Dear Stephen Rennalls,

Re: Class 1 Notification Q2023_0171 - Cliff Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2023_0171 is valid as of June 19, 2023.

Your Class 1 Notification and proposed work program (June 19, 2023 - July 24, 2023) is allowed to proceed with the following terms and conditions:

1. The notification area overlaps with a raptor nesting wildlife key area and mapped nest sites. The operator shall contact the Kluane Regional Biologist at 867-634-2439 for further information on the location of the nest(s) and appropriate setback distances.
2. The operator shall plan flight routes to avoid flying over any observed active raptor nests, or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.
3. The operator shall not fly unmanned aerial vehicles (drones) within 500 m of a known or observed active raptor nest during the nesting period (May 1 - August 15).

4. The location of active raptor nests identified by the operator shall be reported to the Kluane Regional Biologist 867-634-2439 and the Environment Yukon, Conservation Data Centre (yukoncdc@yukon.ca).
5. The operator shall avoid land clearing within 1 km of any observed active raptor nests between May 1st and August 15th.
6. No Class 1 activities shall occur within sheep lambing wildlife key area, as identified on the map, between May 1st and June 15th.
7. The operator shall suspend exploration activities if sheep are observed within 1 km of active work areas, until they move off on their own accord.
8. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Sheep Country" (<https://yukon.ca/en/flying-sheep-country>)
9. The operator shall install and maintain safety fencing around all trenches/shafts deeper than two meters and install covers over the openings of all trenches/shafts with a material capable of preventing people or wildlife from inadvertently falling into the trenches/shafts.
10. Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as the earthworks is no longer required for mining purposes, or prior to the end of the work program date identified in this Class 1, whichever occurs first.
11. Please note that, due to the size of the notification area, the preliminary heritage desktop review was limited to proposed work areas. If work locations change, the operator shall contact heritage.review@yukon.ca prior to conducting any land-altering activities, as additional heritage review may be required.
12. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact heritage.review@yukon.ca for more information on the areas of heritage potential or to discuss potential mitigation options.
13. There is a known mineral lick(s) in the vicinity of the project area. The operator shall contact the Kluane Regional Biologist (867-634-2439) for information on the exact location of mineral lick(s) in the vicinity of the project area. If a mineral lick is identified within the project area, the operator shall maintain a 100m no-disturbance buffer around the location of the mineral lick unless specified in writing from the Manager, Mining Land Use. Until the operator contacts the Regional Biologist for the location of the mineral lick, the mineral lick identified on Geo Yukon as WKA ID 3299 shall be used as no-disturbance area
14. The operator shall communicate plans and timing of activities to affected CAFN and other land and resource users as soon as practicable and prior to the commencement of project activities to identify potential land use conflicts and any potential negative effects on other users. The operator shall make best effort to resolve these issues.
15. The operator shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on June 18, 2024 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Paul Inglis

A handwritten signature in blue ink that reads "Paul Inglis". The signature is fluid and cursive, with the first name "Paul" and last name "Inglis" clearly legible.
