Dear Mr. Holmes,

RE: Quartz Mining Licence QML-0011 Quarterly Wildlife Report Summer 2018

Paragraph 13.8 of the Quartz Mining License QML-0011 issued to StrataGold Corporation requires the Licensee to provide quarterly monitoring reports on wildlife observations and incidents to the Director and the Inspector on the first working day in March, June, September, and December of each year. The information contained herein with respect to wildlife reporting represents the quarterly monitoring report and includes all observations collected in June, July and August 2018.

Minor wildlife incidents were recorded during this reporting period, involving one bird fatality on the site access road, removal of two squirrel middens from a work area, and the incidental relocation of an active bird nest residing within site infrastructure.

Site activities were ongoing through the reporting period with multiple wildlife observations. Wildlife mitigation measures continue to be implemented through mandatory Project site orientation, traffic control policies, training and implementation of the Project's management plans including the wildlife observation reporting program.

Please do not hesitate to contact me with any questions or concerns related to this report.

Sincerely,

A handwritten signature in blue ink, appearing to read 'H. Coyle', with a long horizontal flourish extending to the right.

Hugh Coyle
Lands & Permitting Manager
StrataGold Corporation

Table 1: Wildlife Observations and Incidents Tracking, Eagle Gold Project Undertaking to August 2018

Date	Time (24 HR)	Weather	Species	Number of Animals	Sex (M/F)	Age / Class	Type of Sign	Location	Behaviour	Additional Comments
JUNE
