Dear Tom Morgan,

Re: Class 1 Notification Q2026\_0145 - INCA Silver Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2026\_0145 is valid as of June 15, 2026.

Your Class 1 Notification and proposed work program (June 15, 2026 - June 14, 2027) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 Notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation

shall be done in a manner that supports the return of wetland benefits to those areas.

3. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Manager, Mining Land Use. The operator may contact [heritage.review@yukon.ca](mailto:heritage.review@yukon.ca) for more information on the areas of heritage potential or to discuss potential mitigation options.
4. The operator shall communicate plans and timing of activities to the First Nation of Nacho Nyak Dun Lands and Resources Department (867-996-2265). The operator shall make best efforts to resolve any potential concerns identified.
5. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of the First Nation of Nacho Nyak Dun (867-996-2265 ext.133) in addition to the Government of Yukon, Manager, Mining Lands and Heritage Department.
6. The operator shall suspend exploration activities if ungulates are observed from active work areas, until they move off on their own accord.
7. The operator shall share fish and wildlife observation information (e.g. wildlife logs, seasonal reports etc.), shared with other agencies (e.g. YG biologists, Yukon Conservation Data Center etc.), with the First Nation of Nacho Nyak Dun's Land and Resources Department (867)996-2265, prior to the expiry of this Notification.
8. Please note, Schedule 1 Operating Condition #39 "All reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law.
9. Drill holes shall be decommissioned and backfilled or plugged to avoid wildlife entrapment.
10. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Caribou Country" (<https://yukon.ca/en/flying-caribou-country>). When possible flights should be consolidated to reduce the overall disturbance to wildlife from flights.
11. The notification area overlaps with trapping concession 107 and may overlap with other users, such as recreational tour guide companies. You are encouraged to communicate plans and timing of activities to other land and resource users that may be affected by the proposed notification activities (e.g. trapper, outfitter, Wilderness Tourism Association of Yukon, etc.). This should be completed as soon as practicable and prior to the commencement of notification activities to identify potential land use conflicts that may negatively effect other land users. The operator shall make best efforts to resolve these issues.
12. You are reminded of Schedule 1 Operating Condition #17 which states: "A spill contingency plan for petroleum products and other hazardous substances must be prepared and posted in the camp and at all fuel handling locations used in carrying out the operation."
13. The Operator shall store all attractants, including garbage, food, food waste and strained solids from grey water in a container that prevents access by bears and other wildlife until attractants have been removed from the project site.
14. The operator should plan flight routes to avoid flying over any observed active raptor nests during the nesting season (April 1 - September 30), or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.

15. The operator shall maintain a 50m no disturbance buffer around known and observed raptor nests from April 1 - September 30. If two or more nests are within 100m of each other they shall be considered as one nest site and a 50m buffer applied around the whole area. The operator shall make best efforts to not island raptor nests, allowing for connectivity to the forest from nest sites. The operator shall contact the Wildlife Key Area (WKA) program ([wka@yukon.ca](mailto:wka@yukon.ca)), for information on known raptor nests within the project area. The operator shall report any observed nests to the WKA program.
16. The operator shall contact the Wildlife Key Area Program ([wka@yukon.ca](mailto:wka@yukon.ca)), for information on identifying mineral licks. If a mineral lick is identified within the project area, the operator shall maintain a 100m no-disturbance buffer around the location of the mineral lick.
17. The operator shall conduct pre-activity surveys for Collared Pika and Collared Pika habitat (eg. talus slopes) prior to ground disturbing activities, within the work site area, in accordance with YG's Protocol for detecting Collared Pika, <https://yukon.ca/sites/default/files/env/env-protocol-detecting-collared-pika.pdf>. If Collared Pika are identified during the survey the operator shall maintain a 30m buffer around the area. The operator should report sightings of Collared Pika to the Yukon Conservation Data Centre ([yukoncdc@yukon.ca](mailto:yukoncdc@yukon.ca)).

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

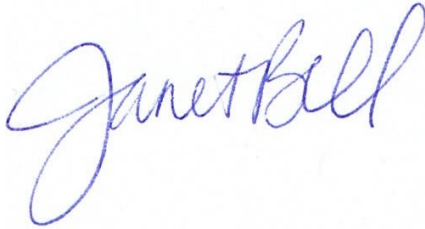

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on June 14, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-996-2256, fax at 867-996-2617, or email at [mayo.mining@yukon.ca](mailto:mayo.mining@yukon.ca).

Sincerely,  
Janet Bell-MacDonald

A handwritten signature in blue ink that reads "Janet Bell". The signature is written in a cursive style with a large, looping initial "J".
