Dear Nathan Mole,

Re: Class 1 Notification P2026_0186 - Becker 2026 Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2026_0186 is valid as of July 13, 2026.

Your Class 1 Notification and proposed work program (July 13, 2026 - July 12, 2027) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 Notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports

the return of wetland benefits to those areas.

3. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Manager, Mining Land Use. The operator may contact heritage.review@yukon.ca for more information on the areas of heritage potential or to discuss potential mitigation options.
4. The operator shall suspend exploration activities if ungulates are observed from active work areas, until they move off on their own accord.
5. The operator shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.
6. The operator shall maintain a 50m no disturbance buffer around known and observed raptor nests from April 1 - September 30. If two or more nests are within 100m of each other they shall be considered as one nest site and a 50m buffer applied around the whole area. The operator shall make best efforts to not island raptor nests, allowing for connectivity to the forest from nest sites. The operator shall contact the Wildlife Key Area (WKA) program (wka@yukon.ca), for information on known raptor nests within the project area. The operator shall report any observed nests to the WKA program.
7. The Operator shall store all attractants, including garbage, food, food waste and strained solids from grey water in a container that prevents access by bears and other wildlife until attractants have been removed from the project site.
8. The operator shall not restrict access, availability, or use of the area to First Nation citizens for traditional pursuits or ceremonial purposes.
9. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of Carcross/Tagish First Nation, Department of Lands and Natural Resources by email Amaya.cherian-hall@ctfn.ca and jennie.long@ctfn.ca, in addition to the Government of Yukon, Manager, Mining Land Use and Heritage Department. A 30m buffer shall be maintained around any discovered or known heritage resource.
10. The operator shall not conduct any land-altering activities within 30m of a discovered heritage resource unless prior approval has been granted, in writing, by the Manager, Mining Land Use. The operator is encouraged to contact heritage.review@yukon.ca for information.
11. The operator shall communicate plans and timing of activities to Carcross/Tagish First Nation, Department of Lands and Natural Resources by email Amaya.cherian-hall@ctfn.ca and jennie.long@ctfn.ca. The operator shall make best efforts to resolve these issues.
12. The notification area overlaps with trapping concession #304 and may overlap with other users, such as recreational tour guide companies. You are encouraged to communicate plans and timing of activities to other land and resource users that may be affected by the proposed notification activities (e.g. trapper, outfitter, Wilderness Tourism Association of Yukon, etc.). This should be completed as soon as practicable and prior to the commencement of notification activities to identify potential land use conflicts that may negatively effect other land users. The operator shall make best efforts to resolve these issues.

13. The operator shall ensure trenches are sloped on at least one end at a grade shallow enough to allow wildlife to exit the trench.
14. The operator shall backfill each trench once a geological evaluation of the trench has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
15. The operator shall not alter, disturb, or destroy any existing roads or trails.
16. While a trench needs to remain accessible during this Notification, the operator shall install fencing around the trench, cover the opening with logs, or use a similar method to discourage ungulate wildlife from entering the trench.
17. Please note, that a leave strip is required for all placer streams for the protection of riparian areas, and its dimensions are dependent on the stream's habitat suitability classification as defined in the Fish Habitat Management System for Yukon's Placer Mining. Please see the document attached for more information and appropriate setbacks. Please also note, Schedule 1 Operating Condition "all reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law." Any deposit of waste (i.e. dirty water) requires the activity to be licensed regardless of the quantity of water being disposed.
18. You are reminded of Schedule 1 Operating Condition #17 which states: "A spill contingency plan for petroleum products and other hazardous substances must be prepared and posted in the camp and at all fuel handling locations used in carrying out the operation."
19. All refueling and equipment repairs involving fluids such as fuel or lubricants will occur at least 30 m from all watercourses.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Placer Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on July 12, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*

. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Trevor Ellis
