Dear Callum Ryan,

Re: Class 1 Notification P2026_0229 - Wolverine Creek Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2026_0229 is valid as of July 21, 2026.

Your Class 1 Notification and proposed work program (July 21, 2026 - July 21, 2027) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 Notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation

shall be done in a manner that supports the return of wetland benefits to those areas.

3. The Operator shall store all attractants, including garbage, food, food waste and strained solids from grey water in a container that prevents access by bears and other wildlife until attractants have been removed from the project site.
4. Management of attractants and use of deterrents are effective ways to reduce conflict with bears. The operator shall report to the TIPP line (1-800-661-0525) any wildlife incident, mortality and/or ongoing bear presence/habituation.
5. The operator shall suspend exploration activities if caribou are observed from active work areas, until they move off on their own accord.
6. The operator shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.
7. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>). When possible flights should be consolidated to reduce the overall disturbance to wildlife from flights.
8. The operator shall cease project activities in caribou late winter wildlife key areas (WKA ID 4313), as identified on GeoYukon, between February 1 - April 30.
9. Drill holes shall be decommissioned and backfilled or plugged to avoid wildlife entrapment.
10. The operator shall backfill each trench/shaft once a geological evaluation of the trench/shaft has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
11. Rusty Blackbird are a species of Special Concern and are expected to be present in the project area, especially in forest areas near wetlands and water. The operator shall take care to prevent harming Rusty Blackbird and shall undertake non-intrusive surveys for Rusty Blackbird prior to clearing activities occurring. If the operator observes confirmed or suspected Rusty Blackbird, these sightings should be reported to the Environment Yukon, Conservation Data Centre (yukoncdc@yukon.ca).
12. Little Brown Myotis (bat) are an Endangered species and are expected to be present in the project area, especially in forests near ponds and in dead trees, rock crevices, or any tree with cavities or loose bark. The operator shall take care to prevent harming Little Brown Myotis and shall undertake non-intrusive surveys for Little Brown Myotis prior to clearing activities occurring. Any trees where signs of bats are present shall not be disturbed. If the operator observes confirmed or suspected Little Brown Myotis, these sightings should be reported to the Environment Yukon, Conservation Data Centre (yukoncdc@yukon.ca).
13. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Manager, Mining Land Use. The operator may contact heritage.review@yukon.ca for more information on the areas of heritage potential or to discuss potential mitigation options.
14. While a trench/shaft needs to remain accessible during this Notification, the operator shall install fencing around the trench/shaft, cover the opening with logs, or use a

similar method to prevent people or wildlife from inadvertently falling into the trench/shaft.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Placer Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on July 21, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Diana Shawcross
