SECTION I - SUMMARY OF WELL DATA

Well Name and Number

Shell Pearl R YT I-21

Permittee

Shell Canada Limited

Name of Operator

Shell Canada Limited, P. O. Box 186, Edmonton, Alberta

Location

Unit I, Section 21, Grid: 66° 20' 134° 15'

Latitude: 66° 10' 36" .504N

Longitude: 134° 18' 52" .175W

Permit No.

#3498

Drilling Contractor

Regent Drilling Limited Rig No. 21 (Rotary)

Drilling Authority No.

No. 230 February 14, 1966

Classification

Wilcat

Elevation

G.L. : 1238'

K.B. : 1251'

Date Drilled

2:30 p.m., February 20, 1966

Date Completed Drilling

March 28, 1966

Total Depth and Plugged Back Total Depth

T.D. : 6800' P.B.T.D. : Surface

Well Status

Dry and Abandoned

Rig Released

6:00 a.m. March 30, 1966

Hole Size

24" to 40'

13-1/4" to 660', 6-3/4" to 6800'

Casing

20" Conductor at 40' K.B. with
140 sacks Portland & 100# CaCl₂

9-5/8" J-55 #36 New Mannesman Casing at 659' K.B. with
500 sacks Portland Cement & 2% CaCl₂

SECTION II - GEOLOGICAL SUMMARY

A) Formation Tops

	Spudded in Lower Mississippian	M-S-4
Top	M-S-3	550' KB
Top	M-S-2	1750' KB
Top	M-S-1	2400' KB
Top	M-D-S-1	2850' KB
Top	Devonian	3200
Top	Canol	4620 KB
Base	Canol	4760 KB
Top	Carbonate (Lower Devonian)	6702 KB

B) Cored Intervals

#1	5850-5885	Rec. 35' 2"
#2	6194-6224	Rec. 30'
#3	6470-6500	Rec. 30'
#4	6790-6800	Rec. 10'

Recovered 22 Sidewall Cores @ 670' - 4600'

C) Core Description

See Insert

D) Sample Description

(C) CORE SUMMARY

CORE DESCRIPTIONS

Core #1; @ 5850' - 5885'; with a recovery of 100%

The whole core consists of:

Shale, dark grey, trace to ± 20% calcareous, with traces of white mica and carbonaceous, flaky matter on the bedding fissility, traces of pyrite.

This core contains locally traces of bioclastic material and fossils:

Pebble - Medium grainsize, straight cone, Nautiloid Shells; some tentaculities, arthropod shells and Medium-Fine grainsize bioclastic debris.

Core #2; @ 6194' - 6224'; with a recovery of 99%

6194'.0" - 6198'.6": Shale, dark grey, trace to \pm 20% calcareous, with traces of carbonaceous flaky matter and moderate amounts of white mica, locally streaks and papery lamina of Siltstone and silt grains;
Siltstone, @ top and bottom of interval a 3" respectively 6" thick bed, very argillaceous, trace to \pm 20% calcareous,

6198'.6" - 6222'.0": Shale, dark grey, traces to \pm 20% calcareous, with traces of white mica and carbonaceous flaky matter. This shale contains patches and streaks of Pebble to ver fine grainsize bioclastic debris, and some fossils: crinoid ossicles, straight cone nautcloid shells, parts of brachiopods and rare briozoans, corals, gastropods and arthropods.

Over the whole interval, rare to locally frequent papery lamina of calci-silt- and clastic-silt grains, and locally some pebble size Siltstone plates with a contorted internal lamination.

6222'.0" - 6223'.3": Shale, medium olive grey; with a homo-genous or papery laminated calci-silt to very fine calcisand content up to \pm 10%, traces of pyrite and white mica.

The contact between the dark grey and medium olive grey shales is partly contorted and partly faulted.

Core #3; @ 6470' - 6500'; with a recovery of 100%

The core consists of: 1/30% - 60% Lime carbonate, consisting of Lithographic to sub-Lithographic grainsize mud and sub-Lithographic to fine grained bioclastic debris Laminae.

2/70% to 40% Shale, either homogenously mixed with the Lime carbonate or functioning as a matrix for the bioclastic debris.

The rock as such should be called a Marlstone.

The bioclastic debris / Lime mud / Shale Lamination shows slumped folds and syn-sedimentary faulting. And pyrite @ 6497 - 98 up to 90% of Bioclastic debris is present in clots and stringers, this debris consists of: one hole and two hole crinoid ossicles and some brachiopod debris.

The rock is bituminous and emits a fetid odour on fracturing.

Over the whole length of the core bedding-plane and \pm 60% dipping were observed these veins contain a filling of white calcite and black, very bituminous mud stone.

Core #4: 6790' - 6800'; with 95% recovery.

6790' - 6794'.6": A Lime-Carbonate Conglomerate & Breccia, consisting of 80% - 90% of components and 20% - 10% matrix. Components: Cobble to Fine Grainsizes subangular to rounded.

A) Limestone, medium brown to dark brown banded, Paecal-pellet Pack - to Grainstone, rock consists of very fine to extremely fine oval pellets and oolites, banding effect due to varying amounts of extremely fine crystalline sparry calcite cement.

Some argillaceous (20% - 30%), dark grey, slightly bituminous lamina are present.

B) Limestone, medium brown Lime-carbonate-mud with up to 10% extremely fine to medium grained bioclastic debris.

C) Limestone, medium brown to light brown, with 10% - 90% bioclastic debris mainly consisting of fine to coarse grained one hole and two hole crinoid ossibles. The rest of the rock consists of type B).

D) Individual grains of bioclastic debris of pebble to fine grainsize,
consisting of

Coral debris

Brachiopod debris

One & Two hole Crinoid debris

Some Trilobite debris

Some Tentaculites debris

Matrix: dark grey, mainly very fine to sub-Lithographic crystalline dolomite, with varying amounts of argillaceous-biluminous - and pyritic matter.

6794'6" - 6799'6" : Consists of Limestone as described under A) in the upper part of this core.

The lamina of this rock in the 94'6" - 99'6" interval dip 40% - 60% to the core axis.

It is quite possible that this part of the core is cut out of a boulder.

Traces to 10% of calcite veins are present in this interval.

(D) SAMPLE SUMMARY

SHELL, PEEL RIVER I-21

T.D. 6800'

G.L. 1238'

LATITUDE: 66° 10' 36.5" N.

LONGITUDE: 134° 18' 52.2" W.

0'-70'		No Samples.
70'-80'	Siltstone-Sandstone	Light grey, lithic, siltstone to pebble size sandstone, trace of argillaceous content, trace of ironstone.
80'-90'	Shale	Medium grey, trace of silty content.
90'-100'	Slate & Ironstone	Medium grey brown slate interbedded with ironstone, trace of silty content, pyritic.
100'-110'	Slate & Ironstone	Medium grey brown slate interbedded with ironstone, trace of silty content, pyritic.
110'-120'	Slate & Ironstone	Medium grey slate interbedded with ironstone, trace of silty content.
120'-130'	Slate & Ironstone	Medium grey slate interbedded with ironstone, trace of silty content.
130'-140'	Slate & Ironstone	Medium grey slate interbedded with ironstone, trace of silty content.
140'-150'	Slate & Ironstone	Medium grey slate interbedded with ironstone, trace of silty content.
150'-160'	Shale	Medium grey, trace of calcareous content.
160'-170'	Shale	Medium grey, trace of silty content and calcareous content, pyritic.

170'-180'	Shale	Medium grey, trace of calcareous content.
180'-190'	Shale	Medium grey, trace of silty and calcareous content, band of ironstone; pyritic.
190'-200'	Shale	Medium grey brown, trace of calcareous content, pyritic, band of ironstone.
200'-210'	Shale	Medium grey, trace of calcareous content, band of ironstone.
210'-220'	Shale	Medium grey, trace of calcareous content, band of ironstone.
220'-230'	Shale	Medium grey, trace of calcareous content, band of ironstone.
230'-240'	Shale	Medium grey, trace of calcareous content, band of ironstone; micaceous.
240'-250'	Shale	Medium grey, trace of calcareous content.
250'-260'	Shale	Medium grey, pyritic.
260'-270'	Shale	Medium grey, pyritic.
270'-280'	Shale	Medium grey.
280'-300'	Shale	Medium grey, trace of silty content, pyritic, band of ironstone.
300'-320'	Shale	Medium grey, slightly calcareous, pyritic.
320'-340'	Shale	Medium grey, trace of silty content.
340'-360'	Shale	Medium grey, trace of silty content.

360'-380'	Shale	Medium grey.
380'-400'	Shale	Medium grey, pyritic, band of ironstone.
400'-420'	Shale	Dark grey, pyritic.
420'-440'	Shale	Dark grey.
440'-460'	Shale	Dark grey.
460'-480'	Shale	Dark grey.
480'-500'	Shale	Dark grey, trace of silty content; band of siltstone to very fine grained sand- stone.
500'-520'	Shale	Dark grey.
520'-540'	Shale	Dark grey, pyritic, streak of ironstone.
540'-560'	Shale	Dark grey, pyritic, streak of ironstone.
560'-580'	Shale	Dark grey, pyritic, trace of silty content and ironstone.
580'-760'		No Samples.
760'-780'	Shale	Dark grey.
780'-800'	Shale	Dark grey.
800'-820'	Shale	Dark grey.
820'-840'	Shale	Dark grey.
840'-860'	Shale	Dark grey.
860'-880'	Shale	Dark grey, trace of siltstone to very fine grained sand- stone, trace of ironstone.
880'-900'	Shale	Dark grey, pyritic, trace of ironstone.
900'-920'	Shale	Dark grey, trace of ironstone.
920'-940'	Shale	Dark grey.

940'-960'	Shale	Dark grey.
960'-980'	Shale	Dark grey.
980'-1000'	Shale	Dark grey.
1000'-1020'	Shale	Dark grey.
1020'-1040'	Shale	Dark grey, trace of silty content, trace of ironstone.
1040'-1060'	Shale	Dark grey, trace of ironstone.
1060'-1080'	Shale	Dark grey, trace of ironstone.
1080'-1100'	Shale	Dark grey, trace of ironstone.
1100'-1120'	Shale	Dark grey, trace of ironstone.
1120'-1140'	Shale	Dark grey.
1140'-1160'	Shale	Dark grey, trace of calcite.
1160'-1180'	Shale	Dark grey.
1180'-1200'	Shale	Dark grey, trace of siltstone.
1200'-1220'	Shale	Dark grey, trace of ironstone.
1220'-1240'	Shale	Dark grey.
1240'-1260'	Shale	Dark grey, trace of calcite.
1260'-1280'	Shale	Dark grey.
1280'-1300'	Shale	Dark grey, trace of silty content, pyritic.
1300'-1320'	Shale	Dark grey, trace of silty content, trace of ironstone.
1320'-1340'	Shale	Dark grey. Band of light grey, extremely fine to coarse grained sandstone with 20% chert, subangular.

1340'-1360'	Shale	Dark grey, trace of silty content, pyritic.
1360'-1380'	Shale	Dark grey, trace of silty content, pyritic, band of ironstone.
1380'-1400'	Shale	Dark grey, pyritic, band of ironstone.
1400'-1420'	Shale	Dark grey, trace of silty content, pyritic. Band of siltstone to medium grained sandstone, quartzitic, sub-angular, lithic.
1420'-1440'	Shale	Dark grey, trace of silty content, pyritic. Band of siltstone to medium grained sandstone, quartzitic, sub-angular, lithic.
1440'-1460'	Shale	Dark grey, trace of silty content, pyritic. Band of siltstone to medium grained sandstone, quartzitic, sub-angular, lithic.
1460'-1480'	Shale	Dark grey, trace of silty content.
1480'-1500'	Shale	Dark grey.
1500'-1520'	Shale	Dark grey, pyritic.
1520'-1540'	Shale	Dark grey.
1540'-1560'	Shale	Dark grey, trace of silty content.
1560'-1580'	Shale	Dark grey, trace of silty content.
1580'-1600'	Shale	Dark grey, trace of silty content, pyritic.
1600'-1620'	Shale	Dark grey, trace of silty content. Thin band of very fine to fine grained sandstone.

1620'-1640'	Shale	Dark grey.
1640'-1660'	Shale	Dark grey.
1660'-1670'	Shale	Dark grey.
1670'-1680'	Shale	Dark grey.
1680'-1690'	Shale	Dark grey, pyritic. Band of siltstone to fine grained lithic sandstone.
1690'-1700'	Shale	Dark grey.
1700'-1710'	Shale	Dark grey, pyritic.
1710'-1720'	Shale	Dark grey, pyritic.
1720'-1730'	Shale	Dark grey, pyritic. Band of siltstone to very fine grained sandstone, lithic.
1730'-1740'	Shale	Dark grey.
1740'-1750'	Shale	Dark grey, trace of silty content.
1750'-1760'	Shale	Dark grey. Band of light grey siltstone to medium grained sandstone, lithic - 60% quartz, 40% chert, sub-angular.
1760'-1770'	Shale	Dark grey. Band of light grey siltstone to very fine grained sandstone, lithic. Argillaceous bands in sandstone. Chert: white, dark grey, grey.
1770'-1780'	Shale	Dark grey. Band of light grey, siltstone to very fine grained sandstone, lithic.
1780'-1790'	Shale	Dark grey, trace of silty content.
1790'-1800'	Shale	Dark grey, trace of silty content.

1800'-1810'	Shale	Dark grey, 20% siltstone to fine grained sandstone, slightly calcareous.
1810'-1820'	Shale	Dark grey, 20% silty content, pyritic. Band of light grey siltstone to medium grained sandstone, lithic, subrounded - quartz 80%, chert 20%. Chert: white, black, grey.
1820'-1830'	Shale	Dark grey, 20% silty content, slightly calcareous. Band of light grey, siltstone to medium grained sandstone, lithic.
1830'-1840'	Shale	Dark grey, 20% silty content, pyritic. Band of light grey siltstone to coarse grained sandstone, lithic. Stringers of sandstone in the shale.
1840'-1850'	Shale	Dark grey, 20% silty content, pyritic. Band of light grey siltstone to medium grained sandstone, lithic, slightly calcareous.
1850'-1860'	Shale	Grey black, 30% silty content, pyritic.
1860'-1870'	Shale	Grey black, trace of silty content.
1870'-1880'	Shale	Grey black, 10% silty content. Silty layers slightly calcareous.
1880'-1890'	Shale	Grey black, 30% silty content, floating chert grains.
1890'-1900'	Shale	Grey black, 30% silty content.
1900'-1910'	Shale	Grey black, 10% silty content.
1910'-1920'	Shale	Grey black, trace of silty content.

1920'-1930'	Shale	Grey black, trace of silty content.
1930'-1940'	Shale	Grey black, trace of silty content.
1940'-1950'	Shale	Grey black, trace of silty content.
1950'-1960'	Shale	Grey black, trace of silty content, pyritic.
1960'-1970'	Shale	Grey black, trace of silty content, pyritic, trace of ironstone.
1970'-1980'	Shale	Grey black, trace of silty content.
1980'-1990'	Shale	Grey black, 10% silty content, pyritic.
1990'-2000'	Shale	Grey black, 10% silty content.
2000'-2010'	Shale	Grey black, 30% silty content.
2010'-2020'	Shale	Grey black, 30% silty content. Band of siltstone to fine grained sandstone, lithic, trace of calcite.
2020'-2030'	Shale	Grey black, trace of silty content.
2030'-2040'	Shale	Grey black, trace of silty content.
2040'-2050'	Shale	Grey black, trace of silty content, pyritic.
2050'-2060'	Shale	Grey black, trace of silty content, pyritic.
2060'-2070'	Shale	Grey black, trace of silty content.
2070'-2080'	Shale	Grey black, trace of silty content.

2080'-2090'	Shale	Grey black, 10% silty content.
2090'-2100'	Shale	Grey black, 30% silty content, micaceous.
2100'-2110'	Shale	Grey black, 30% silty content.
2110'-2120'	Shale	Grey black, 30% silty content.
2120'-2130'	Shale	Grey black, 30% silty content.
2130'-2140'	Shale	Grey black, trace of silty content.
2140'-2150'	Shale	Grey black, trace of silty content, micaceous, white streaks.
2150'-2160'	Shale	Grey black, trace of silty content, white streaks.
2160'-2170'	Shale	Grey black, trace of silty content.
2170'-2180'	Shale	Grey black, trace of silty content.
2180'-2190'	Shale	Grey black, trace of silty content. Band of light grey siltstone to very coarse grained sandstone, lithic, trace of calcareous and dolomitic content, dark grey chert pebbles - quartz 60%, chert 40%, subangular to subrounded. Chert: white, grey and black.
2190'-2200'	Sandstone- Siltstone & Shale	Light grey siltstone to very coarse grained sandstone, lithic, trace of argillaceous content. Shale, light grey, trace of silty content.

2200'-2210'	Shale & Siltstone-Sandstone	Grey black shale with a trace of silty content. Light grey siltstone to very coarse grained sandstone, lithic, trace of argillaceous content.
2210'-2220'	Shale	Grey black, trace of silty content. Band of siltstone to very coarse grained sandstone, lithic, trace of argillaceous content.
2220'-2230'	Shale	Grey black, trace of silty content. Band of siltstone to very coarse grained sandstone, lithic, trace of argillaceous content.
2230'-2240'	Shale	Grey black, trace of silty content. Band of siltstone to medium grained sandstone, lithic, trace of argillaceous content.
2240'-2250'	Shale	Grey black with 30% silty content. Band of siltstone to very coarse grained sandstone, lithic, trace of argillaceous content.
2250'-2260'	Shale	Grey black with 30% silty content.
2260'-2270'	Shale	Grey black, trace of silty content, pyritic.
2270'-2280'	Shale	Grey black with 30% silty content.
2280'-2290'	Shale	Grey black with 30% silty content.
2290'-2300'	Shale	Grey black, trace of silty content.
2300'-2310'	Shale	Grey black, trace of silty content.
2310'-2320'	Shale	Grey black.

2320'-2330'	Shale	Grey black, trace of silty content. Band of siltstone to medium grained sandstone, lithic, trace of argillaceous content. Quartz - 80%, chert 20%, angular, carbonaceous partings.
2330'-2340'	Shale	Grey black, trace of silty content, carbonaceous partings.
2340'-2350'	Shale	Grey black, 10% silty content, carbonaceous partings.
2350'-2360'	Shale	Grey black, 20% silty content, carbonaceous partings.
2360'-2370'	Shale	Grey black, 20% silty content, pyritic; carbonaceous partings.
2370'-2380'	Shale	Grey black, 20% silty content, pyritic; carbonaceous partings.
2380'-2390'	Shale	Grey black, 20% silty content, pyritic; carbonaceous partings.
2390'-2400'	Shale	Grey black, 30% silty content, carbonaceous partings.
2400'-2410'	Shale	Grey black, 20% silty content.
2410'-2420'	Shale	Grey black, trace of silty content.
2420'-2430'	Shale	Grey black, trace of silty content.
2430'-2440'	Shale	Grey black, trace of silty content.
2440'-2450'	Shale	Grey black, 20% silty content.
2450'-2460'	Shale	Grey black, 20% silty content.
2460'-2470'	Shale	Grey black, 20% silty content.
2470'-2480'	Shale	Dark grey, trace of silty content. Band of light grey siltstone to very coarse sandstone, lithic. Quartz overgrowths, angular, Quartz 70%, chert 30% - 10% tripolitic chert. Chert: grey, black, white, less than 5% dolomitic sandstone.

2480'-2490'	Siltstone- Sandstone & Shale	Light grey, siltstone to coarse grained sandstone, lithic. Dark grey shale with a trace of silty content.
2490'-2500'	Shale	Dark grey, trace of silty content. Band of light grey siltstone to medium grained sandstone, lithic, less than 5% dolomitic content.
2500'-2510'	Shale	Dark grey, trace of silty content, band of ironstone.
2510'-2520'-	Shale & Siltstone- Sandstone	Dark grey shale with a trace of silty content. Yellow grey siltstone to pebble size sand- stone, lithic, angular. Quartz 60%, chert 40%, less than 5% dolomitic content.
2520'-2530'	Sandstone- Siltstone	Yellow grey, siltstone to coarse grained sandstone, lithic, 10% dolomitic content.
2530'-2540'	Siltstone- Sandstone	Yellow grey siltstone to coarse grained sandstone, lithic, grey chert pebbles, 10% dolomitic content. Chert 20%, quartz 80%.
2540'-2550'	Siltstone- Sandstone	Yellow grey siltstone to coarse grained sandstone, lithic, 10% dolomitic content. Chert 20% Quartz 80%.
2550'-2560'	Siltstone- Sandstone & Shale	Yellow grey siltstone to medium grained sandstone, lithic. Dark grey shale with trace of silty content. Trace of dolomitic content. Quartz overgrowth.
2560'-2570'	Shale	Grey black, trace of silty content.
2570'-2580'	Shale	Grey black, trace of silty content.
2580'-2590'	Shale	Grey black, trace of silty content, pyritic; floating chert grains.

2590'-2600'	Shale	Grey black, 20% silty content.
2600'-2610'	Shale	Dark grey, 20% silty content.
2610'-2620'	Shale	Grey black, trace of silty content, pyritic.
2620'-2630'	Shale	Grey black, trace of silty content.
- 2630'-2640'	Shale	Grey black, 30% silty to very fine grained sandstone, pyritic, less than 5% calcareous content.
2640'-2650'	Shale	Grey black, trace silty content, pyritic.
- 2650'-2660'	Shale	Grey black, 30% silty content, 5% calcareous content.
2660'-2670'	Shale	Grey black, 30% silty content, pyritic. Band of siltstone to coarse grained sandstone, lithic, 5% calcareous content, trace of argillaceous content.
2670'-2680'	Shale	Grey black, 10% silty content. Band of siltstone to coarse grained sandstone, lithic, subangular, trace of argillaceous content.
2680'-2690'	Shale	Grey black, 30% silty content. Band of siltstone to coarse grained sandstone, lithic, trace of argillaceous content, calcareous in part.
2690'-2700'	Siltstone- Sandstone & Shale	Dark grey siltstone to medium grained sandstone, lithic, 40% argillaceous content, angular; white and grey chert. Grey black shale with 20% silty content. Pyritic.
2700'-2710'	Shale	Grey black, 30% silty content, siliceous, 5% calcareous content. Band of siltstone to very fine grained sandstone, lithic. Pyritic.

2710'-2720'	Shale-Siltstone	Grey black, 50% shale and 50% siltstone, pyritic, floating quartz grains, shale is siliceous. Band of iron-stone.
2720'-2730'	Shale-Siltstone	Grey black, 50% shale and 50% siltstone; 5% calcareous content.
2730'-2740'	Shale	Grey black, 30% silty content, band of ironstone; sandstone stringers; pyritic.
2740'-2750'	Shale	Grey black, trace of silty content, pyritic.
2750'-2760'	Siltstone-Sandstone & Shale	Light grey siltstone and fine to very coarse grained sandstone, lithic, trace of argillaceous content; angular, glassy chert pebbles. Grey black shale with a trace of silty content.
2760'-2770'	Shale	Grey black, 30% silty content.
2770'-2780'	Shale	Grey black, siliceous, pyritic.
2780'-2790'	Shale	Grey black, trace of silty content, siliceous, pyritic.
2790'-2800'	Shale	Grey black.
2800'-2810'	Shale	Grey black, trace of silty content.
2810'-2820'	Shale	Grey black, trace of silty content, slightly calcareous, siliceous, pyritic.
2820'-2830'	Shale	Grey black, trace of silty content.
2830'-2840'	Shale	Grey black, trace of silty content.
2840'-2850'	Shale	Grey black, trace of silty content, pyritic, 5% calcareous content.

2850'-2860'	Shale	Grey black, trace of silty content, pyritic.
2860'-2870'	Shale	Grey black, trace of silty content.
2870'-2880'	Shale	Grey black, trace of silty content, pyritic, trace of calcareous content.
2880'-2890'	Shale	Grey black, trace of silty content, pyritic, trace of calcareous content.
2890'-2900'	Shale	Grey black, trace of silty content, pyritic, trace of calcareous content.
2900'-2910'	Shale	Grey black, trace of silty content, pyritic, trace of calcareous content.
2910'-2920'	Shale	Grey black, trace of silty content, pyritic, spotty calcareous content, floating quartz grains.
2920'-2930'	Shale	Grey black, trace of silty content, spotty calcareous content.
2930'-2940'	Shale	Dark grey, 30% silty content.
2940'-2950'	Shale	Dark grey.
2950'-2960'	Shale	Dark grey, 30% silty content, spotty calcareous content.
2960'-2970'	Shale	Dark grey, 30% silty content, spotty calcareous content, pyritic.
2970'-2980'	Shale	Dark grey, pyritic.
2980'-2990'	Shale	Dark grey, trace of silty content.
2990'-3000'	Shale	Dark grey, 30% silty content, spotty calcareous content.

3000'-3010'	Siltstone	Medium grey siltstone, 30% argillaceous content, 10% dolomitic content. Band of shale.
3010'-3020'	Shale	Dark grey, 30% silty content.
3020'-3030'	Shale	Dark grey, trace of silty content.
3030'-3040'	Shale	Dark grey, 30% silty content, pyritic; band of ironstone.
3040'-3050'	Shale	Dark grey, 30% silty content. Band of siltstone with a trace of argillaceous content and 10% dolomitic content.
3050'-3060'	Siltstone & Shale	Dark grey siltstone with 30% argillaceous content and 10% dolomitic content. Dark grey shale with 30% silty content.
3060'-3070'	Shale	Dark grey with a band of siltstone. Silt lenses and authigenic quartz.
3070'-3080'	Shale	Dark grey, pyritic.
3080'-3090'	Shale	Dark grey with a band of siltstone. Silt lenses and pyritic.
3090'-3100'	Shale	Dark grey with 30% silty content.
3100'-3110'	Shale	Dark grey with a trace of silty content.
3110'-3120'	Shale	Dark grey with 30% silty content.
3120'-3130'	Shale	Dark grey with a trace of silty content.
3130'-3140'	Shale	Dark grey with a trace of silty content.

3140'-3150'	Shale	Grey black, trace of silty content, 10% siliceous content, pyritic.
3150'-3160'	Shale	Grey black, 10% siliceous content, pyritic.
3160'-3170'	Shale	Grey black, 10% siliceous content.
3170'-3180'	Shale	Grey black, 10% siliceous content.
3180'-3190'	Shale	Grey black, 10% siliceous content, trace of ironstone, pyrite laminations.
3190'-3200'	Shale	Grey black, 10% siliceous content.
3200'-3210'	Shale	Grey black, 10% silty content, 10% siliceous content.
3210'-3220'	Shale	Dark grey.
3220'-3230'	Shale	Dark grey, 20% silty content.
3230'-3240'	Shale	Dark grey, 20% silty content.
3240'-3250'	Shale	Dark grey, 20% silty content.
3250'-3260'	Shale	Dark grey, trace of silty content.
3260'-3270'	Shale	Dark grey.
3270'-3280'	Shale	Dark grey.
3280'-3290'	Shale	Dark grey, trace of silty content, pyritic.
3290'-3300'	Shale	Dark grey, trace of siliceous content.
3300'-3310'	Shale	Dark grey, trace of siliceous content, pyritic.
3310'-3320'	Shale	Dark grey, trace of siliceous content.
3320'-3330'	Shale	Dark grey, trace of siliceous content, pyritic.

3330'-3340'	Shale	Dark grey, trace of silty content, pyritic.
3340'-3350'	Shale	Dark grey, 30% silty content, pyritic.
3350'-3360'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to fine grained sandstone, lithic, angular, trace of dolomite, 30% argillaceous content. Medium to dark grey shale with 30% silty content. Pyritic.
3360'-3370'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, lithic, 30% argillaceous content, 5% dolomitic content. Medium to dark grey shale with 30% silty content. Pyritic.
3370'-3380'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, lithic, trace of argillaceous content, 10% dolomitic content. Medium to dark grey shale with 30% silty content. Pyritic.
3380'-3390'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, lithic, trace of argillaceous content, 5% dolomitic content. Medium to dark grey shale with 30% silty content. Pyritic.
3390'-3400'	Shale	Grey black, 30% silty content, hackly appearance, trace of siliceous content.
3400'-3410'	Shale	Grey black, trace of siliceous content, pyritic.
3410'-3420'	Shale	Grey black, trace of siliceous content, pyritic.
3420'-3430'	Shale	Grey black.
3430'-3440'	Shale	Dark grey, trace of silty content. Band of siltstone to fine grained sandstone, lithic, 5% dolomitic content. Pyritic.

3440'-3450'	Shale	Grey black, trace of silty content, quartz veins.
3450'-3460'	Shale	Grey black, trace of silty content, pyritic, laminated.
3460'-3470'	Shale	Grey black, pyritic.
3470'-3480'	Shale	Grey black, trace of siliceous content, pyritic, laminated.
3480'-3490'	Shale	Grey black, trace of siliceous content, pyritic.
3490'-3500'	Shale	Grey black, trace of siliceous content, pyritic.
3500'-3510'	Shale	Grey black, trace of siliceous content.
3510'-3520'	Shale	Grey black, trace of siliceous content, pyritic.
3520'-3530'	Shale	Grey black, trace of siliceous content, pyritic.
3530'-3540'	Shale	Grey black, trace of siliceous content, pyritic.
3540'-3550'	Shale	Grey black, trace of siliceous content, pyritic.
3550'-3560'	Shale	Grey black, trace of siliceous content, pyritic.
3560'-3570'	Shale	Grey black, 5% siliceous content, finely disseminated pyrite, sometimes laminated locally up to 5% of rock.
3570'-3580'	Shale	Grey black, trace of silty content, 5% siliceous content, pyritic; floating chert grains.
3580'-3590'	Shale	Dark grey, pyritic.
3590'-3600'	Shale	Dark grey, trace of silty content, trace of calcareous content, 5% siliceous content, pyritic. Floating chert grains.

3600'-3610'	Shale	Grey black, trace of calcareous content, 5% siliceous content, laminated.
3610'-3620'	Shale	Grey black, 5% siliceous content, quartz veins, laminated.
3620'-3630'	Shale	Grey black, 5% siliceous content.
3630'-3640'	Shale	Gray black, trace of silty content, 5% siliceous content, floating chert grains, laminated, pyritic.
3640'-3650'	Shale	Grey black, trace of silty content, 5% siliceous content, pyritic.
3650'-3660'	Shale	Grey black, trace of silty content, 5% siliceous content, floating chert grains, pyritic.
3660'-3670'	Shale	Grey black, 5% siliceous content, pyritic.
3670'-3680'	Shale	Dark grey, trace of silty content, trace of calcareous and siliceous content, spherical pyrite.
3680'-3690'	Shale	Dark grey, trace of silty and siliceous content, 5% calcareous content, color lamination.
3690'-3700'	Shale	Dark grey, trace of siliceous content.
3700'-3710'	Shale	Dark grey, trace of siliceous content, pyrite laminations.
3710'-3720'	Shale	Dark grey, trace of silty content.
3720'-3730'	Shale	Dark grey, trace of silty content.
3730'-3740'	Shale	Dark grey, trace of silty content, finely disseminated pyrite.

3740'-3750'	Shale	Medium to dark grey, trace of silty content, band of ironstone, pyritic.
3750'-3760'	Shale	Medium to dark grey, trace of silty content, 1% pyrite blebs and ironstone.
3760'-3770'	Shale	Medium to dark grey, 20% silty content, pyritic; band of ironstone.
3770'-3780'	Shale	Medium to dark grey, trace of silty content, trace of ironstone laminations.
3780'-3790'	Shale	Medium to dark grey, trace of silty content.
3790'-3800'	Shale	Medium to dark grey, 20% silty content.
3800'-3810'	Shale	Medium to dark grey, trace of silty content.
3810'-3820'	Shale	Medium to dark grey, trace of silty content.
3820'-3830'	Shale	Medium to dark grey, 20% silty content, laminations of silt.
3830'-3840'	Shale	Dark grey, 20% silty content.
3840'-3850'	Shale	Dark grey, trace of silty content.
3850'-3860'	Shale	Dark grey, 20% silty content.
3860'-3870'	Shale	Medium to dark grey, 20% silty content, pyritic.
3870'-3880'		No Samples.
3880'-3890'	Siltstone-Shale	Medium grey. 50% shale and 50% siltstone.
3890'-3900'	Siltstone-Shale	Medium grey. 50% shale and 50% siltstone.
3900'-3910'	Siltstone-Shale	Medium grey. 50% shale and 50% siltstone.

3910'-3920'	Siltstone-Sandstone & Shale	Medium grey. 50% siltstone to very fine grained sandstone, lithic. 50% shale. Pyritic.
3920'-3930'	Siltstone-Sandstone	Medium grey siltstone to very fine grained sandstone, lithic, 20% argillaceous content, spherical pyrite.
3930'-3940'	Siltstone & Shale	Medium grey siltstone, sandy (very fine to fine grained,) lithic, trace of argillaceous content, sugary appearance. Medium grey shale, 20% silty content.
3940'-3950'	Siltstone & Shale	Medium grey siltstone, sandy (very fine to fine grained), lithic, trace of dolomitic content. Shale, medium grey, 20% silty content.
3950'-3960'	Siltstone & Shale	Medium grey siltstone, sandy (very fine to fine grained), lithic, trace of argillaceous and dolomitic content. Medium grey shale, 20% silty content.
3960'-3970'	Siltstone	Medium grey, sandy (very fine to medium grained), lithic, trace of argillaceous and dolomitic content, pyritic.
3970'-3980'	Shale	Medium grey, 20% silty content. Band of siltstone to medium grained sandstone, lithic, trace of argillaceous content.
3980'-3990'	Sandstone	Medium grey, very fine to medium grained, silty, lithic, 20% argillaceous content, slightly dolomitic, angular. 30% white, grey and black chert.
3990'-4000'	Sandstone & Shale	Medium grey very fine to medium grained sandstone, lithic, silty, 20% argillaceous content. Medium grey shale, 20% silty content.

4000'-4010'	Sandstone & Shale	Medium grey, very fine to fine grained sandstone, lithic, silty, trace of argillaceous content. Medium grey shale, trace of silty content.
4010'-4020'	Siltstone & Shale	Medium grey siltstone, sandy (very fine grained), lithic, trace of argillaceous content. Medium grey shale, trace of silty content.
4020'-4030'	Shale	Medium grey, 20% silty content. Band of very fine to fine grained sandstone, silty, lithic, argillaceous.
4030'-4040'	Shale	Medium to dark grey, trace of silty content.
4040'-4050'	Shale	Medium to dark grey, 20% silty content.
4050'-4060'	Shale	Medium to dark grey, 20% silty content.
4060'-4070'	Shale	Medium to dark grey, 20% silty content.
4070'-4080'	Shale	Medium to dark grey, 20% silty content, band of iron-stone.
4080'-4090'	Shale	Medium to dark grey, 20% silty content, band of iron-stone.
4090'-4100'	Shale	Medium to dark grey, 20% silty content.
4100'-4110'	Shale	Medium to dark grey, 20% silty content. Band of siltstone to very fine grained sandstone, lithic.
4110'-4120'	Shale	Medium to dark grey, 20% silty content. Band of siltstone, sandy (very fine grained), lithic.

4120'-4130'	Sandstone & Shale	Medium to dark grey sandstone, very fine to fine grained, lithic; silty, trace of argillaceous content. Medium to dark grey shale, 20% silty content.
4130'-4140'	Shale & Siltstone-Sandstone	Dark grey shale and medium grey siltstone to very fine grained sandstone, lithic.
4140'-4150'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4150'-4160'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4160'-4170'	Shale	Dark grey.
4170'-4180'	Shale	Dark grey.
4180'-4190'	Shale & Siltstone-Sandstone	Dark grey shale and medium grey siltstone to very fine grained sandstone, lithic.
4190'-4200'	Shale & Siltstone-Sandstone	Dark grey shale and medium grey siltstone to very fine grained sandstone, lithic.
4200'-4210'	Shale	Dark grey.
4210'-4220'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4220'-4230'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4230'-4240'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4240'-4250'	Shale	Dark grey.
4250'-4260'	Shale	Dark grey.

4260'-4270'	Siltstone-Sandstone	Medium grey siltstone to very fine grained sandstone, lithic, trace of argillaceous content.
4270'-4280'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4280'-4290'	Shale	Dark grey.
4290'-4300'	Siltstone-Sandstone	Medium grey siltstone to very fine grained sandstone, lithic.
4300'-4310'	Shale	Dark grey.
4310'-4320'	Shale & Siltstone-Sandstone	Dark grey shale and medium grey siltstone to very fine grained sandstone, lithic, trace of argillaceous content.
4320'-4330'	Shale	Dark grey.
4330'-4340'	Shale	Dark grey.
4340'-4350'	Shale	Dark grey.
4350'-4360'	Siltstone	Medium to dark grey, trace of argillaceous content.
4360'-4370'	Shale & Siltstone-Sandstone	Dark grey shale and medium grey siltstone to very fine grained sandstone, trace of argillaceous content, lithic.
4370'-4380'	Shale	Dark grey.
4380'-4390'	Shale	Dark grey.
4390'-4400'	Shale-Siltstone	Dark grey. 50% shale and 50% siltstone, lithic.
4400'-4410'	Shale	Dark grey, band of siltstone to very fine grained sandstone, lithic.
4410'-4420'	Shale & Siltstone	Dark grey shale and dark grey siltstone with 10% argillaceous content.

4420'-4430'	Shale	Dark grey.
4430'-4440'	Shale & Siltstone	Dark grey shale and dark grey siltstone with a trace of argillaceous content, lithic.
4440'-4450'	Siltstone	Medium to dark grey siltstone with a trace of argillaceous content, lithic. Band of shale.
4450'-4460'	Siltstone-Sandstone & Shale	Medium grey siltstone to very fine grained sandstone, lithic. Dark grey shale.
4460'-4470'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, trace of argillaceous content, lithic. Dark grey shale.
4470'-4480'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, trace of argillaceous content, lithic. Dark grey shale.
4480'-4490'	Siltstone & Shale	Medium to dark grey siltstone, lithic, trace of argillaceous content. Dark grey shale.
4490'-4500'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, lithic, 10% argillaceous content. Dark grey shale.
4500'-4510'	Siltstone-Sandstone	Medium to dark grey siltstone to very fine grained sandstone, lithic, 10% argillaceous content, trace of calcareous content.
4510'-4520'	Shale & Siltstone-Sandstone	Medium to dark grey shale and medium to dark grey siltstone to very fine grained sandstone, lithic, 10% argillaceous content.
4520'-4530'	Siltstone-Sandstone & Shale	Medium to dark grey shale and siltstone to very fine grained sandstone, lithic.

4530'-4540'	Siltstone-Sandstone	Medium to dark grey siltstone to very fine grained sandstone, lithic. Band of shale.
4540'-4550'	Siltstone-Sandstone	Medium brown grey siltstone to very fine grained sandstone, lithic, trace of argillaceous content.
4550'-4560'	Siltstone-Sandstone	Medium brown grey siltstone to very fine grained sandstone, lithic, trace of argillaceous content.
4560'-4570'	Siltstone-Sandstone	Medium brown grey siltstone to very fine grained sandstone, lithic, trace of argillaceous and calcareous content.
4570'-4580'	Siltstone-Sandstone	Medium brown grey siltstone to very fine grained sandstone, lithic.
4580'-4590'	Siltstone-Sandstone & Shale	Medium to dark grey siltstone to very fine grained sandstone, lithic, 10% argillaceous content. Medium to dark grey shale.
4590'-4600'	Siltstone & Shale	Medium to dark grey siltstone with 10% argillaceous content, lithic. Medium to dark grey shale.
4600'-4610'	Siltstone	Medium to dark grey siltstone, lithic, 20% argillaceous content.
4610'-4620'	Siltstone	Medium to dark grey siltstone, Lithic, 20% argillaceous content.
4620'-4630'	Shale	Black, very hard, slightly siliceous.
4630'-4640'	Siltstone	Medium to dark grey siltstone, lithic, 20% argillaceous content.
4640'-4650'	Shale	Black.

4650'-4660'	Siltstone	Medium to dark grey siltstone, lithic, 20% argillaceous content. Band of black shale.
4660'-4670'	Siltstone & Shale	Dark grey siltstone, lithic, 20% argillaceous content. Black shale.
4670'-4680'	Siltstone & Shale	Dark grey siltstone, lithic, 20% argillaceous content. Black shale.
4680'-4690'	Siltstone & Shale	Medium to dark grey siltstone, lithic, 20% argillaceous content. Black shale.
4690'-4700'	Shale	Black.
4700'-4710'	Shale	Black.
4710'-4720'	Shale	Black.
4720'-4730'	Shale	Black, traces of pyrite.
4730'-4740'	Shale	Medium to dark grey shale with a band of microcrystalline limestone.
4740'-4750'	Shale	Medium to dark grey shale with a band of light brown-grey microcrystalline limestone.
4750'-4760'	Limestone & Shale	Medium to dark grey shale and microcrystalline limestone.
4760'-4770'	Shale	Black.
4770'-4780'	Shale	Black.
4780'-4790'	Shale	Medium to dark grey. Band of microcrystalline limestone.
4790'-4800'	Shale	Black, pyritic.
4800'-4810'	Shale	Black, pyritic.
4810'-4820'	Shale	Dark grey shale with a band of microcrystalline limestone.

4820'-4830'	Shale & Limestone	Dark grey shale and light grey microcrystalline limestone.
4830'-4840'	Shale	Medium to dark grey, band of microcrystalline limestone.
4840'-4850'	Shale & Limestone	Medium to dark grey (slight brownish cast) shale and light brown, microcrystalline limestone.
4850'-4860'	Shale & Limestone	Medium to dark grey shale and light brown microcrystalline limestone.
4860'-4870'	Shale & Limestone	Medium to dark grey shale and light brown, microcrystalline limestone. Considerable black shale - caving?
4870'-4880'	Shale	Medium brown grey shale, 10% calcareous content.
4880'-4890'	Shale	Medium brown grey shale, 10% calcareous content.
4890'-4900'	Shale	Light brown shale with 10% calcareous content. Band of microcrystalline limestone with 30% argillaceous content.
4900'-4910'	Limestone & Shale	Light brown, microcrystalline limestone with 30% argillaceous content. Medium brown grey shale with 10% calcareous content.
4910'-4920'	Limestone	Light brown, microcrystalline limestone with 30% argillaceous content.
4920'-4930'	Limestone	Light to medium brown, microcrystalline limestone with 30% argillaceous content (very light brown).

4930'-4950'	Shale	Medium to dark grey shale with 0 to 10% calcareous content.
4950'-4970'	Shale	Medium to dark grey shale with 0 to 50% calcareous content.
4970'-5020'	Shale	Light to medium brown shale with 50% calcareous content decreasing to 15%.
5020'-5030'	Shale	Medium to dark grey shale with 15% calcareous content decreasing to 10%.
5030'-5036'	Shale	Medium to dark grey shale with 10% calcareous content.
5036'-5080'	Limestone	Light to medium brown limestone, microgranular, 40% argillaceous content.
5080'-5090'	Shale	Light to medium brown shale, 40% calcareous content.
5090'-5100'	Limestone	Light to medium brown limestone, microgranular, trace of fragments.
5100'-5110'	Shale	Light to medium brown shale, 40% calcareous content.
5110'-5118'	Limestone	Light to medium brown limestone, microgranular, 20% argillaceous content.
5118'-5130'	Shale	Light to medium brown shale, 40% calcareous content.
5130'-5140'	Limestone	Light to medium brown limestone, 20% argillaceous content.
5140'-5150'	Shale	Light to medium brown shale, calcareous content 40% decreasing to 35%.
5150'-5200'	Shale	Medium to dark grey shale, calcareous content 35% decreasing to nil.

5200'-5260'	Shale	Dark grey.
5260'-5270'	Shale	Dark grey.
5270'-5450'	Shale	Dark grey, minor calcareous content.
5450'-5510'	Shale	Dark grey, 5% calcareous content increasing to 40%.
5510'-5520'	Shale	Dark grey, 40% calcareous content decreasing to nil.
5520'-5590'	Shale	Dark grey, calcareous content increases from trace to 10%.
5590'-5615'	Shale	Dark grey, 10% calcareous content increasing to 30%.
5615'-5670'	Shale	Dark grey, 30% calcareous content decreasing to nil over interval.
5670'-5680'	Shale	Dark grey.
5680'-5760'	Shale	Dark grey, 10% calcareous content.
5760'-5800'	Shale	Dark grey, 10% calcareous content decreasing to nil.
5800'-5845'	Shale	Dark grey.
5845'-5918'	Shale	Dark grey, 20% calcareous content. 5850': micaceous and pyritic.
5918'-5960'	Shale	Dark grey.
5960'-5990'	Shale	Dark grey, 30% calcareous content.
5990'-6000'	Shale	Dark grey, 30% calcareous content decreasing to 10%.
6000'-6010'	Shale	Dark grey, 30% calcareous content.

6010'-6065'	Shale	Dark grey, 15% calcareous content.
6065'-6110'	Shale	Dark grey, 5% calcareous content.
6110'-6163'	Limestone & Shale	Light to medium brown grey. Limestone with 40% argillaceous content, cryptogranular to very fine grained alternating with shale, minor calcareous content.
6163'-6196'	Shale	Medium to dark grey, minor calcareous content, pyritic and micaceous at 6190'.
6196'-6200'	Siltstone	Medium to dark grey, minor calcareous content.
6200'-6235'	Shale	Medium to dark grey, 20% calcareous content, bioclastic debris and limestone fragments.
6235'-6248'	Shale	Medium to dark grey, 20% calcareous content decreasing to a trace.
6248'-6260'	Shale	Medium to dark grey, trace of calcareous content increasing to 20%.
6260'-6320'	Shale	Medium to dark grey, 20% calcareous content.
6320'-6330'	Shale	Medium to dark grey, 20% calcareous content decreasing to a trace.
6330'-6340'	Shale	Medium to dark grey, trace of calcareous content increasing to 20%.
6340'-6350'	Shale	Medium to dark grey, 20% calcareous content.
6350'-6375'	Shale	Medium to dark grey, 20% calcareous content.

6375'-6400'	Shale	Medium to dark grey, 20% calcareous content grading to argillaceous (up to 40%) limestone. Band of non-calcareous shale.
6400'-6410'	Limestone	Dark grey, crypto-granular, 40% argillaceous content. Band of non-calcareous shale.
6410'-6420'	Limestone & Shale	Dark brown grey. Argillaceous (40%) limestone, grading to calcareous (10%) shale which in turn grades back to argillaceous (40%) limestone.
6420'-6540'	Limestone	Dark brown grey, crypto to microgranular limestone, 40% argillaceous content. Bands of non-calcareous shale. 6493-6503': Limestone contains extremely fine to pebble sized bioclastic debris.
6540'-6545'	Shale	Dark brown grey, 30% calcareous content.
6545-6550'	Shale	Dark brown grey.
6550'-6570'	Limestone	Dark brown grey, 20% argillaceous content, crypto to extremely fine granular. Pyritic at 6570'.
6570'-6575'	Shale	Dark brown grey.
6575'-6595'	Shale-Limestone	Dark brown grey, 50% shale and 50% limestone.
6595'-6600'	Shale	Dark brown grey.
6600'-6610'	Shale	Medium to dark grey, 40% calcareous content.
6610'-6635'	Shale	Medium to dark grey, 30% calcareous content.
6635'-6640'	Shale-Limestone	Medium to dark grey, 50% shale and 50% limestone.

6640'-6650'	Shale	Medium to dark grey, 30% calcareous content decreasing to nil.
6650'-6655'	Shale	Medium to dark grey.
6655'-6670'	Shale-Limestone	Medium to dark grey, 50% shale and 50% limestone.
6670'-6680'	Shale	Medium to dark grey, trace of calcareous content.
6680'-6700'	Limestone & Shale	Dark grey and medium brown grey. Limestone-shale interval alternating with calcareous (trace) shale. Limestone contains fine to medium fragments.
6110'-6700'		Shale-Limestone series are laminated to thin bedded with some slumped bedding. Bioclastic and limestone fragments are present, trace of siltstone.
6700'-6800'	Limestone	Conglomerate-Breccia, medium brown gray, trace of black. Composed of Limestone, cryptocrystalline with pellets and pyrite, argillaceous. Breccia fragments range in size from extremely fine to boulder. Matrix: dark grey-black, limestone, crypto to microcrystalline, argillaceous; dolomitic, extremely fine to very fine crystalline.

SECTION IV - LOGS

Formation Density Log	661' - 6788')
Induction Electric Log	660' - 6788')
Microlog Caliper	660' - 6788')
Borehole Compensated Sonic Log	660' - 6778')

March 26, 27, 28, 1966

Seismic Reference Survey 660' to 6750' March 27, 1966

SECTION V - ANALYSIS

A) Core Analysis

Attached None

B) Water Analysis

Attached

C) Gas Analysis

None

D) Oil Analysis

None

SECTION VI - COMPLETION SUMMARY

A) Tubing Record

None

B) Perforation Record

None

C) Cementation

None

D) Acidization and Fracturing

None

E) Back Pressure and Production

None

CHEMICAL & GEOLOGICAL LABORATORIES LTD.

WATER ANALYSIS

Lab No. E66-716-1

Received: April 4, 1966 Reported: April 21, 1966 Well: Location: Peel River Y.T. I-21 66° 10' 36" 5N, 134° 18' 52" 175W

Operator: Shell Canada Limited Field or Area:

Elev.: K.B. 1251' Grd. 1238' Zone/Formation: Mississippian MSI

Method of Production: D.S.T. #2 Sampled from: Top

OTHER PERTINENT DATA Recovered 1373^l. Sample number 2121.
Water

Recovered 1373^l. Sample number 2121.
Water

Sample Interval: 2518' - 2916'
Sampled by:Lars I. Berggren Date: March 3, 1966

(Signed)

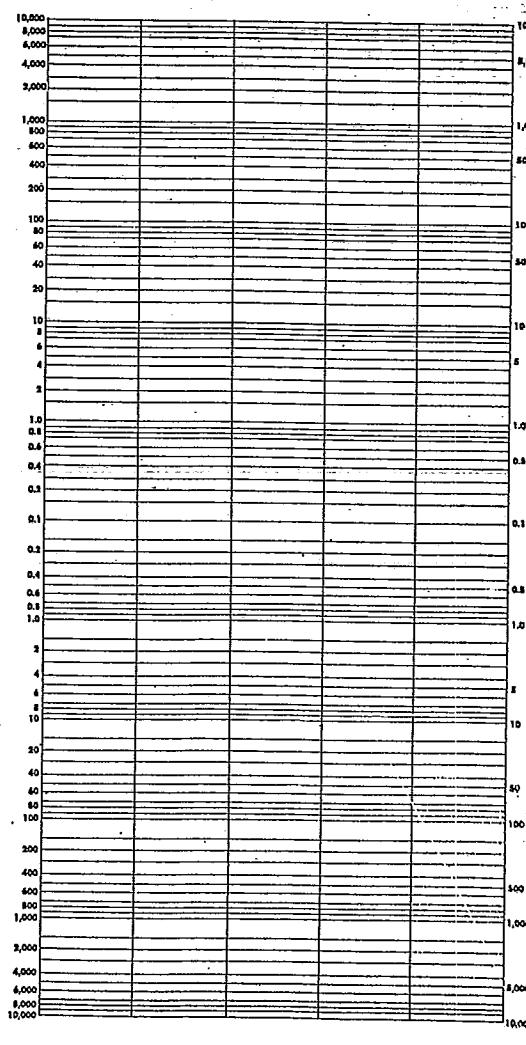

Na	K	Ca	Mg		SO ₄	Cl		HCO ₃	
						154			
Ag/L									
eq/L									

Total Solids Mg/L:	By Evaporation	Fe	Specific Gravity @ 60°F	Observed pH
Calculated	After Ignition	H ₂ S	@ 25°C	Resistivity ohm meters @
Pattern	Unit	Meq./L		
q. %				

Remarks and Conclusions

The chloride was determined on water extracted from mud.

WATER ANALYSIS

Lab No. E66-716-3

Received: April 4, 1966 Reported: April 21, 1966 Well: Location: Peel River Y.T. I-21 66° 10' 36" 5N, 134° 18' 52" 175W

Operator: Shell Canada Limited Field or Area:

Elev.: K.B. 1251' Grd. 1238' Zone/Formation: Mississippian MSI

Method of Production: D.S.T. #2 Sampled from: Bottom

OTHER PERTINENT DATA Recovered 1373'. Sample number 2123.

Sample Interval: 2518' - 2916'
Sampled by:Lars I. Berggren Date: March 3, 1966

(Signed)

	Na&K	Ca	Mg		SO ₄	Cl		CO ₃	HCO ₃	
Mg./L	2,060	40	10							
eq./L	89.61	2.00	0.82			0.42	27.07			
eq. %	48.47	1.08	0.44			0.23	14.64			
Total Solids Mg/L:	By Evaporation 5,836	Fe Trace	Specific Gravity 1.007	@60°F	Observed pH 7.9	@ 73 °F				
Calculated 7,050	After Ignition 4,000	H ₂ S Nil	Refractive Index 1.3375	@25°C	Resistivity 1.44 ohm meters	@ 68 °F				

Pattern Unit Meq./L
Remarks and Conclusions
The sample appears to be filtrate water.
