Dear Erini Petroutsas,

Re: Class 1 Notification Q2026\_0108 - Bonanza Bear Hardrock Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2026\_0108 is valid as of June 05, 2026.

Your Class 1 Notification and proposed work program (June 06, 2026 - June 04, 2027) is allowed to proceed with the following terms and conditions:

1. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Manager, Mining Land Use. The operator may contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for more information on the areas of heritage potential or to discuss potential mitigation options.
2. Please note that, due to the size of the notification area, the preliminary heritage desktop review was limited to proposed work areas. Any changes to the proposed work locations submitted in this Class 1 Notification will require an amendment.

- Please contact your district Mining Records office for more information.
3. The notification area is in a fossil-bearing drainage. As per the Schedule 1 Operating Conditions, all palaeontological resources uncovered during operations must be reported to the Government of Yukon and the affected First Nation on whose traditional territory the resources are uncovered.
  4. There are documented historical features within the notification area, as identified on the map provided. The operator shall not conduct any land-altering activities within 30 m of the(se) site(s) unless prior approval has been granted by the Manager, Mining Land Use. The operator is encouraged to contact the Historic Sites Unit ([historic.sites@yukon.ca](mailto:historic.sites@yukon.ca)) for more information on the historic features.
  5. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
  6. All reclamation must be completed prior to the end of the work program date identified in this Class 1 Notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return of wetland benefits to those areas.
  7. The claim(s) included in the notification overlaps with wildlife key area for moose. To reduce impacts to moose, best management practices are encouraged and all wildlife should be given the right of way.
  8. There are documented historical features (the Yukon Ditch) within the notification area, as identified on the map provided. The operator shall not engage in ground-disturbing activities within 30 m of the historic feature unless prior approval has been granted by the Chief of Mining Land Use. The operator is encouraged to contact the Historic Sites Unit ([historic.sites@yukon.ca](mailto:historic.sites@yukon.ca)) for more information on the historic sites/reserves prior to conducting any potentially ground disturbing activities.
  9. There are documented historical features (the Klondike Mines Railway & the Dawson Overlap Trail) within the notification area, as identified on the map provided. The operator is encouraged to contact the Historic Sites Unit ([historic.sites@yukon.ca](mailto:historic.sites@yukon.ca)) for more information on the historic features.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

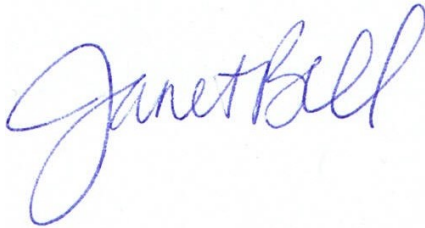

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases

until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on June 04, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-993-5343, fax at 867-993-6747, or email at [dawson.mining@yukon.ca](mailto:dawson.mining@yukon.ca).

Sincerely,  
Janet Bell-MacDonald
