

Wellsite # 3

Chevron SOBC WM Birch YTE-53

Location 66°02'21"
136°56'05"

Drilling completed February 21, 1972

Photo # 8 Birch YTE-53

September 10, 1975

This Chevron well site was also reseeded in 1972.

There was evidence that the oats did provide a nursery crop as many dead oat stems littered the site. There was no sign of any live oats.

Natural grass regeneration on this well site has been quite sparse. This could be partly attributed to a large amount of organic debris. Photos #8,9 & 10 show the situation at the Birch YTE-53 well site.
