the heritage assessment was limited to proposed work areas. The operator shall contact Michael Grooms at the

Heritage Resources Unit (867-334-6619 or michael.grooms@yukon.ca) for information on heritage values should your work locations change as additional heritage assessment may be required, or to discuss potential mitigation options prior to conducting any ground disturbing activities.

3. The operator shall install an electric fence around the food preparation and storage area, grey water sump and incinerator.
4. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.
5. Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as they are no longer required for mining purposes.
6. The operator shall backfill each trench/shaft once a geological evaluation of the trench/shaft has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
7. The operator shall conclude activities in caribou fall breeding wildlife key areas as identified on GeoYukon by September 15th.
8. The operator shall cease work when any caribou are observed on active claim blocks until caribou move off on their own accord.
9. The operator shall cease work when any sheep are observed on active claim blocks until the sheep move off on their own accord.
10. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>).
11. By assigning this Class 1 Notification, the new operator accepts all responsibilities associated with this Notification, including reclamation of any work or disturbance having occurred under this Notification by the former operator. The attached scope and work map is the total amount of work or disturbance approved under this Notification and any work or disturbance already performed by the former operator will count against what still may be completed.

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on September 26, 2023 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Jennifer Walters

A/Chief of Mining Land Use
