Dear Heather Burrell,

Re: Class 1 Notification Q2025\_0115 - Veronica Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2025\_0115 is valid as of July 17, 2025.

Your Class 1 Notification and proposed work program (July 17, 2025 - July 16, 2026) is allowed to proceed with the following terms and conditions:

1. If heritage resources (i.e. Historic/archaeological, paleontological or human remains) are accidentally discovered during operations, they shall be immediately flagged and protected from further disturbance by stopping work in the immediate area.
2. Please note that, due to the size of the notification area, the preliminary heritage desktop review was limited to proposed work areas. If work locations change, the operator shall contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) prior to conducting any land-altering activities, as additional heritage review may be required.
3. The map provided identifies areas with elevated potential for heritage resources. The

operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for more information on the areas of heritage potential or to discuss potential mitigation options.

4. Upon discovery of a heritage resource, the proponent shall notify Liard First Nation (867-536-7901), in addition to the Government of Yukon, Manager, Mining Land Use and Heritage Department. The operator shall not conduct any land-altering activities within 30 m of a discovered heritage resource unless prior approval has been granted, in writing, by the Manager, Mining Land Use. The operator is encouraged to contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for information.
5. The operator shall follow Best Management Practices (BMP) and industry guidelines. A copy of industry BMP for Heritage Resources can be downloaded at: <https://yukon.ca/en/yukon-mineral-exploration-best-management-practices-heritage-resources>.
6. The operator shall not restrict access, availability, or use of the area for traditional harvest or ceremonial purposes.
7. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
8. All reclamation must be completed prior to the end of the work program date identified in this Class 1 notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return of wetland benefits to those areas.
9. The operator shall suspend exploration activities if caribou are observed within active work areas, until they move off on their own accord.
10. The operator shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.
11. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>).
12. The operator shall ensure trenches are sloped on at least one end at a grade shallow enough to allow ungulates to exit the trench.
13. The operator shall communicate plans and timing of activities to the Liard First Nation Lands and Resources Department (867-536-5200), and Ross River Dena Council Lands and Resources Department (867-969-2277 ex.204) and other land and resource users as soon as practicable and prior to the commencement of project activities to identify potential land use conflicts and any potential negative effects on other users. The operator shall make best efforts to resolve these issues.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on July 16, 2026 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-536-7366, fax at 867-536-7842, or email at [watson.mining@yukon.ca](mailto:watson.mining@yukon.ca).

Sincerely,  
Paul Stintzi

A/Manager, Mining Land Use
