Dear Max Fuerstner,

Re: Class 1 Notification Q2026_0225 - Livingstone Gold Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2026_0225 is valid as of August 06, 2026.

Your Class 1 Notification and proposed work program (August 06, 2026 - August 05, 2027) is allowed to proceed with the following terms and conditions:

1. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
2. All reclamation must be completed prior to the end of the work program date identified in this Class 1 Notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, removal of vehicles and equipment, etc. Reclamation must be completed to the standards listed in the Operating

Conditions, Schedule 1 of the Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return of wetland benefits to those areas.

3. Drill holes shall be decommissioned and backfilled or plugged to avoid wildlife entrapment.
4. You are reminded of Schedule 1 Operating Condition #17 which states: "A spill contingency plan for petroleum products and other hazardous substances must be prepared and posted in the camp and at all fuel handling locations used in carrying out the operation."
5. Please note, Schedule 1 Operating Condition #39 "All reasonable care must be taken in carrying out exploration activities near or adjacent to a water body to prevent sediment from entering a water body, unless otherwise permitted by law.
6. Please note that, due to the size of the notification area, the preliminary heritage desktop review was limited to proposed work areas - as identified in the mapping provided as "Heritage Assessed Areas". Any changes to the proposed work locations submitted in this Class 1 Notification will require an amendment. Please contact your district Mining Records office for more information.
7. The map provided identifies areas with elevated potential for heritage resources. The operator shall not conduct land-altering activities within these areas unless prior approval has been granted by the Manager, Mining Land Use. The operator may contact heritage.review@yukon.ca for more information on the areas of heritage potential or to discuss potential mitigation options.
8. There are documented historical features within the notification area, as identified on the map provided. The operator shall not conduct any land-altering activities within 30 m of the(se) site(s) unless prior approval has been granted by the Manager, Mining Land Use. The operator is encouraged to contact the Historic Sites Unit (historic.sites@yukon.ca) for more information on the historic features.
9. Upon discovery of a heritage resource the proponent shall notify the Heritage Department of Kwanlin Dün First Nation (867-633-7800) and Ta'an Kwach'an Council (867-668-3613), in addition to the Government of Yukon, Manager, Mining Land Use and Heritage Department. A 30m buffer shall be maintained around any discovered or known heritage resource.
10. The operator shall communicate plans and timing of activities to Kwanlin Dün First Nation (867-633-7800), Ta'an Kwach'an Council (867-668-3613) and other land and resource users (i.e. outfitters and trappers) as soon as practicable and prior to the commencement of project activities to identify potential land use conflicts and any other potential negative effects on other users. The operator shall make best efforts to resolve these issues.
11. The operator shall suspend exploration activities if ungulates are observed from active work areas, until they move off on their own accord.
12. The operator shall not alter, disturb, or destroy any existing roads or trails.
13. The operator shall not restrict access, availability, or use of the area to First Nation citizens for traditional pursuits or ceremonial purposes.
14. The operator shall take all necessary precautions to minimize disturbance to caribou specific habitat (lichen) within the project area. Where disturbance is unavoidable, the lichen mat shall be separately stored and replaced as soon as exploration activities are complete.

15. The Operator shall store all attractants, including garbage, food, food waste and strained solids from grey water in a container that prevents access by bears and other wildlife until attractants have been removed from the project site.
16. The operator shall maintain a 50m no disturbance buffer around known and observed raptor nests from April 1 - September 30. If two or more nests are within 100m of each other they shall be considered as one nest site and a 50m buffer applied around the whole area. The operator shall make best efforts to not island raptor nests, allowing for connectivity to the forest from nest sites. The operator shall contact the Wildlife Key Area (WKA) program (wka@yukon.ca), for information on known raptor nests within the project area. The operator shall report any observed nests to the WKA program.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on August 05, 2027 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at whitehorse.mining@yukon.ca.

Sincerely,
Trevor Ellis
