

March 2, 2020

Mr. Todd Powell
Director, Mineral Resources
Yukon Government – Department of Energy, Mines & Resources
#400-211 Main Street, Box 2703
Whitehorse, Yukon Y1A 2C6

Dear Mr. Powell,

RE: Quartz Mining License QML-0011 Quarterly Wildlife Report

Paragraph 13.8 of the Quartz Mining License QML-0011 issued to StrataGold Corporation requires the Licensee to provide quarterly monitoring reports of wildlife observations and incidents to the Director and the Inspector on the first working day in March, June, September and December of each year. The information contained herein with respect to wildlife reporting represents the quarterly monitoring report and includes all observations collected in December, January, and February in 2019 and 2020 (Table 1).

Site activities were ongoing through the reporting period with multiple wildlife observations and no wildlife incidents recorded. Observations of foxes continued throughout the quarter, mainly in proximity to the camp and areas of mining activity. The majority of moose were observed on the Haggart Creek Access Road. Extreme cold temperatures were recorded throughout December to February.

Wildlife mitigation measures continue to be implemented through mandatory Project site orientation, traffic control policies, training and implementation of the Project's management plans including the wildlife observation reporting program.

Please do not hesitate to contact me with any questions or concerns related to this report.

Sincerely,

Lindsay Rear
Environmental Manager
Victoria Gold Corp. (Yukon)
