

Well Site #5

Socony Mobil WM Birch YTB-34  
Location 66°03'03.14"  
136°51'17.51"

Drilling completed June 8, 1965

Photo #13 Birch YTB-34

September 10, 1975

This site displayed a good variety of natural regeneration. Some of the plants seen were willow, dwarf birch, and a mixture of natural grasses. As with the S Tuttle well site this well was completed in 1965 and not reseeded.
