Dear Cooper Campbell,

Re: Class 1 Notification Q2024_0044 - FLR-RJ Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2024_0044 is valid as of April 09, 2024.

Your Class 1 Notification and proposed work program (April 09, 2024 - April 08, 2025) is allowed to proceed with the following terms and conditions:

1. The Proponent shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the Proponent shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 notification. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return of wetland benefits to those areas.

3. The notification area overlaps with a moose late-winter range wildlife key area. Typically, placer exploration activities are carried out outside of winter months, however, activities have been proposed to occur year round. As such, the operator should plan activities to avoid use of the area in late-winter (Jan 1st – April 30th).
4. The notification area is in a fossil-bearing drainage. As per the Schedule 1 Operating Conditions, all palaeontological resources uncovered during operations must be reported to the Government of Yukon and the affected First Nation on whose traditional territory the resources are uncovered.
5. Heritage values outside of the camp location were not reviewed based on the proposed scope of activities within the notification area. Other than general rock/soil sampling, prospecting, and airborne survey, no additional land-altering activity shall take place within the project claims, until clearance has been given for heritage values. Should the operator decide to conduct additional work, the operator must apply for an amended work program.
6. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>) and "Flying in Sheep Country" (<https://yukon.ca/sites/yukon.ca/files/env/env-flying-sheep-country.pdf>).
7. The proponent shall communicate plans and timing of activities to the First Nation of Nacho Nyak Dun Lands and Resources Department (867-996-2265).
8. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of the First Nation of Nacho Nyak Dun (867-996-2265 ext.133) in addition to the Government of Yukon, Manager, Mining Lands and Heritage Department.
9. You are reminded of Schedule 1 Operating Condition #17 which states: "A spill contingency plan for petroleum products and other hazardous substances must be prepared and posted in the camp and at all fuel handling locations used in carrying out the operation."
10. The operator shall suspend exploration activities if caribou or moose are observed within 1 km of active work areas, until they move off on their own accord.
11. The Proponent shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.
12. The operator shall install an electric fence around the food preparation and storage area, grey water sump, and incinerator.
13. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.
14. The operator shall cease activities in caribou fall breeding wildlife key areas, as identified on GeoYukon, by September 15th.
15. Project activities should avoid the caribou late winter timing window between January 1 and April 30.
16. There is a known mineral lick(s) in the vicinity of the project area. The operator shall contact the Wildlife Key Area program (wka@yukon.ca) for information on the exact

location of mineral lick(s) in the vicinity of the project area. If a mineral lick is identified within the project area, the operator shall maintain a 100m no-disturbance buffer around the location of the mineral lick unless specified in writing from the Manager, Mining Land Use.

17. The operator shall plan flight routes to avoid flying over any observed active raptor nests, or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.
18. No Class 1 activities shall occur within sheep lambing wildlife key area, as identified on the map, between May 1st and June 15th.
19. Management of attractants and use of deterrents are effective ways to reduce conflict with bears. The Dawson Conservation Office (867993-8492) should be contacted in the event of ongoing bear presence/habituation at the camp.
20. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of Tr'ondëk Hwëch'in First Nation (867-993-7100), in addition to the Government of Yukon, Manager, Mining Lands and Heritage Branch.
21. The operator shall submit a summary of project activities to Yukon Environment (Joel.Potie@yukon.ca, Northern Tutchone Biologist) at the end of the season. The summary shall include: Shape files of Class 1 land disturbance activities, Wildlife log detailing caribou and moose interactions and mitigations to minimize interaction with caribou, and Observation of other land use activities such as recreational (if any).
22. Please note that, due to the size of the notification area, the preliminary heritage desktop review was limited to proposed work areas. If work locations change, the operator shall contact heritage.review@yukon.ca prior to conducting any land-altering activities, as additional heritage review may be required.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on April 08, 2025 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*

. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-993-5343, fax at 867-993-6747, or email at dawson.mining@yukon.ca.

Sincerely,
Paul Inglis

A handwritten signature in blue ink that reads "Paul Inglis". The signature is fluid and cursive, with the first name "Paul" and last name "Inglis" clearly legible.
