Dear Isaac Fage,

Re: Class 1 Notification Q2023\_0202 - Ballarat Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2023\_0202 is valid as of July 19, 2023.

Your Class 1 Notification and proposed work program (July 19, 2023 - December 31, 2023) is allowed to proceed with the following terms and conditions:

1. There is a known mineral lick(s) in the vicinity of the project area. The operator shall contact the Mayo Regional Biologist (867-996-2162) for information on the exact location of mineral lick(s) in the vicinity of the project area. If a mineral lick is identified within the project area, the operator shall maintain a 100m no-disturbance buffer around the location of the mineral lick unless specified in writing from the Manager, Mining Land Use.
2. The operator shall suspend exploration activities if caribou are observed within 1 km of active work areas, until they move off on their own accord.

3. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>).
4. Should project activities extend into November and/or December, the operator shall contact the Migratory Caribou Biologist (867-993-2952) weekly to obtain migration and movement updates on the Fortymile caribou herd.
5. The notification area overlaps with a moose late-winter range wildlife key area. Activities have been proposed to occur year round. As such, the operator should plan activities to avoid use of the area in late-winter (Jan 1st – April 1st).
6. Any moose encountered on the claim block shall be given the right-of-way until they move off on their own accord.
7. The operator shall suspend exploration activities if sheep are observed within 1 km of active work areas, until they move off on their own accord.
8. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Sheep Country" (<https://yukon.ca/en/flying-sheep-country>).
9. The notification area overlaps with a raptor nesting wildlife key area and mapped nest sites. The operator shall contact the regional biologist at 867-996-2162 for further information on the location of the nest(s) and appropriate setback distances.
10. The location of active raptor nests identified by the operator shall be reported to the Regional Biologist (xxx-xxx-xxxx) and the Environment Yukon, Conservation Data Centre ([yukoncdc@yukon.ca](mailto:yukoncdc@yukon.ca)).
11. The operator shall plan flight routes to avoid flying over any observed active raptor nests, or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.
12. The operator shall install an electric fence around the food preparation and storage area, grey water sump, and incinerator.
13. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.
14. The notification area is in a fossil-bearing drainage. As per the Schedule 1 Operating Conditions, all palaeontological resources uncovered during operations must be reported to the Government of Yukon and the Yukon First Nation on whose traditional territory the resources are uncovered.
15. There are documented archaeological sites within the notification area, as identified on the map provided. The operator shall not conduct any land-altering activities within 30 m of the(se) site(s) unless prior approval has been granted by the Manager, Mining Land Use. The operator is encouraged to contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for information on the archaeological sites.
16. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for more information on the areas of heritage potential or to discuss potential mitigation options.
17. Please note that, due to the size of the notification area, the preliminary heritage

desktop review was limited to proposed camp areas within the soil grids. If the proponent identifies work that involves land-altering activities outside the assessed areas the operator shall contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) prior to conducting any land-altering activities, as additional heritage review may be required. At this time no additional land-altering activity shall take place outside the assessed claims, until clearance has been given for heritage values (other than general rock/ soil sampling, prospecting, and LiDAR survey).

Security may be required at any time by the Chief. The operator must furnish security within thirty (30) days of receiving the written notice from the Chief of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on July 18, 2024 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-993-5343, fax at 867-993-6747, or email at [dawson.mining@yukon.ca](mailto:dawson.mining@yukon.ca).

Sincerely,  
Paul Inglis

A handwritten signature in blue ink that reads "Paul Inglis". The signature is fluid and cursive, with the first name "Paul" and last name "Inglis" clearly legible.

A/Manager, Mining Land Use
