Dear Kiril Chaschin Jr.,

Re: Class 1 Notification P2025\_0280 - IW00925 Rowlinson Creek Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2025\_0280 is valid as of May 07, 2026.

Your Class 1 Notification and proposed work program (May 07, 2026 - May 07, 2027) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation

shall be done in a manner that supports the return of wetland benefits to those areas.

3. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for more information on the areas of heritage potential or to discuss potential mitigation options.
4. The operator shall allow unimpeded access through the project site to First Nation citizens undergoing traditional pursuits or ceremonial purposes.
5. The operator shall communicate plans and timing of activities to Little Salmon / Carmacks First Nation Lands and Resources Department 867-393-5083 and other land and resource users (i.e. outfitters and trappers) as soon as practicable and prior to the commencement of project activities to identify potential land use conflicts and any other potential negative effects on other users. The operator shall make best efforts to resolve these issues.
6. Upon discovery of a heritage resource, the operator shall notify Little Salmon Carmacks First Nation Heritage Manager at (867) 863-5831 or [toni.blanchard@lscfn.ca](mailto:toni.blanchard@lscfn.ca).
7. Please note, that a leave strip is required for all placer streams for the protection of riparian areas. This creek has a low habitat suitability classification, as defined in the Fish Habitat Management System for Yukon's Placer Mining, requiring a 5 meter leave strip. Please see the document attached for more information and appropriate setbacks. Please also note, Schedule 1 Operating Condition #33 that states "all reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law." Any deposit of waste (i.e. dirty water) requires the activity to be licensed regardless of the quantity of water being disposed.
8. The operator shall suspend exploration activities if ungulates are observed from active work areas, until they move off on their own accord.
9. Earthworks shall be sloped at one end to allow for wildlife escapement. The operator shall backfill each trench once a geological evaluation of the trench has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
10. Drill holes shall be decommissioned and backfilled or plugged to avoid wildlife entrapment.
11. The notification area overlaps with trapping concession #196 and may overlap with other users, such as recreational tour guide companies. You are encouraged to communicate plans and timing of activities to other land and resource users that may be affected by the proposed notification activities (e.g. trapper, outfitter, Wilderness Tourism Association of Yukon, etc.). This should be completed as soon as practicable and prior to the commencement of notification activities to identify potential land use conflicts that may negatively affect other land users. The operator shall make best efforts to resolve these issues.
12. The operator is reminded of section 5 of the Placer Mining Land Use Regulation which states "It is an operating condition of a Class 1 operation that no person shall, within 300 m of a dwelling place, carry out any drilling activity or any activity referred to in column 1 of the table to section 3 of the Placer Land Use Regulation, other than

an activity set out in item 2, 3, 6, or 14 of that table, without the prior consent of the owner and the occupant of the dwelling-place." The operator shall ensure appropriate consent is provided in writing.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Placer Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on May 07, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at [whitehorse.mining@yukon.ca](mailto:whitehorse.mining@yukon.ca).

Sincerely,  
Janet Bell-MacDonald
