Dear David Millier,

Re: Class 1 Notification P2026_0269 - ID02226 1st ren Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification P2026_0269 is valid as of August 04, 2026.

Your Class 1 Notification and proposed work program (August 04, 2026 - June 25, 2027) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 Notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating

Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return of wetland benefits to those areas.

3. The notification area is in a fossil-bearing drainage. As per the Schedule 1 Operating Conditions, all palaeontological resources uncovered during operations must be reported to the Government of Yukon and the affected First Nation on whose traditional territory the resources are uncovered.
4. Management of attractants and use of deterrents are effective ways to reduce conflict with bears. The operator shall report to the TIPP line (1-800-661-0525) any wildlife incident, mortality and/or ongoing bear presence/habitation.
5. The Operator shall store all attractants, including garbage, food, food waste and strained solids from grey water in a container that prevents access by bears and other wildlife until attractants have been removed from the project site.
6. The operator shall suspend exploration activities if ungulates are observed from active work areas, until they move off on their own accord.
7. The notification area overlaps with a moose late-winter range wildlife key area. Typically, placer exploration activities are carried out outside of winter months, however, activities have been proposed to occur year round. As such, the operator should plan activities to avoid use of the area in late-winter (February 1 – April 30).
8. If the operator identifies a sharp-tail grouse lek, they shall report its location to the Wildlife Key Area program (wka@yukon.ca). Activities shall not occur: a) April 1 - 20 between 5:00am and 10:00am within 500m of an identified lek. b) April 20 - May 4 between 5:00am and 10:00am within 1km of an identified lek.
9. The operator shall ensure trenches are sloped on at least one end at a grade shallow enough to allow wildlife to exit the trench.
10. The operator shall backfill each trench/shaft once a geological evaluation of the trench/shaft has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
11. The operator should become familiar with the identification of Woodchuck. Information on this species can be found online at: <https://yukon.ca/en/woodchuck>. If active Woodchuck burrows are detected within the project area, they should be avoided during project activities. The operator shall report any observations of Woodchuck or active burrows, with location and any associated photos, to the Yukon Conservation Data Centre at: yukoncdc@yukon.ca.
12. The operator shall communicate plans and timing of activities to the First Nation of Nacho Nyak Dun Lands and Resources Department (867-996-2265) and Tr'ondëk Hwëch'in Lands and Resources Department (867-993-7100). The operator shall make best efforts to resolve any potential concerns identified.
13. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of the First Nation of Nacho Nyak Dun (867-996-2265 ext.133) and Tr'ondëk Hwëch'in Lands and Resources Department (867-993-7100) in addition to the Government of Yukon, Manager, Mining Lands and Heritage Department.
14. The operator shall share fish and wildlife observation information (e.g. wildlife logs, seasonal reports etc.), shared with other agencies (e.g. YG biologists, Yukon Conservation Data Center etc.), with the First Nation of Nacho Nyak Dun's Land and

Resources Department (867) 996-2265 and Tr'ondëk Hwëch'in Lands and Resources Department: (867) 993-7100, prior to the expiry of this Notification.

15. Please note, that a leave strip is required for all placer streams for the protection of riparian areas, and its dimensions are dependent on the stream's habitat suitability classification as defined in the Fish Habitat Management System for Yukon's Placer Mining. Please see the document attached for more information and appropriate setbacks. Please also note, Schedule 1 Operating Condition "all reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law." Any deposit of waste (i.e. dirty water) requires the activity to be licensed regardless of the quantity of water being disposed.
16. The notification area overlaps with trapping concession 54 and may overlap with other users, such as recreational tour guide companies. You are encouraged to communicate plans and timing of activities to other land and resource users that may be affected by the proposed notification activities (e.g. trapper, outfitter, Wilderness Tourism Association of Yukon, etc.). This should be completed as soon as practicable and prior to the commencement of notification activities to identify potential land use conflicts that may negatively effect other land users. The operator shall make best efforts to resolve these issues.
17. The operator shall install and maintain safety fencing around all trenches/shafts deeper than two meters and install covers over the openings of all trenches/shafts with material capable of preventing people or wildlife from inadvertently falling into the trenches/shafts.
18. If active bird nests are discovered, project activities shall be postponed in the nesting area until nesting is complete. Refer to avoidance measures link: <https://iaac-aeic.gc.ca/050/documents/p80054/121249E.pdf>.
19. Off road use in the summer should be kept to a minimum, as much as possible.
20. Clearings shall be limited to the size and number required for the activities conducted under this Class 1, and cannot be established for future work plans.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Placer Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Placer Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be

accepted by the Mining Recorder.

Please note: the notification will expire on June 25, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Placer Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-993-5343, fax at 867-993-6747, or email at dawson.mining@yukon.ca.

Sincerely,
Trevor Ellis

A/Manager, Mining Land Use
