Dear Mr. Holmes,

RE: Quartz Mining Licence QML-0011 Quarterly Wildlife Report Spring 2018

Paragraph 13.8 of the Quartz Mining License QML-0011 issued to StrataGold Corporation requires the Licensee to provide quarterly monitoring reports on wildlife observations and incidents to the Director and the Inspector on the first working day in March, June, September, and December of each year. The information contained herein with respect to wildlife reporting represents the forth quarterly monitoring report since commencement of the Eagle Gold Project Undertaking in August 2017, and includes all observations collected throughout the spring monitoring period of March 2018 to the end of May 2018 (Table 1).

No wildlife incidents were recorded during this reporting period. Site activities were minimal until construction restart on March 12, 2018. Wildlife mitigation measures continue to be implemented through site orientation/policies training and implementation of the Project's management plans including the wildlife observation reporting program.

Please do not hesitate to contact me with any questions or concerns related to this report.

Sincerely,

A handwritten signature in blue ink, appearing to read 'H Coyle', with a long horizontal flourish extending to the right.

Hugh Coyle
Lands & Permitting Manager
StrataGold Corporation
