Author: Joelle Monaghan, GIT

Contact: Chad Ulansky, P. Geo.

President and CEO

203 – 1634 Harvey Avenue

Kelowna, BC

V1Y 6G2

Operating Plan #: LQ00515

Date: December 6th, 2022

Summary of Activities in 2022:

- No corridors were built.
- 1 new trench was constructed with a total volume of 372 m³.
 - The total volume of on claim trenches is now 3352 m³.
- All work was done above the tree line. Localized disturbance to the vegetative mat occurred during the construction of drill pads.
- 31 new drill pads were constructed, each with an area of 16m².
- No access roads were constructed.
- 138.04 m of on claim roads were constructed. None of the existing roads were upgraded.
 - The total length of on claim roads is now 9,652.64 m.
- 316.73 m of permanent trails were constructed. None of the existing trails were upgraded.
 - The total length of permanent trails is now 453.53 m.
- 666.53 m of temporary trails were constructed.
 - There has been no prior temporary trail construction. This is the total length of temporary trails on claim.
- No explosives were used.
- No underground work was carried out.
- Drill pad reclamation has been limited to cleaning each drill pad once drilling is completed.
- The camp has been shut down for the winter season. The structures and drilling equipment remain on site but all people have been relocated.
- Fuel is being stored in stationary containers on site.
 - Camp:
 - 65 drums diesel
 - 8 100lb propane tanks
 - 28 drums jet fuel
 - 4 drums gas
 - Rackla Strip:
 - 2 drums diesel
 - 38 drums jet fuel
- No bulk sampling was carried out.
- No permafrost was encountered.
- Other activities carried out this season include soil sampling and prospecting.

Wildlife Encounters:

Wildlife Type	Wildlife Frequency	Location
Caribou	1	~3 km North of Camp
Grizzly Bear	1	Within eyesight of the GZ Zone
