Dear Callum Ryan,

Re: Class 1 Notification Q2024\_0228 - Haine Allowed with additional terms and conditions.

This letter is to inform you that your Class 1 Notification Q2024\_0228 is valid as of August 16, 2024.

Your Class 1 Notification and proposed work program (August 16, 2024 - October 31, 2024) is allowed to proceed with the following terms and conditions:

1. Heritage values were not reviewed based on the proposed scope of activities within the notification area. Other than general rock/soil sampling, prospecting, and airborne survey, no additional land-altering activity shall take place within the project claims, until clearance has been given for heritage values. Should the operator decide to conduct additional work, the operator must apply for an amended work program.
2. Since claims will be accessed by air, the operator shall review and follow applicable best management practices outlined in the publication "Flying in Sheep Country" (<https://yukon.ca/en/flying-sheep-country>)

3. The operator shall suspend activities within the mountain goat kidding habitat wildlife key area identified as WKA ID 44 on GeoYukon and the attached map, between May 1st and June 15th.
4. The operator shall cease work when any goats are observed within 1km of active work areas until the goats move off on their own accord.
5. The operator shall not fly unmanned aerial vehicles (drones) within 500 m of a known or observed active raptor nest during the nesting period (May 1 - August 15).
6. The location of active raptor nests identified by the operator shall be reported to Environment Yukon, Wildlife Key Area program (wka@yukon.ca).
7. The operator shall plan flight routes to avoid flying over any observed active raptor nests, or if it cannot be avoided, fly at a minimum of 600 m above ground level when safe to do so.
8. The operator shall suspend exploration activities if sheep are observed within 1 km of active work areas, until they move off on their own accord.
9. The operator shall avoid land clearing within 1 km of any observed active raptor nests between May 1st and August 31th.
10. The operator shall avoid exploration and exploration related activities in wetlands, if avoidance is not possible, the operator shall minimize disturbance to wetlands.
11. All reclamation must be completed prior to the end of the work program date identified in this Class 1 notification, including but not limited to: closure of all test pits, trenches, hand shafts, removal of camps, etc. Reclamation must be completed to the standards listed in the Operating Conditions, Schedule 1 of the Placer Mining Land Use Regulation/Quartz Mining Land Use Regulation. In areas where wetlands have been disturbed, reclamation shall be done in a manner that supports the return of wetland benefits to those areas.

For greater certainty, the conditions contained in this Notification pertain only to my authorities under the *Quartz Mining Act* and do not limit the authorizations, prohibitions, or restrictions in other federal, territorial or municipal laws.

Security may be required at any time by the Manager, Mining Land Use. The operator must furnish security within thirty (30) days of receiving the written notice from the Manager, Mining Land Use of the requirement to post security.

To help improve the environmental performance of your program, you are encouraged to refer to the attached operational guidelines. In addition, you are encouraged to contact affected First Nations to further discuss your program.

Class 1 work cannot occur on claims/leases that have lapsed or pending claims/leases until they are granted by a Mining Recorder. Please ensure the claims/leases within your Class 1 Notification are in good standing prior to beginning your work program. Any work occurring on pending or lapsed claims/leases will be in contravention of the *Quartz Mining Act* and *Territorial Lands (Yukon) Act* and representation work conducted will not be accepted by the Mining Recorder.

Please note: the notification will expire on August 15, 2025 and all reclamation must be completed at the end of the program or prior to the expiry of this notification, whichever

comes first. All proposed activities must abide by Schedule 1 (Operating Conditions) of the *Quartz Mining Land Use Regulation*. In the event that claims/leases lapse, a Class 3 or 4 authorization is issued, or that agreements to operate on claims/leases are dissolved, the Class 1 notification becomes null and void for that portion of the program, where there is no right to the minerals.

If you have any questions about this letter, please contact the district office by phone at 867-667-3190, fax at 867-667-5150, or email at [whitehorse.mining@yukon.ca](mailto:whitehorse.mining@yukon.ca).

Sincerely,  
Paul Inglis
