Dear Andrew Turner,

Re: Class 1 Notification Q2025_0163 - Rogue Einarson Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2025_0163 is valid as of July 05, 2025.

Your Class 1 Notification and proposed work program (July 05, 2025 - July 04, 2026) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation

shall be done in a manner that supports the return of wetland benefits to those areas.

3. The operator shall communicate plans and timing of activities to the First Nation of Nacho Nyak Dun Lands and Resources Department (867-996-2265) as well as to The Ross River Dena Council TAP Coordinator (tulidliniassessment@rrdc.ca).
4. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of the First Nation of Nacho Nyak Dun (867-996-2265 ext.133), the TAP Coordinator for Ross River Dena Council (tulidliniassessment@rrdc.ca) in addition to the Government of Yukon, Manager, Mining Lands and Heritage Department.
5. The operator shall suspend all activities if caribou are observed within active work areas until caribou move off on their own accord.
6. Drill holes shall be decommissioned and backfilled or plugged to avoid wildlife entrapment.
7. You are reminded of Schedule 1 Operating Condition #17 which states: "A spill contingency plan for petroleum products and other hazardous substances must be prepared and posted in the camp and at all fuel handling locations used in carrying out the operation."
8. The operator shall share fish and wildlife observation information (e.g. wildlife logs, seasonal reports etc.), shared with other agencies (e.g. YG biologists, Yukon Conservation Data Center etc.), with the First Nation of Nacho Nyak Dun's Land and Resources Department (867)996-2265, as well as the TAP Coordinator at Ross River Dena Council (tulidliniassessment@rrdc.ca) prior to the expiry of this Notification.
9. The operator shall store all attractants, including garbage, kitchen waste and strained solids from grey water in a container that prevents access by bears and other wildlife, until properly disposed of according to the Solid Waste Regulation or burned daily to ash by forced air and fuel fired incineration according to the Air Emissions Regulations.
10. The operator shall install an electric fence around the food preparation and storage area, grey water sump, and incinerator.
11. Management of attractants and use of deterrents are effective ways to reduce conflict with bears. The operator shall report any incidents involving nuisance bears or wildlife exhibiting food condition or habituation to the Ross River Conservation Officer (867-969-2202).
12. The operator shall not fly unmanned aerial vehicles (drones) within 500 m of a known or observed active raptor nest during the nesting period (May 1 - August 15).
13. The operator should plan flight routes to avoid flying over any observed active raptor nests during the nesting season (May 1 to August 15), or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.
14. The location of active raptor nests identified by the operator shall be reported to Environment Yukon, Wildlife Key Area program (wka@yukon.ca).
15. The Operator shall avoid land clearing within 1 km of observed raptor nests between May 1 and August 31.
16. No Class 1 activities shall occur within sheep lambing wildlife key area, as identified on the map, between May 1st and June 15th.
17. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Sheep Country"

- (<https://yukon.ca/en/flying-sheep-country>).
18. The operator shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.
 19. The operator shall cease activities in caribou fall breeding wildlife key areas, as identified on GeoYukon, between September 15th and October 15th.
 20. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>).
 21. The operator shall submit a summary of project activities to Yukon Environment (Northern Tutchone Regional Biologist, 867-996-2016) at the end of the season. The summary shall include (1) shape files of Class 1 land disturbance and reclamation activities and (2) wildlife log detailing wildlife interactions and mitigations to minimize interaction with wildlife.
 22. The operator should consolidate flights to reduce the amount of disturbance to wildlife.
 23. While a shaft needs to remain accessible during this Notification, the operator shall install fencing around the shaft, cover the opening with logs, or use a similar method to discourage ungulate wildlife from entering the shaft.
 24. The operator shall backfill each trench/shaft once a geological evaluation of the trench/shaft has been completed or prior to the end of the work program date identified in this Class 1, whichever occurs first.
 25. Earthworks shall be sloped at one end to allow for wildlife escapement and shall be reclaimed as soon as the earthworks is no longer required for mining purposes, or prior to the end of the work program date identified in this Class 1, whichever occurs first.
 26. Rusty Blackbird are a species of Special Concern and are expected to be present in the project area, especially in forest areas near wetlands and water. The operator shall take care to prevent harming Rusty Blackbird as well as become familiar with the identification of this species <https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry/recovery-strategies/little-brown-myotis-2018.html>. If the operator observes confirmed or suspected Rusty Blackbird, these sightings should be reported to the Environment Yukon, Conservation Data Centre (yukoncdc@yukon.ca).
 27. The operator should avoid disturbing areas with significant moss coverage wherever possible. If necessary for project activities, attempts should be made to replace disturbed mosses in a similar habitat nearby.
 28. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Heritage Resources Unit. The operator may contact heritage.review@yukon.ca for more information on the areas of heritage potential or to discuss potential mitigation options.
 29. Please note that, due to the size of the notification area, the preliminary heritage desktop review was limited to proposed work areas. If work locations change, the operator shall contact heritage.review@yukon.ca prior to conducting any land-altering activities, as additional heritage review may be required.

30. The operator shall conduct pre-activity surveys for Collared Pika and Collared Pika habitat (eg. talus slopes) prior to ground disturbing activities, within the work site area, in accordance with YG's Protocol for detecting Collared Pika, <https://yukon.ca/sites/default/files/env/env-protocol-detecting-collared-pika.pdf>. If Collared Pika are identified during the survey the operator shall maintain a 30m buffer around the area. The operator should report sightings of Collared Pika to the Yukon Conservation Data Centre (yukoncdc@yukon.ca).
31. The operator shall suspend exploration activities if sheep are observed from active work areas, until they move off on their own accord.
32. The operator should become familiar with the identification of American Alpine Lady Fern . If American Alpine Lady Fern is observed during project activities, further work should be planned to avoid individual plants where possible and its location recorded; information should be shared with Yukon Conservation Data Center at yukoncdc@yukon.ca. An information sheet on American Alpine Lady Fern is attached and available at <https://yukon.ca/en/american-alpine-lady-fern>.
33. The operator shall become familiar with the identification of Northern Beech Fern and typical habitat (wet, rocky areas) for the species in Yukon. Information on this species can be found online at: <https://yukon.ca/sites/default/files/env/env-northern-beech-fern.pdf>. If Northern Beech Fern is observed during project activities, further work should be planned to avoid individual plants where possible and its location recorded; information should be shared with Yukon Conservation Data Center at yukoncdc@yukon.ca.
34. There is a known mineral lick(s) in the vicinity of the project area. The operator shall contact the Wildlife Key Area Program (wka@yukon.ca) for information on the exact location of mineral lick(s) in the vicinity of the project area. If a mineral lick is identified within the project area, the operator shall maintain a 100m no-disturbance buffer around the location of the mineral lick unless specified in writing from the Manager, Mining Land Use.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be

accepted by the Mining Recorder.

Please note: the notification will expire on July 04, 2026 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-996-2256, fax at 867-996-2617, or email at mayo.mining@yukon.ca.

Sincerely,
Jennifer Walters

A/Manager, Mining Land Use
